VOICE ALARMING SYSTEM »ONE-BOX-DESIGN«

THE SIMPLE »ALL-IN-ONE« SOLUTION

In the device:

- Control unit
- Up to six power amplifier + Backup amplifier
- Emergency power supply
- Fire brigade call station
- Switching module

NETWORKABLE:

EXTENDABLE ON UP TO 255 NETWORK NODES PER PEER-TO-PEER SYSTEM (OPTIONALLY WITH OPTICAL FIBER CABLE)

SAA network

The redundant networking ring structure provides a communication platform for alarm messages, control and exchange of information, with no central processing required.

COST SAVINGS

Due to the decentralized system version, it is possible to use one device VARES-1500 pro partial area or fire compartment.

The power network within the respective fire section requires no interpretation in function maintenance, as there is no signal distribution across all fire sections.

Advantage 1: Cost savings through the omission of a line network in functional integrity

Advantage 2: Old and listed buildings with an existing line network can be integrated into a modern alerting concept

TIME SAVINGS

For partial renovations, the use of the new VARES-1500 system can modernize only the renovated section.

Non-renovated areas do not need to be fully considered in terms of planning, hardware and installation.

SAFETY

The VARES-1500 system offers complete safety.

Even in the case of disruption within the redundant network, the distributed systems in the building continue to operate independently thanks to the decentralized alarming concept; the area-by-stage alerting remains ensured.

VARES-1500 »ALL-IN-ONE« VA-SYSTEM

EN 54-16 CERTIFIED SYSTEM / COMPLIANT TO VDE 0833-4 / DIN EN 50849 / VDE 0828

RCS

- + Compact »all-in-one« solution for small to medium applications
- + Up to 36 lines (1-Channel) or 18 lines (2-Channel) expandable per system
- + Monitoring all functions to maintain the Voice Alarm System active

Description

The voice alarm system VARES-1500 is a comprehensive „all-in-one“ concept, that combines the simplicity of a standalone conventional system with the benefits of the global network structure.

Depending on the model (see technical data), the decentralized system contains the necessary routing for up to 6 individual zones or 3 A/B lines. Expandable up to 36 lines (in 1-CH operation) or 18 lines (in 2-CH operation) per system, with 600W/300W and an additional active backup amplifier. With up to 255 closed control and display units in a global network.

Please consider the following features:

- Up to 255 network nodes per system with peer-to-peer-system-redundant (ring technology)
- Mains voltage and battery monitoring
- Loop-technique and EOL (end-of-line) support
- Amplifier and microphone monitoring
- Text module & digital announcements memory
- 2 antiparallel 12 kHz live audio streams: Priority channel with second and / or backup channel

- 6 monitored inputs for e.g. manual call points or FACP
- Max. Distance between nodes: 250m (standard Cat5 cable), 2000m optical fiber cable, optional)
- Nearly unlimited network loop length
- Pre- and post-processing software modules (such as volume controls, routing, mixing, switching, and prioritization)

»VARES-1500« 2-Channel Backup Amplifier module, 2x 100W, (Retrofit kit for NVC-Series) **NDA-200 H**

Lead acid battery set, for internal operation (26 Ah); weight: 18 kg. **BA-052**

Lead acid battery set, for internal operation (45 Ah); weight: 28,6 kg. **BA-080**

Input-/Output modules

Fiber optic converter module

- Module for DIN rail mounting
- Connection for multimode fiber optic cable (820 nm / SC plug / double fiber)
- Max. Distance between the modules 2.000 m

FO Converter, for network **NOM-204 A**
Dimensions (WxHxD): 36x90x62 mm

Network interface (monitored)

- Module for DIN rail mounting
- 16 monitored inputs (normally open or normally closed)
- 16 outputs (per output individually as normally open or normally closed), switching capacity 40 V / 150 mA per channel
- 1 AUX input
- 1 error contact (NC)
- 1 alarm contact (NO)

Input-/Outputmodule **NIM-116 A**
for monitored inputs and outputs; Dimensions (WxHxD): 118x90x65 mm

FACP/VAS Interface

- Module for DIN rail mounting
- FACP (BMZ)/VAS according to VDE 0833-4 Appendix G
- Control voltage of fire alarm system
- Resistor-monitored normally open contact for faults in VAS

FACP/VAS Interface, according to VDE 0833-4 **PIC-101 A**
Dimensions (WxHxD): 36x90x62 mm

Line modules

End-of-Line module

- The end-of-line module (EOL) monitors the conduction path for short circuits, disruption and ground faults. The module will be at the end of the line at the last speaker connected.
- Adjustable total power of the monitored loudspeaker line from 10 to 200 W.
- Test noise monitored with 20 KHz.

End-of-Line Modul **NLM-200 A**
Dimensions (WxHxD): 40x20x5 mm

Modul for Line extension

- Module for DIN rail mounting
- The switching module is connected directly to a single amplifier output (1-Channel) or two outputs (2-Channel) and shares the power for announcements, background music and alerting to three monitored A / B lines
- The total output per module is max. 2x 500 W.

Line Extension, for 6 single or 3 A/B lines **NLE-406 A**
Dimensions (WxHxD): 118x90x65 mm

Extension housing for modules

Painted housing with cover made of sheet steel, quick release, incl. sockets. Sheet steel flange plates encircled with foamed-in PU seals.

- With DIN rail

Extension Housing, for DIN rail modules **NEH-100 A**
Dimensions (WxHxD): 500x300x120 mm

USB programming adapter

To configure and troubleshoot the VARES-1500 Network Control-Center (NVC-Series) via a PC or laptop.

The PC or laptop for error diagnosis is connected directly to the NVC and can be done on site with the associated software.

›VARES‹ Network Programing Adapter USB, with USB cable and CAT5e crossover patch cable (1m) **NPA-150 A**

System intercom station with 6 zone buttons and a PTT talk button. The individual zone keys can be programmed as desired and used for individual, group or all zones calls.

The microphone unit is connected directly to the control unit of NVC-Series. For higher security requirements, it can be redundantly integrated into the network.

The gooseneck microphone with hyper-cardio characteristic ensures the best voice quality.

VARES: Desktop Microphone, with 6+1 Buttons **NTM-106 A**
Dimensions (DxWxH): 270x220x80 mm; weight: 350 g

Network Desktop Microphone
with 6 line buttons and talk button

This system intercom station has a 7" touch screen which allows a clear and uncomplicated programming of all functions.

In addition to the display of different status information, the touch screen offers the possibility of special functions on individual fields, such as playing stored audio files. The display also provides optimum reading and usability conditions by unfavorable lighting.

The hypercardioid microphone, in combination with the obtained compressor, ensures the best voice quality.

VARES: Desktop Microphone, w. Touch-Screen **NTM-124 A**
Dimensions (DxWxH): 270x220x80 mm; weight: 350 g

Network Desktop Microphone
with Touch-Screen

This desk or wall emergency call station with high priority and fault monitoring can be addressed to all zones or individual zone areas throughout the system, including all address calls, for highest priority voice alert. It is equipped with a hand-held microphone and a monitored PTT or TALK button.

The device is only intended for emergencies and can be used by the fire brigades, rescue teams and authorized security personnel. As an emergency microphone according to EN 54-16, it offers integrated monitoring of the microphone unit, the PTT button and the network connection.

VARES: Fireman Wall Microphone **NFM-100 A**
for all call, Dimensions (WxHxD): 270x220x80 mm, 250 g

Fireman Wall Microphone
for all call

The fire brigade station according to DIN14664 (only available in Germany) is equipped with a noise-suppressing handheld microphone unit and has 5 buttons and 4 status LEDs. In case of an emergency the microphone allows a live fire announcement. Alternatively, the stored evacuation and warning announcements can also be activated.

The red housing (RAL-3000) corresponds to the specifications of fire alarm systems and has a lockable door in which a profile half cylinder according to DIN 18252 can be installed.

VARES: Fireman Wall Microphone (FES) **NFM-200 A**
with control panel (compliant to DIN 14664), Dimensions (WxHxD): 253x185x59 mm, 3,2 kg

Fireman Wall Microphone
with control panel (DIN 14664)

The multi-zone fire brigade wall microphone is equipped with a noise-suppressing handheld microphone unit, zone selection buttons for announcements and triggering of recorded voice messages. The microphone unit within the VARES-2000 architecture is used by the emergency services to assist evacuation of persons from a building during an emergency.

To provide operational security for the user, the network fire brigade wall microphone is equipped with LEDs on the front panel to display the following states: Status, All Call Only, Speak Now and Busy. The microphone unit is fully monitored.

VARES: Fireman Wall Microphone **NFM-300 A**
with control panel, Dimensions (WxHxD): 440x385x140 mm, 6 kg

Fireman Wall Microphone
with control panel

further system accessories

Network Patch Cable

The patch cables are designed for use in the VARES-1500 or VARES-2000 network.

Patchcable CAT6a, 0.5 m, yellow, (for VARES-1500/2000) NPC-005

Patchcable CAT6a, 1.0 m, yellow, (for VARES-1500/2000) NPC-010

Patchcable CAT6a, 3.0 m, yellow, (for VARES-1500/2000) NPC-030

Network Crossover Patch Cable

The crossover patch cables are designed for use in the VARES-1500 or VARES-2000 network.

Crossover-Cable CAT6, 0.5 m, gray, (for VARES-1500/2000) NCC-005

Crossover-Cable CAT6, 1.0 m, gray, (for VARES-1500/2000) NCC-010

Crossover-Cable CAT6, 2.0 m, gray, (for VARES-1500/2000) NCC-020

Crossover-Cable CAT6, 3.0 m, gray, (for VARES-1500/2000) NCC-030

Crossover-Cable CAT6, 5.0 m, gray, (for VARES-1500/2000) NCC-050

SAA network

Special highlight:
The decentralized combination of the VARES-1500 & 2000
systems. This achieves the greatest possible security.

For planners and engineering companies

COST SAVINGS

The practical combination of voice alarm controller, external line modules and system power amplifiers with integrated emergency power management, makes each design of a system very simple.

FLEXIBILITY

Due to the digital networking of the VARES-2000 and VARES-1500, a simple extension or combination of both systems is also possible on a decentralized basis.

The VARES-2000 system monitors the speaker lines via impedance monitoring (EOL) or supports VARES-LOOP technology.

SAFETY

The VARES-2000 system, in combination with the VARES-1500, offers complete safety. Even in the case of faults within the redundant network, the distributed systems in the building continue to operate autonomously thanks to the decentralized alarm concept, the area-by-stage alarm remains ensured.

+ Easy networking – without master/slave principle

+ Up to 1.440 lines or 255 call groups can be extended

+ Monitoring of all functions to maintain the VA system

+ Max. 240.000 W power possible

Description

The Control Center is the heart of the VARES-2000 system. It manages all the functions of a voice alarming system, incoming information and audio signals. It controls the network amplifiers, the A/B channels and the monitored line extensions according to the requirements. This also includes managing of audio streams coming from the network.

The VARES-2000 control center processes the inputs according to its own signal priority table and distributes the audio signal to a maximum of 16x NDA-1000A per control center amplifier via the digital AMP link module, which manages two prioritized streams via a dynamic allocation technique.

The remote-controlled line extensions (NLE-406A) work directly with the NCC-2000A. These devices route the audio from the A/B channels of the amplifier to the required speaker areas or zones.

Two simultaneous audio signals are managed via an extensible switch matrix. This can range from a minimum of 6 speaker lines to a maximum of 1.440 speaker lines that can be grouped into a maximum of 255 virtual call zones.

The controller has monitored GPI and unmonitored GPO interfaces, global and local network ports. The monitored AMP connection communicates via the VARES-2000 data bus with the NDA-1000A amplifiers.

The VARES-2000 system uses the same configuration software as the VARES-1500 system which makes the combination of both systems simple and uncomplicated.

Please consider the following features:

- AudioAudio matrix function with DSP.

- Up to 255 network nodes per system with peer-to-peer System redundant (ring technology).
- Mains voltage and battery monitoring.
- Supports loop technique and EOL (end-of-line).
- Amplifier and microphone monitoring.
- Text Module & Digital Speech Memory.
- Priority channel with second and/or backup channel.
- 16 monitored or unmonitored inputs, freely configurable via software.

»VARES-2000« Network Control-Center, (Audio-Matrix), 1 RU **NCC-2000 A**
 »VARES-2000« Network Control-Center Expander, (Audio-Matrix Extension for NCC-2000A), 1 RU **NCE-2000 A**

Fully digital 100V amplifier with emergency power management

Description

The Network Digital Power Amplifier offers powerful audio amplification to EN54-16 and an integrated emergency power supply to EN54-4 standards.

Depending on configuration, the power amplifier supplies 2x 500 W output power in a 2 RU 19" rack casing. It differs from conventional power amplifiers in its **fully digital** system architecture and its **three redundant power supplies**.

Multiple NDA-1000A amplifiers can be connected together on one battery pack. The active charger charges the battery pack that forms the backup power supply. In addition, an external 24V connection is available for supplying additional modules.

Please consider the following features:

- Digital power amplifier **with integrated emergency power supply**. The scalable battery charger has a temperature sensor and is certified to EN54-4.
- Displays: Power; Link; Battery; Charger, error message CH A SIG / CLIP; CH B SIG / CLIP.
- The following connections are available: 2x Global Network Connection (Amp Link), 2x 500 W power outputs.
- Battery pack connection and 24V DC output for external components.
- Network fault monitoring with switch to emergency power operation.

- The amplifier has two BGM inputs for stand-alone operation and one AUX input (mono, balanced) or 2-Channel mode Stereo (unbalanced), each (analogue) 0dBu
- Monitoring battery failures (with internal resistance measurement).
- Monitoring of power outputs.

SYSTEM OVERVIEW

Input-/Output modules

Fiber optic converter module

- Module for DIN rail mounting
- Connection for multimode fiber optic cable (820 nm / SC plug / double fiber)
- Max. Distance between the modules 2.000 m

FO Converter, for network **NOM-204 A**
Dimensions (WxHxD): 36x90x62 mm

Network interface (monitored)

- Module for DIN rail mounting
- 16 monitored inputs (normally open or normally closed)
- 16 outputs (per output individually as normally open or normally closed), switching capacity 40 V / 150 mA per channel
- 1 AUX input
- 1 error contact (NC)
- 1 alarm contact (NO)

Input-/Output module **NIM-116 A**
for monitored inputs and outputs; Dimensions (WxHxD): 118x90x65 mm

FACP/VAS Interface

- Module for DIN rail mounting
- FACP (BMZ)/VAS according to VDE 0833-4 Appendix G
- Control voltage of fire alarm system
- Resistor-monitored normally open contact for faults in VAS

FACP/VAS Interface, according to VDE 0833-4 **PIC-101 A**
Dimensions (WxHxD): 36x90x62 mm

Line modules

End-of-Line module

- The end-of-line module (EOL) monitors the conduction path for short circuits, disruption and ground faults. The module will be at the end of the line at the last speaker connected.
- Adjustable total power of the monitored loudspeaker line from 10 to 200 W.
- Test noise monitored with 20 KHz.

End-of-Line Modul **NLM-200 A**
Dimensions (WxHxD): 40x20x5 mm

Modul for Line extension

- Module for DIN rail mounting
- The switching module is connected directly to a single amplifier output (1-Channel) or two outputs (2-Channel) and shares the power for announcements, background music and alerting to three monitored A / B lines
- The total output per module is max. 2x 500 W.

Line Extension, for 6 single or 3 A/B lines **NLE-406 A**
Dimensions (WxHxD): 118x90x65 mm

GPO Relay-Output module

- Module for DIN rail mounting
- 8-fold GPO outputs
- The variables potential-free contacts or duty call (duty call voltage of 24-29V) are possible for each GPO output.

GPO Relay-Output module, 8-fold for GPO **NRC-008 A**
Dimensions (WxHxD): 112x112x38 mm

USB programming adapter

To configure and troubleshoot the VARES-2000 Network Control-Center (NCC-2000A) via a PC or laptop.

The PC or laptop for error diagnosis is connected directly to the NVC and can be done on site with the associated software.

• **VARES' Network Programing Adapter USB**, with USB cable and CAT5e crossover patch cable (1m) **NPA-150 A**

further system accessories

19" Blank Panels

These 19" blank panels made of 1.3 mm steel serve to fill empty spaces or ventilation (NLF-001) in 19" rack cabinets.

19"-Vent Panel, 1 RU (weight: 0,28 kg)	NLF-001
19"-Blank Panel, 1 RU (weight: 0,34 kg)	NLP-001
19"-Blank Panel, 2 RU (weight: 0,59 kg)	NLP-002
19"-Blank Panel, 3 RU (weight: 0,85 kg)	NLP-003

Network Patch Cable

The patch cables are designed for use in the VARES-1500 or VARES-2000 network.

Patchcable CAT6a, 0.5 m, yellow, (for VARES-1500/2000)	NPC-005
Patchcable CAT6a, 1.0 m, yellow, (for VARES-1500/2000)	NPC-010
Patchcable CAT6a, 3.0 m, yellow, (for VARES-1500/2000)	NPC-030

Network Crossover Patch Cable

The crossover patch cables are designed for use in the VARES-1500 or VARES-2000 network.

Crossover-Cable CAT6, 0.5 m, gray, (for VARES-1500/2000)	NCC-005
Crossover-Cable CAT6, 1.0 m, gray, (for VARES-1500/2000)	NCC-010
Crossover-Cable CAT6, 2.0 m, gray, (for VARES-1500/2000)	NCC-020
Crossover-Cable CAT6, 3.0 m, gray, (for VARES-1500/2000)	NCC-030
Crossover-Cable CAT6, 5.0 m, gray, (for VARES-1500/2000)	NCC-050

RCS

Main features of the VARES-3000 system:

- + Directly from the certified manufacturer – Made in Germany
- + VARES BUS SYSTEM for system components
- + Intelligent modular design
- + Energy efficient, fully digital system technology

Description

The digital, easy programmable and flexibly expandable VARES-3000 system takes over the audio- and alarm management for devices with up to 224 speaker lines, or switching contacts per control center.

The system is used in office and industrial buildings, educational institutions such as schools and universities, hotels, shopping centers, multifunctional halls, sports arenas, train stations, hospitals, swimming pools and other large leisure facilities.

FURTHER VARES-3000 SYSTEM FEATURES:

- Control and monitoring of up to 224 loudspeaker lines can be implemented
- Up to 24 call stations can be implemented (per control center)

- Expandable modular design
- Extension of the lines in steps of 8
- BUS system for all system components
- Free programming of the assignment of loudspeaker lines and groups
- Programming and configuration via PC software
- Archiving of the setting data
- Network interface for programming and configuration
- Monitoring of all system components according to EN 50849 / VDE 0828.
- System certified according to EN 54-16
- Latest digital technology
- and much more...

VARES-3000

Advice, planning and offers for a VARES-3000 system that is individually tailored to your project can be obtained by calling:

+49 8061-3501-0

CONTROL-CENTER

The digital, easy programmable and flexibly expandable center PSS-224 C of the VARES-3000 system takes over the audio- and alarm management for devices with up to 224 speaker lines, or switching contacts.

›VARES-3000: Control-Center, 2 RU **PSS-224 C**

The digital extension unit PEU-056 B for further 56 speaker lines, is connected through the extension cable PFK-200 to the speaker selector PSS-224 C. A maximum of 3 extension units can be used per PSS-224 C.

›VARES-3000: Extension Unit, 2 RU, for PSS-224 C **PEU-056 B**

›VARES-3000: Extension Cable **PFK-200**
Connecting cable for PEU-056 and Program Selector PPS-024 A

Output- and control modules

Relay Card for 8 speaker lines. The card relays are equipped with power contacts. For switching medium inductive loads up to 600VA.

›VARES-3000: Relay Card 8 Lines, digital **PRC-008 C**

Relay card for earth fault impedance monitoring with 80Hz AC voltage in connection with the measuring module PMO-350 C.

›VARES-3000: Relay Card Ground Leakage, digital **PRC-248 B**

Relay card for special functions. Programmable for alarming, error indication and emergency call Switching option as an emergency power relay during power failure.

›VARES-3000: Relay Card Special Functions, 8-fold, digital **PRC-308 C**

Monitored relay card for 2 paging amplifiers, one program amplifier and 8 speaker outputs. Freely programmable using VARES-3000 software.

›VARES-3000: Matrix-Relay Card 2x8, digital **PRC-408 C**

Monitored relay card for 1–4 power amplifier inputs and 8 loudspeaker outputs. Freely programmable using VARES-3000 software..

›VARES-3000: Matrix-Relay Card 4x8, digital **PRC-508 A**

Input modules

8 freely programmable input contacts. Assignment of any line selection or different chime types or text files with an text module installed.

›VARES-3000: Input Module, 8 input contacts, digital **PIC-208 B**

Input modules

Expands the Control Center PSS-224 C by further 16 alarm inputs. Independent bus device can be mounted on a DIN rail. With bus connection.

›VARES-3000‹ **Input Module, Master** 16 monitored inputs, digital **PIC-416 C**

Extension module for 16 monitored alarm inputs. Up to 3 modules can be connected to a PIC-416C (max. 64 inputs). With bus connection.

›VARES-3000‹ **Input Module, Slave** 16 monitored inputs, digital. **PIC-216 C**

Digital input module for DIN rail mounting. 16 programmable inputs (monitoring can be switched on and off). Independent bus device.

›VARES-3000‹ **Matrix-Relay Card 2x8**, digital **PIC-516 C**

Function modules

5-channel, potential free RS485 hub for DIN rail mounting. Star-shaped wiring of RS485 buses possible.

›VARES-3000‹ **RS485-Hub, 5 Channel**, digital **PFH-485 A**

Module for networking VARES-3000 systems. Each PNC-224A enables 8 line groups to be controlled in the SLAVE system.

›VARES-3000‹ **Network Control**, zur Vernetzung von VARES-Anlagen, digital **PNC-224 A**

Input for alarm or paging signal. Connection for Priority call-voltage (+ OR connection to PSS-224 C). Input for background music

›VARES-3000‹ **NF-Switch, 1-Channel**, digital **PNF-101 C**

Single or simultaneous switching of 4 inputs to 4 outputs. Balanced audio connections. E.g. to route the signals for a 3 fold sports hall..

›VARES-3000‹ **Audio-Matrix Module, 4x4**, digital **PAX-404 A**

Enables the connection of external modules (relay cards, measuring module) to the Control Center. Modules can be installed remotely up to 1.2 km away.

›VARES-3000‹ **Remotemodul**, digital **PBC-610 A**

Recording of 32 individual texts in mp3 format on memory card. Alarm text, alarm siren according to DIN 33404 - Part 3, 7 types of chimes prepared.

›VARES-3000‹ **Message-Module**, digital **PMM-132 D**

The PBE-185A is an extension module of the PSS-224C for extension and potential separation of the internal I²C-bus to the outside.

›VARES-3000‹ **Bus-Extension – Master**, digital. **PBE-185 A**

Extension module of the PEU-056 B to extend the I²C bus from the Control Center PSS-224 C.

›VARES-3000‹ **Bus-Extension – Slave**, digital **PBE-285 A**

DIN rail module to extend the I²C bus from the Control Center PSS-224 C. With remote modules.

›VARES-3000‹ **Bus-Extension – Slave**, digital **PBE-385 A**

Function modules

Display module for displaying current operating conditions, system and error messages. Operation is via 4 buttons on the front of the device.

›VARES-3000‹ **Display- and Button Module**, digital. **PLC-400 A**

Display of the status of the line relays on a remote relay card or the relay cards in a remote control center. Two-color status indicator (red / green).

›VARES-3000‹ **Display Module**, 8-LEDs, digital. **PLE-628 A**

Module for measuring and monitoring functions. Necessary for line, microphone and amplifier monitoring.

›VARES-3000‹ **Monitoring and Measuring Module**, digital. **PMO-350 C**

Monitoring module for installation in the PDM-208 B microphone station. Monitoring of the microphone in accordance with VDE 0828 / EN 50849.

›VARES-3000‹ **Microphone Monitoring Module**, digital. **PMO-400 B**

End-of-line module to terminate the loudspeaker lines in order to monitor them in accordance with standards if more than 20 loudspeakers are connected per line.

›VARES-3000‹ **End-of-Line Module** **PLT-100 A**

MAIN CLOCK

This master clock enables the control of up to 130 slave clocks on 2 independent slave clock lines in pulse mode, as well as the time-dependent control of up to 240 switching contacts (in connection with the Control Center PSS-224 C). Two relay cards (PTC-008 B) can be installed. These two provide 16 switching contacts directly.

›VARES-3000‹ **Main Clock**, incl. slave clock control, digital. **PTC-240 D**

The DCF bus module is processor-controlled and works independently. It synchronizes all devices on the bus that require an exact system time.

›VARES-3000‹ **DCF-Bus Module**, Radio receiver, for PTC-240 D. **PRR-077 B**

Relay card with 8 relay switchover contacts extends the functionality of the master clock. Up to two of these 8-fold relay cards can be installed.

›VARES-3000‹ **Relay Card**, 8-fold, for PTC-240 D, digital. **PTC-008 B**

Relay module for use in the slave clock line. To increase the number of slave clocks or as a booster for long supply lines to the slave clock.

›VARES-3000‹ **Relay-Module, Booster**, for PTC-240 D slave clocks **PTC-102 A**

Programming adapter to configuring VARES-3000 Main Clock PTC-240 D (if Main Clock PTC-240 D is in use without the PSS-224 C).

›VARES-3000‹ **Programming Adapter**, for PTC-240 D **PCA-300**

›VARES-3000‹ **Power Supply, 24V**, 2A, for PTC-240 D **PSU-048/24**

AMPLIFIER MONITORING

The digital emergency management enables the permanent monitoring of up to 10 amplifiers, of which a maximum of 8 can be configured as call amplifiers and 2 as backup amplifiers. The connected amplifiers are checked sequentially using the pilot tone.

• **VARES-3000 Amplifier Monitoring**, 1 RU, digital **PHM-802 C**

The amplifier monitoring is integrated into the VARES-3000 system through this interface and monitoring is ensured via the bus cable.

• **VARES-3000 Bus option RS-485**, digital **PHM-485 B**

After installing the monitor module, all 10 amplifier outputs (8 + 2) can be monitored. Monitoring speaker: broadband, 4W 8 ohms.

• **VARES-3000 Monitor Module**, for 10 amplifiers (installation in PHM-802 C) . **PMU-802 A**

PROGRAM SELECTOR

With the Program Selector 24 differently programmed background music zones can be switched on and off manually. Thus each individual button of the PPS-024A may be assigned to one relay of the control center. Groups of speaker lines can be programmed for each individual button.

• **VARES-3000 Program Selector**, 1 RU, 24 buttons **PPS-024 A**

• **VARES-3000 Extension Cable** **PFK-200**

Connection cable for PEU-056 B and PPS-024 A, for SLAVE connection of the PSS-224 C.

The bus module is required to locally separate the PPS-024A Program Selector from the VARES-3000 Control Center (PSS-224 C).

• **VARES-3000 Bus module**, (für PPS-024A), digital. **PBC-400 B**

Keypad for switching programmed background zones. It can also be used as a display panel for alarm inputs of the VARES-3000 system.

• **VARES-3000 Keypad Field**, 24 buttons **PKF-024 A**

• **Flush housing**, for flush mounting of the PKF-024A **UPG-400**

AMOK- / CONVERSATION UNIT

The processor-controlled talk-back unit not only offers the classic intercom function, but also serves as an indispensable tool for quick and precise alarming in an emergency (amok situation).

• **VARES-3000 Conversation-Unit** **PWM-101 B**

• **Flush housing**, for flush mounting of the PWM-101 B **UPG-400**

• **Surface housing**, for surface mounting the PWM-101 B **APG-400**

DESKTOP MICROPHONES

This addressable all call remote microphone is suited for building the inter-communication system with up to 200 participants.

•VARES-3000: All Call Desktop Microphone, digital **PTM-101 B**

The digital microphone station can control 8 loudspeaker groups or individual lines. Expandable with various Microphone extension units.

•VARES-3000: Microphone Station, with LCD-Display, 8 switches, digital . **PDM-208 B**

•VARES-3000: Connecting Cable, for Microphone Extension Units **PFK-101**

The freely programmable buttons can be programmed for individual zones or for groups of several loudspeaker lines.

•VARES-3000: Microphone Extension Unit, 8 buttons, digital **PEM-008 B**

The programmable expansion module has four covered alarm buttons for the direct transmission of four different alarm signals.

•VARES-3000: Microphone Extension Unit, 4 alarm buttons, digital . . **PEM-104 B**

This microphone fault indicator modul displays selectively numerous appearing errors according to EN 50849 directly on one selected microphone..

•VARES-3000: Microphone Fault Indicator Module, digital **PSM-108 B**

The module shows the internal address (e.g. room number), which is sent by the caller of another microphone station (PTM- or PWM-101 B).

•VARES-3000: LED-Adress Module, digital **PAM-130 A**

Numeric keypad as an extension unit for the PDM-208 B microphone station, for selecting individual or rarely used zones.

•VARES-3000: Ten-Keys Pad, digital **PZM-310 B**

Up to 8 loudspeaker groups can be switched on or prepared texts (from the PMM-132 D) can be called up using the memory buttons..

•VARES-3000: Fire Brigade Microphone Station, digital. **PFM-308 C**

The illuminated buttons can be used to call up 5 alarm announcements from the PMM-132D text module of the PSS-224 C in five freely configurable zones, which can be used to initiate the targeted evacuation of a building in the event of an alarm.

•VARES-3000: Fire Brigade Wall Microphone Station, digital . . **PFM-330 D**
compliant to VDE 0828/EN 50849,

Flexible expansion and combination options

SYSTEM ACCESSORIES

Power supply units for the voltage supply of the corresponding VARES-3000 system component.

›VARES-3000‹ Power Supply, 24 VA, 24 V, 1A	PSU-024/24
›VARES-3000‹ Power Supply, 48 VA, 24 V, 2A	PSU-048/24
›VARES-3000‹ Power Supply, 120 VA, 24 V, 5A	PSU-120/24
›VARES-3000‹ Power Supply, 240 VA, 24 V, 10A	PSU-240/24
›VARES-3000‹ Connecting Cable, 3 m, for Microphone Stations.	PMC-003

Installation-friendly Sub-D 9 connection socket to connect the microphone units to the bus..

›VARES-3000‹ Bus Connection Socket, 25-pin **PBA-300 B**

Installation-friendly Sub-D 9 connection (surface mounting) to connect the microphone units to the bus.

›VARES-3000‹ Bus Socket, 25-pin for surface mounting. **PAS-300 B**

Installation-friendly Sub-D 9 connection (flush mounting) to connect the microphone units to the bus.

›VARES-3000‹ Bus Socket, 25-pin for flush mounting. **PWS-300 B**

For configuration and fault diagnosis of the VARES-3000 Control Center via a PC or laptop.

›VARES-3000‹ UDP-Telecommunication Module **PRS-500 B**

The NTP software option enables synchronization with the local computer network through the PRS-500B module. For the PSS-224C and PTC-240D devices, summer/winter time changeover is possible without an additional radio receiver.

›VARES-3000‹ NTP-Software option for LAN-Adapter, (NTP time synchronization via network) **PRS-500 NTP**

›VARES-3000‹ Hard- and Software-Configuration

If you like to configure your VARES 3000 System by us, please feel free to contact us. We like to submit you an offer. Please contact us.

Part 4

VARES LOOP

MONITORING OF RING BUS LINES AND SPEAKER LINES

DETECT, LOCALISE AND ISOLATE IN 3 SECONDS

THE VARES-LOOP SYSTEM

With the VARES-LOOP system it is possible to quickly detect, localize and isolate faults in ring bus or loudspeaker lines. With this system, functional failures in audio transmission due to cable damage in the ring bus can be prevented cost-effectively and effectively.

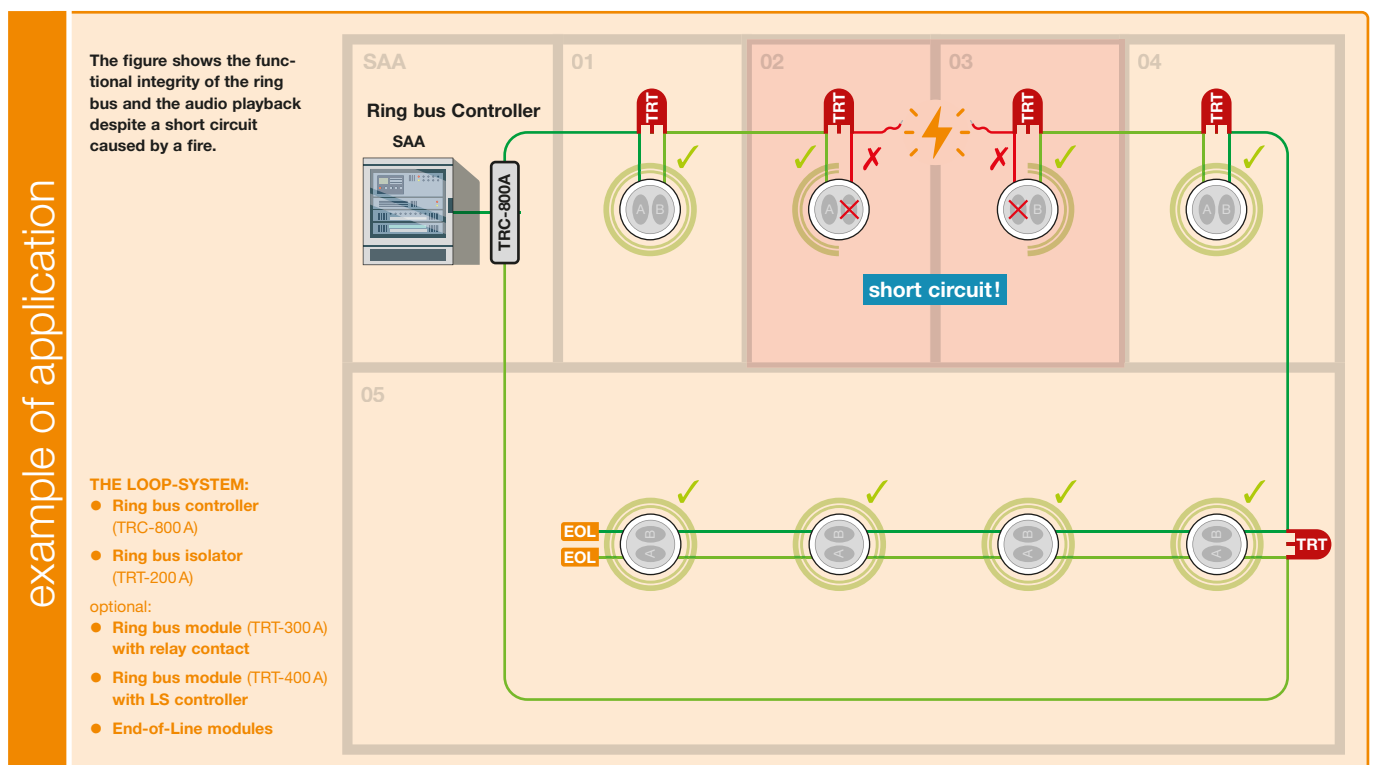

It is an EN 54-17 certified system for monitoring ring bus and loudspeaker lines in public address and voice alarm systems. With the VARES-LOOP system, loudspeaker circuits can be set up so that they meet the requirements of VDE 0833-4.

for planners and engineering offices

ADVANTAGES OF THE SYSTEM

- + Flexible planning options while maintaining functionality in difficult building situations (old building, modular building)
- + Significant cost reduction by reducing E30 functional maintenance cables
- + Individual monitoring of loudspeakers possible if required
- + Fail-safe shutdown of third-party systems via existing ring line
- + Compatible with our voice alarm systems VARES-1500, VARES-2000 and VARES-3000

Certification No.
0560-CPR-142190002

TRC-800A

Description

The ring bus controller TRC-800A is the central unit in the VARES-LOOP system. The controller is located between the power amplifiers and the speaker line.

It supplies the ring bus modules (e.g. TRT-200A) with voltage, performs the monitoring and data exchange between the ring bus modules and the electroacoustic warning system (EWS or VAS).

Technical data	TRC-800 A
Power supply	18 - 36 V DC, nominal voltage 24 V DC
Power consumption (@ 200 TRT-XXX full load)	Idle current 100 mA continuously max. Power consumption 2.4 W.
AC voltage	max. cont. 100Vrms
AC current	max. cont. 5A
AC frequency range	40Hz - 20kHz (-3dB)
DC voltage	30V
DC current	max. cont. 130mA
LOOP total load	max. 500 W
LOOP wiring	2-pole, max. 2,5 mm ² / max. Loop length: 1.000 m
Loop relay contact	max. 250 V AC / 8A (dual-state type)
Bus address range	00 - FF (0-255) / max. 32 on a single rail
Detection - LOOP	short circuit, open circuit, earth fault
Max. number of ring bus modules	200 pieces
Connections	1x 5-pin DIN rail bus connector; 2x 3-pin screw connection; 1x 2-pin screw connection
Housing / Protection class	ABS, DIN DIN rail mounting; IP 30
Dimensions (WxHxD)	17,5 x 114,5 x 99 mm, 1 HP
Weight	210 g
Certification	EN 54-17:2005, NEN2575-2

The ring bus modules can be switched to different modes using the ring bus controller operating software:

Service mode: The service mode is used to set up and commission the VARES-LOOP system.

Tracking Mode: While tracking the software determines which ring bus isolator has detected an error.

Please consider the following features:

- The TRC-800A controller monitors whether a power amplifier is connected.
- Monitoring of the connected lines for earth fault, short circuit and open circuit.
- A loudspeaker group may cover a maximum area of 1,600m² and may not exceed a fire zone.
- Space-saving installation on DIN rails, only 1 module width.
- If an error occurs, the fault signaling contact is activated and the following operating states are displayed:
 - Ring bus short circuit
 - Ring bus earth fault
 - Ring bus interruption
 - Amplifier input open
 - amplifier input earth fault

Model designation

Ringbus Controller, for 1 HP DIN rail mounting **TRC-800 A**
(IP-30)

Certification No.
0560-CPR-142190002

TRT-200 A

Mounting directly on the speaker is possible

Description

The ring bus isolator TRT-200 A is an EN54-17 certified module for monitoring loudspeaker lines in electroacoustic emergency warning and voice alarm systems.

The ring bus isolators are linked in the loudspeaker ring line and transmit audio signals from the voice alarm system to the loudspeakers via the ring bus controller.

The ring bus isolator monitors the connection cables of the ring bus input, the ring bus output and the loudspeaker connection for short-circuit, open circuit and earth fault.

If an error occurs, this information is immediately sent to the TRC-800 A ring bus controller. At the same time, the ring bus isolator initiates the required measure, such as switching off the ring bus on the side where there is a short circuit. The ring bus display LED shows which side of the ring bus isolator is the source of the error.

All loudspeakers must always be connected via a DC blocking capacitor (TRK-001 A). I

Technical data	TRT-200 A
Power supply (via TRC-800A)	19 - 30 V DC, nominal voltage 30 V DC
Power consumption	Idle current 100 µA continuous max. Power consumption 20 mW
Control	20 kHz / 7,5Vrms
Control times	0,3 sec. (fade in); 1,0 sec. (fade out)
Wiring	2-wire, max. 2,5 mm ² ; Loop max. length 1.000 m Cable outer diameter max. 13 mm
T branch (cable end)	max. 50W / EoL = 47 kOhm; 0,25 W or higher
Speaker type	only with DC blocking capacitor (TRK-001 A)
Detection - LOOP	short circuit, open circuit, earth fault
Surface mounting	Mounting on the speaker
Connections	3-pin 5-mm WAGO plug-in terminal; Ring line input (L +, L-, GND) 0,8-2,5 mm ² Ring line output (L +, L-, GND) 0,8-2,5 mm ² Speaker (L +, L-, GND) 0,8-2,5 mm ² LED Connection (L +, L-) 0,8-2,5 mm ²
Housing / Protection class	ABS, with transparent cover; IP 21C
Dimensions (WxHxD)	110 x 130 x 55 mm
Weight	150 g
Certification	EN54-17:2005 / 0560-CPR-142190002

Please consider the following features:

- Detection and isolation of short-circuits in the adjacent loudspeaker lines.
- Detection and isolation of interruptions, short circuits and overloads at branch points.

★

Model designation

Ringbus Isolator..... **TRT-200 A**
IP 21C, incl. Cover

Certification No.
0560-CPR-142190002

Description

The connection device for loudspeakers with volume control TRT-400 A is an EN 54-17 certified module in electro-acoustic emergency warning and voice alarm systems.

The connection device has no isolating function, which is why it is always used between two isolators (TRC-800A or TRT-200A).

The TRT-400A ring bus module with 60W volume control can be used in two different ways:

- Individual adjustment:** to individually adjust the volume of a subordinate background sound system.
- Own 100V program:** to cue-in your own background sound through the connected speaker line

In both cases, the volume control is bridged in the case of an alarm or priority announcements. The supply and control runs through the higher-level loudspeaker ring bus line.

Please consider the following features:

- Detection and isolation of short circuits in the adjacent loudspeaker lines.
- Detection and isolation of interruptions, short circuits and overloads at branch points.
- Individual volume adjustment in rooms.
- Recording of your own 100V program via the connected loudspeaker line.

★

Use of the DC blocking capacitor (TRK-001 A)

Use of the end-of-line module (TRA-001 A)

VARES-LOOP accessories

Ring bus termination (EOL)

The TRA-001A ring bus termination (end-of-line module) is used to terminate a 100V line.

If more than one loudspeaker is connected to the T-branch of the Ring bus isolator, the end-of-line module must be used.

The module is connected to the last loudspeaker of a branch line in the VARES-LOOP system.

Ringbus-Abschluss...TRA-001 A
(end-of-line module)

DC Blocking Capacitor

Loudspeakers in the VARES-LOOP system must always be connected via a DC blocking capacitor.

DC Blocking Capacitor TRK-001 A
Please note: every speaker in the system requires a DC blocking capacitor.

Programming adapter RS485

The programming adapter (RS485 / USB) enables the connection of a PC with the VARES-LOOP ring bus system.

With the help of the VARES-LOOP system software, the ring bus isolators in the ring bus can be checked, operated and analyzed. Faults in the line network can be localized and isolated in a matter of seconds.

Programmier Adapter...TRP-485 A
(RS485 to USB)

Certification No.
0560-CPR-142190002

TRT-300A

Description

The ring bus module TRT-300A is an emergency switching device and not a ring bus isolator. It is looped into the ring bus in order to automatically switch off the subordinate sound system in the event of an alarm or an emergency announcement.

The ring bus module has two potential-free changeover contacts (230 V AC / 8 A). For example, in the event of an alarm, the first relay contact can switch on flashing lights and the second relay contact can switch off the loudspeakers. This

enables priority circuits to be activated via the 100V loudspeaker line. This is necessary if priority alarms or announcements have to be imported into the affected area.

Power is supplied via the ring line. A capacitor that is charged by the ring bus controller holds sufficient energy for at least two emergency cycles.

Please consider the following features:

- Two potential-free heavy current relay contacts (230 V AC / 8 A) for automatic interruption of the subordinate own program, e.g. for emergency announcements.
- Power is supplied via the ring line. It stores energy for at least two emergency cycles.
- In addition to the priority switch, additional attention displays (e.g. strobe lights) can also be switched.

Digital Microphone Station

Description

ELM-106 manages announcements into one or more selected zones and all-calls. An expansion to handle 12 call zones is possible by the use of an optional six-button module ELE-006.

- On an overall bus length of 100 m on CAT7 cable up to ten pcs. ELM-106 can be connected to a single ESC-012A. For larger distances please use lower resistance cables.
- With the extension module ELE-004 can be extended to a covered alarm button, three buttons for special functions and 2 fault LED's .

Lifesaving in the case of an emergency!

In the case of an alarm, an electroacoustic emergency warning system may avoid panic by understandable speaker announcements, which are, contrary to the howling of a siren, a much more efficient way of initiating the evacuation of a building.

Certainly, the availability and safe working of such systems has to be guaranteed at any time by monitoring the complete signal path. The standard **IEC 50849/VDE 0828 and VDE 0833-4** defines the requirements for such systems.

Description Control-Center ESC-012A

VARES ESC-012A has been developed in full accordance to the latest rules and regulations for security. Targeted towards small and medium-scaled usage scenarios, it handles all the tasks and challenges a voice alarm systems faces in everyday life.

Installation is handled in an easy and straightforward way by using the LCD based user interface. All connected auxiliary components are scanned and registered automatically.

Speaker lines can be configured in 12 single or 6 A/B lines for an increased security. Even a mix of single and redundant line setups for custom scenarios is possible.

A logging function stores all system conditions on non-volatile memory in any case of a technical failure. The generated protocol can be viewed immediately or sent to a printer.

Specifications:

- Graphical user interface with adjustable colour scheme, in any case of an alarm the display flashes in red colour.

- Menu interface with digital rotary encoder.
- Password protected menu interface.
- Fully variable assignment of up to 12 speaker lines to a maximum of 6 power amplifiers, maximum amplifier power is 480 W each.
- A faulty power amplifier is detected and replaced by the backup amplifier automatically.
- Two line level inputs of different priority levels can be used for various tasks, like background music distribution or paging via a telephone system.
- Free assignment of the program to any of the 12 speaker lines.
- The internal digital message memory (based on an SD card) is equipped with an evacuation announcement, a siren according to DIN 33404 and various different chimes (one tone and four tones).
- All 12 speaker lines are monitored for short circuits, line breaks and impedance variation.
- Error messages are provided by clear text display, signalling LED, sounder and dry contact.
- Up to 10 digital call stations ELM-106 can be connected.
- ELM-106 call stations can be expanded to address 12 zones by ELE-006 expansion units.
- Emergency microphones ESM-100D and ESM-020H enjoy individual 3-band equalisation for best intelligibility of any announcement (up to two emergency microphones can be connected).

★

Indicated here is the different reaction pattern to siren signals or a spoken message.

VARES Control-Center, 2 RU **ESC-012A**

COMPACT EMERGENCY WARNING SYSTEM

Main functions of the system:

- + **Amplifier and Microphone Monitoring**
- + **Text Module & Digital Speech Memory**
- + **Mains voltage and battery monitoring**
- + **Connection of up to six power amplifiers possible**
- + **Monitoring of the fire alarm handover**
- + **Monitoring of the speaker lines**
- + **Automatic recording of error logs**
- + **Shutdown of all non-safety-relevant components in emergency announcements**

Fire Brigade Call Station

In addition to the monitored microphone, the station ELM-106 can be used.

Description

The call station is electronically monitored compliant to **VDE 0828/IEC 50849**. Measured values of the microphone cap, the entire signal path and the press-to-talk bar are detected and analysed.

The direct connection with VARES is made by a 4-pin shielded cable. The stable "slim" desktop housing has a functional design. It is suitably coloured for the specially targeted application.

Fire Brigade Handheld Mic

Description

The handheld microphone is electronically monitored compliant to **VDE 0828/IEC 50849**. Measured values of the microphone cap, the entire signal path and the press-to-talk bar are detected and analysed.

The direct connection with VARES is made by a 4-pin shielded cable. The handy, coloured housing with its lateral press-to-talk bar is optimized for its special purposes.

VARES Fire Brigade Handheld Mic ESM-020H

Housing and Mounting Panel for ESM-020H

Description

The Mounting Panel VMF-020A for the fire brigade microphone ESM-020H provides installation in a standard housing according to **DIN 14661** and **DIN 14662** and can thus be integrated in a fire control panel.

The housing VCF-020A is optional, if no fire brigade control panel is available. It is designed as a standard housing according to **DIN 14661** and **DIN 14662**, in red (RAL 3000). The housing with transparent door, lockable with on-site fire brigade profile half cylinder according to DIN 18252.

- Protection type: IP40, DIN 40050
- Surface design according to DIN 14663
- The ESM-020H is part of the certification to EN 54-16

Mounting Panel, for ESM-020H VMF-020A

SAMPLE OF USE | 12 Zones Paging-System

PSC-012A

12-ZONES PAGING-SYSTEM

RCS

Description

The Paging-System PSC-012A is ideal for building paging systems with up to 12 lines. Additionally the system can be used for background music.

The compact device is designed for the installation in 19" cabinets and offers high flexibility because of only 2 RU required space.

Please consider the following features:

- Easy configuration directly on the device using the clear display with auto run configuration to detect the connected devices.
- Freely programmable signal memory with SD card for attention signals or announcements.
- Connection for up to 10 Digital microphone stations VLM-112/WO.
- 2 All call microphone stations with priority connectable (VS-050 P).
- 6 Switching inputs to initiate signals or texts (e.g. via Telephoneinterface TIF-404 C or the DCF-Mainclock PTC-240 D).
- 2 program inputs with different priorities.
- Looping for external equalizer.
- Even with only one amplifier ready for operation. Up to 12 amplifiers can be connected.
- Operating with 230 V mains or 24V DC power supply.

- The volume of the background program can be determined separately for each of the six LINE outputs to the amplifiers.

VLM-100 A | for all-call

Description

Microphone-station (condenser) for announcements in pre-selected zones with pre-chime and priority-switch through RJ45-jack.

Microphone station..... **VLM-100A**
digital, for MXA-4120 A or MXP-604 A

MXM-104 | for 4 zones

Description

Digital microphone-station to select the 4 individual speaker circuits. Status indicator with LED for zones, busy, talk, signal, power, and microphone-failure.

Microphone station..... **MXM-104**
for remote control of 4 speaker zones and "all-call".
Microphone station..... **MXM-104 WO**
as MXM-104 but without interface RR-40

4-CHANNEL MATRIX PRE-AMPLIFIER

RCS

6 IN - 4 OUT

MATRIX

Description

The MXP-604 Matrix Amplifier offers the opportunity to dispose up to six different input signals in any order on to four separate speaker zones through the **integrated 6- in 4 Matrix**.

This Matrix amplifier offers a special feature. Digital microphone stations **MXM-104** and **VLM-100A** as well as commercial microphone- and line signals can be connected to the device.

Please consider the following features:

- Inputs 1-4 have to be set to MIC or LINE and have Gain-Control as well as shiftable phantom-power; The inputs always have priority in comparison to inputs 5 & 6 (LINE).
- Inputs 1-4 (MIC/LINE) are provided with a combo-socket, inputs 5 -6 (LINE) with a cinch-socket.
- All inputs have volume-, treble- and bass control, a signal LED and a switch for zone selection
- PAGING-input on screw-connectors for announcement signals (Tel.-Paging) with highest priority.
- Contacts to initiate the integrated chimes (2-or 4 sounded) prior to announcements for inputs 1 – 4.
- Switch to select the zones for announcement of the microphone station VLM-100A and volume control.

- Recording-/monitoring output (cinch/jack socket) with selectable recording zone and volume control.
- LED-level indicator and volume control for four outputs.
- Amplifier works with line current (230 V) or DC-24V (emergency power).

4-CHANNEL MATRIX AMPLIFIER

RCS

MXA-4120A
480 W
4x 120 W

5 IN – 4 OUT

MATRIX

Description

The MXA-4120 A ist a very compact Matrix-Amplifier. The MXA-4120 A offers the opportunity to spread up to five different input-signals randomly on to four separate speaker zones through the **integrated 5-in-4 matrix**. Each of the four zones is supplied by their own integrated 100V-power amplifier (4x 120 Watt).

Any commercial microphone can be connected to this matrix amplifier, but especially the microphone stations **VLM-100A**, **MXM-104** as well as **MXE-400W**.

Please consider the following features:

- Inputs 1-3 are switchable to MIC or LINE and have Gain-Control as well as shiftable phantom-power; The inputs always have priority in comparison to inputs 4 and 5 (LINE-IN).
- Inputs 1-3 (MIC/LINE) are provided with a combo-socket, inputs 4 - 5 (LINE) with a cinch-socket.
- Volume-, treble- and bass control separate for all five inputs.
- PAGING-input on screw-connectors for announcement signals (Tel.-Paging) with highest priority.
- Contacts to initiate the integrated chimes (2-or 4 sounded) prior to announcements for inputs 1 – 3, as well as siren (all-call).
- Switch to select the zones for announcement of the microphone station VLM-100A.
- Up to four emergency-microphone-stations MXE-400W can be connected (one microphone station for each zone).
- Integrated control-speaker, with zone selection and volume control.

- A fault-indicator output (changeover-contact) signals device-failure /device-error.
- Amplifier works with line current (230 V) or DC-24V (emergency power).

Digital 100V Power Amplifier according to IEC 268-3
with over 90% degree of efficiency

Description

With this **digital 100V Power Amplifier** we do contribute to the protection of our climate and therefore the protection of our natural habitat. This device uses energy in a sensible manner and is part of an advanced technology development.

The advantages of digital power amplifiers can be found regarding a much improved degree of efficiency of over 90% compared to other analogue amplifiers with approx. 70%.

The out come of that the lost heat is way less, which is positive for the durability of the amplifiers and also for the complexity of the cooling of 19" racks.

Please consider the following features:

- Pilot tone inputs and malfunction message contacts for emergency power and the power amplifier predestine this amplifier for 100V technology according to VDE 0828/IEC 50849.
- In case no signal is present, the amplifier automatically switches to standby and then only spends 9.9VA, if the signal is pending, e.g. in case of an emergency the amplifier will be ready for operation within 30 ms.
- These amplifiers are manufactured according to the latest assembly methods with high-quality components and are therefore perfectly suitable for professional continuous operation in 100V alarming systems.
- The battery capacity for emergency power operation is notably less than with analogue amplifiers.
- Output power and protection circuits according to IEC-268-5
- The LED indicators on the front panel give information on important signal and operation status.

- Cooling takes place maintenance free without ventilation, which means that there will be no pollution and no follow-up costs. This device is therefore especially suitable for noise sensitive environments (offices, churches, conference rooms, etc.).
- Special protective circuits preventing engine idling, short circuit, over heating and an input delay are a matter of course.
- Other distinctive features: low installation depth of only 260 mm and countersunk volume controls.
- The devices have loudspeaker outputs and symmetrical inputs on screw-type connectors, whereby the wiring complexity is reduced significantly.
- The inputs can be optionally equipped with input transformers. In this case please order as option the TSE-203.

★

- + Degree of efficiency of over 90%
- + Energy saving
- + Automatic standby mode
- + Low heat waste
- + Low battery capacity necessary

Digital 100V Power Amplifier according to IEC 268-5 with over 90% degree of efficiency

Description

With this **digital 100V Amplifier** we do contribute to the protection of our climate and therefore the protection of our natural habitat.

The advantages of digital power amplifiers can be found regarding a much improved degree of efficiency of over 90% compared to other analogue amplifiers with approx. 70%

The outcome of that the lost heat is way less, which is positive for the durability of the amplifiers and also for the complexity of the cooling of 19" racks.

Please consider the following features:

- Pilot tone inputs and malfunction message contacts for emergency power and the power amplifier predestine this amplifier for 100 V technology according to VDE 0828/IEC 50849.
- In case of no signal is present, the amplifier automatically switches to standby and then only spends 9.9 VA, if the signal is pending, e.g. in case of an emergency the amplifier will be ready for operation within 30 ms.
- These amplifiers are manufactured according to the latest assembly methods with high-quality components and are therefore perfectly suitable for professional continuous operation in 100 V alarming systems.
- The battery capacity for emergency power operation is notably less than with analogue amplifiers.
- Output power and protection circuits according to IEC-268-5
- The LED indicators on the front panel give information on important signal and operation status.

- Cooling takes place maintenance free without ventilation, which means that there will be no pollution and no follow up costs. This device is therefore especially suitable for noise sensitive environments (offices, churches, conference rooms, etc.).
- Special protective circuits preventing engine idling, short circuit, overheating and an input delay are a matter of course.
- Other distinctive features: low installation depth of only 260 mm and countersunk volume controls.
- The devices have loudspeaker outputs and symmetrical inputs on screw-type connectors, whereby the wiring complexity is reduced significantly.
- Compliant with the standard EN 54-16.

★

- + Degree of efficiency of over 90%
- + Energy saving
- + Automatic standby mode
- + Low heat waste
- + Low battery capacity necessary

Digital 100V Power Amplifier according to IEC 268-3 with over 90% degree of efficiency

NEW

Description

Fully digital power amplifiers with 2 or 4 outputs each with 500 W RMS power at 100V.

The size of the housing enables high efficiency, minimal heat generation and additionally a reduction in the required installation space. The amplifiers have protective circuits and monitoring of voltage, current and temperature, with automatic separation of the outputs for short circuit and overload, thus avoiding overheating.

The digital power supply and the two or four independent amplifier (integrated in one housing) provide standards-compliant and redundant use in alarm systems.

Several LEDs are available for visual control. These provide information about the pending signal, clip, the protect circuit or the supply of voltage.

Please consider the following features:

- Two or four emergency power inputs (24V DC)
- The devices have separate speaker outputs (100 V) on screw-type connectors.
- Symmetrical controlled LF inputs on screw-type connectors, whereby the wiring complexity is reduced significantly.
- Special protective circuits against short circuits, overheating and overloading are among the features of this amplifier series.
- Active and remote-controlled standby switch for low power consumption.

- The thermally controlled fans (only switch on briefly during sine full load operation) ensure effective cooling of the amplifier so that overheating is avoided.
- Compliant with the EN 54-4 and EN 54-16, as well as part of the certification of the VARES-3000 system.
- Suitable for A/B operation thanks to the integrated, redundant power supplies.

★

OPTIONAL | Pilot Tone-Module

FD-21

Description

This pilot tone-module serves to monitor the performance of amplifiers. It is installed in the slot provided on power amplifiers of the „DP“ series. The generator produces a 20 kHz test signal.

Apart from the test of the power amplifier functioning, the speaker line is checked for short circuit faults. Error message from a potential-free relay contact (closer).

1-CHANNEL POWER AMPLIFIER WITH PILOT TONE

RCS

BA-240 DP

240 W

BA-480 D

480 W

Balanced inputs for programs, **priority** and **pilot tone-module**

Description

These 19" 1-channel power amplifiers are **fully monitored** and ideal for the use in professional audio applications with 100V, 70 V and 25 V line systems.

The devices are manufactured in state-of-the-art production processes using high-quality components such as toroidal transformers.

They have been designed for continuous operation. They are absolutely short circuit and open circuit proof and are equipped with all relevant protection devices.

Please consider the following features:

- All the amplifiers of the „DP“ series have one electronically balanced audio input for programs and one input (with priority) for priority announcements, etc.
- Each power amplifier can be equipped with 1 pilot tone-module (FD-21) which monitors the performance of the amplifier.
- The amplifiers have electronically balanced inputs and outputs on screw-type connectors. Possible hum pick-up from ground loops is avoided through the balanced inputs and outputs.
- The screw-type connectors substantially facilitate the wiring for signal input. Time consuming fitting of the input cables with XLR connectors is eliminated.
- The multicoloured LED indicators located on the front panel continuously indicate the operating status of the amplifier including protection functions and possible dangers.

- By means of a „Power Remote“ contact the amplifier can be switched on, even if the power switch is in the off position
- All models feature soft start and a special circuit which suppresses unpleasant switch-on noise.
- A groundlift switch is provided to disconnect signal ground from chassis ground (shielding), in order to avoid any hum pick-up.

For 8 call amplifiers and 2 spare amplifiers

Description

PHM-802 C digital amplifier switchover unit is designed to monitor up to 10 power amplifiers simultaneously. Up to 8 amplifiers can be configured as call amps, backed up by up to 2 spare amplifiers.

PHM-802 C works self-sustaining and independent of other components. Alternatively, it can be integrated into a VARES-3000 system.

Please consider the following features:

- Setting up PHM-820 C is done easily via a clearly represented menu that is displayed on the big front display. All the programming work is done by just four function keys, a computer is not necessary to configure PHM-802 C.
- The health status of each connected amplifier is shown on the front display.
- Faults will be indicated until the cause of the problem is repaired.
- All connectors are service-friendly pin-and-socket-connector types that are perfectly suited for installed audio equipment.
- 8 call amps can be linked with 1 spare amp, or two groups made of 4 call amps each can be linked to 2 spare amps (1 spare amp per group). Can also be used without spare amplifier.
- PHM-802 C offers an input for 230 V AC switching power supply (switched to 24V) and an additional input for 24 V DC emergency power.
- A bigger number of amplifiers can be monitored by using several PHM-802 C.
- The measured level of the pilot tone can be adjusted for each 100 V power amplifier at the device.
- A variety of pilot tones is available, ranging from 19 kHz to 25 kHz.
- An alarm output for external fault messages allows easy routing of messages within the voice alarm system.

- The menu is available in English or German language.
- Optionally, the monitor module PMU-802 A can be installed to intercept all 10 amp outputs.

★

Monitor option PMU-802 A

After installation of the monitor module every 10 amplifier outputs (8 + 2) can be monitored. The selection of the desired channel and volume via keyboard on the device or connected PC with the software „ConfigV3000“.

Monitor option, for PHM-802 C **PMU-802 A**
Monitor speakers: Broadband, 4W 8 ohms. Listening power: 1.3 W RMS amplifier

Bus option PHM-485

With this interface modification option the amplifier monitoring can be integrated in the VARES-3000-System. The monitoring of the device is guaranteed by the bus cable, as well as different configurations of the software „ConfigV3000“.

EMERGENCY POWER MANAGEMENT

EN 54-4 CERTIFIED / COMPLIANT TO VDE 0833-4 / VDE 0828 / DIN IEC 50849

RCS

Conforms to:

EN 54-4:2007, EN 12101-10, NFS 61940

Description

The digital emergency management ESP-2000 B was developed for voice alarm systems, which must correspond to the standard **VDE 0833 - part 4**. All errors are displayed and reported on fault signal contacts, as well as a buzzer and an LED. The device is still certified to EN 54-4.

Please consider the following features:

- Network fault monitoring with switchover to standby power mode.
- Monitoring of battery errors (with internal resistance measurement).
- Monitoring of the 6 or 12 power outputs for amplifiers.
- Function for a balancing charge to avoid different voltages of the individual battery cells.
- A quick charge function with up to 16A or 32A, allows a rapid recharge the battery packs even with large capacities.
- Fault signal are realized in the event of a fault with sloping relay.
- Integrated depth discharge protection for 24 V batteries.

- Fault indication signal through LED's on the front side of the device and fault indication contact (potential-free changeover contact) on the rear side of the device.
- A temperature sensor adjusts the allowed charge current to the existing temperature in the PA cabinet.
- All commercially available lead-acid batteries can be used.
- Equipped with a switching power supply and digital charger unit.
- USB interface to configure operating parameters.
- Configuration software in scope of supply.

+ Integrated reverse charge protection in order to protect the lead-accumulator.

+ Automatic activation (changeover) of the 24 V emergency power in case of an AC power failure.

Description

This emergency power management is built into a stable 19" cabinet (3 RU). All of the utilized components are of superior quality to ensure that even 100V Power Amplifiers operate precisely despite ongoing carrying capacity. This device takes charge of charging the 24 V emergency power batteries whilst an electronic control circuit protects the battery from overcharging. The fact that it automatically switches over to emergency power and the built in reverse charge protection (only for EP-352 RM) enables the user to expand the utilization of this device considerably.

- Charging status display and LED with division into a percentage. (optional lead-accumulators, see below)
- Protection against polarity reversal and overcharging and excess voltage regarding the charging batteries.
- 24V emergency power supply in case of AC power failure, either via switching contact of the power distributor PD-322 A (EP-352) or automatically (EP-352 RM).
- Integrated reverse charge protection (only EP-352 RM) for 24 V charging batteries (in case the storage battery voltage drops below the given minimum value with regard to DC operation, the automatic DC commutation will be deactivated).
- Two 24 V outputs with each 32 A and three 24 V outputs with each 16 A.

Technical data	EP-352	EP-352 RM
End-of-charge voltage	approx. 27,3 V DC	
Charging current	2,5 A	
Power consumption	105 W	
Power supply	230 V	
Dimensions (W x H x D)	483 x 133 x 350 mm, 3 RU	
Weight	11,6 kg	11,8 kg

Rear view

- 1 Power- and low power jack
- 2 Power control unit (here a deactivation of an automatic commutation to DC power is possible for maintenance purposes)
- 3 24V DC connecting clamp for emergency power supply of the amplifier
- 4 Screw terminal in order to connect any external battery

Charger, (3 RU) **EP-352**
without integrated reverse charge protection and automatic activation

Automatic Charger, (3 RU) **EP-352 RM**
incl. emergency power management

VDS-Nr. G196022

VDS-Nr. G196023

These lead-accumulators are maintenance free. The operation of the EP-352 is either possible with a built-in (BA-052) or with an external (BA-052 or BA-080) lead-accumulator set.

Technical data	BA-052	BA-080
Nominal voltage	24 V (12 V per battery)	24 V (12V per battery)
Capacity	27 Ah	42 Ah
Connections	M5-screws	M6-screws
Dimensions (W x H x D)	166 x 125 x 175 mm	196 x 174 x 163 mm
Weight	9 kg per battery	14,3 kg per battery

Lead Acid Battery-Set, for internal operation (27 Ah) **BA-052**

Lead Acid Battery-Set, for external operation (42 Ah) **BA-080**

Description

This emergency power management ESP-500A was developed for danger alarm devices, which have to be in accordance with the international standard IEC 50849. Any kind of error will be indicated and announced via a signal buzzer, a buzzer or LED.

Please consider the following features:

- Output-fuse monitoring with notice of malfunction in order to ensure automatic alarm in case of emergency power usage.
- Monitoring of the accumulator connection to signal in case an accumulator is missing or disconnected.
- Acoustic and optical error message directly on the device in addition to the accumulative alert output.
- Charging status display and LED with division into a percentage.
- Protection against polarity reversal and protective circuit against overcharging and excess voltage regarding the charging batteries.
- Integrated reverse charge protection for 24 V charging batteries (in case the storage battery voltage drops below the given minimum value with regard to DC operation, the automatic DC commutation will be deactivated).
- Two 24 V outputs with each 32 A and three 24 V outputs with each 16 A.

SPEAKER LINE MONITORING UNIT

RCS

Line monitoring for up to 32 lines

Description

The RSC-132A is a microprocessor controlled line monitoring device. Up to 32 speaker lines can be monitored fully automatically.

Faults are indicated through a buzzer incorporated in the device, an LED located on the front panel and a potential free contact on the rear. Through the use of external relay boards, connected via a 5 m SUB D cable, the unit is only 1 RU in height.

The only preparatory measure for putting the device into operation is to insert the RSC-008A relay boards into the speaker lines. To complete the installation, the relay boards only have to be connected to the base unit and have to be measured.

Please consider the following features:

- Integrated Watchdog circuit.
- By measuring the impedance, the device detects missing speakers, short circuits on the line or line breaks.
- When the measurement is performed, the line is checked for ground faults at the same time.
- If the measured values are above or below the permissible range, the device indicates „over“ or „under range“.
- The measuring intervals can be set from 1 minute to 24 hours.
- The configuration is stored in a non-volatile E2PROM.
- With 4 relay boards (for 8 circuits) one RSC-132A unit can monitor up to 32 circuits.
- In the event of an emergency or when an important announcement has to be made, the measurement can be interrupted by means of a potential free contact.
- When a fault is detected, the unit issues an audible alarm. Additionally, the LED on the front panel is lit. At the same time a contact is closed to activate external units.

- The 2-digit LCD constantly indicates the time remaining until the next measurement is taken or, in the case of a fault, the type of fault and the affected line.

RSC-008A Relay Board

The relay board has been designed for the connection of the speaker lines. Up to 4 boards (32 circuits) can be connected up to a RSC-132A monitor unit. The card provides one additional relay per line, which disconnects the affected line from the 100V output after measurement.

★

Technical data	RSC-132 A/RSC-008 A
Speaker circuits	8 (can be extended to up to 32)
Measuring time	100 ms per circuit
Measuring range	25 ohms – 1,6 kohms (6 W – 400 W)
Power consumption	23 W
Power supply	230 V AC/24 V DC
Dimensions in mm (WxHxD)	483 x 44 x 200 mm, 1 RU
Weight	3,0 kg

Model designations

- Speaker Line Monitoring Unit,..... **RSC-132A**
with matching relay boards for up to 32 lines
- Relay Board,..... **RSC-008A**
each for 8 lines

Description

The MU-307 A monitor unit serves for the audible and visual monitoring of amplifiers as well as of pre-amp outputs.

The system is incorporated in a stable 19" housing (2 RU) and can be used with 100V line systems as well as for low-impedance applications. A high-quality full range speaker and a headphone output facilitate continuous monitoring.

The monitor speaker and the headphone output have separate volume controls. The line volume is set through controls located on the front panel. Level indication is also on the front panel through multicoloured LED chains.

Please consider the following features:

- Up to 10 programmes can be monitored. Channel selection is performed by means of the multi-position selector switch. A 5-segment level indicator LED is provided for each line.
- The volume of the monitor speaker or the headphone is continuously variable.

- Each of the 10 monitor inputs can be set to the required input voltage (1 – 100V) by means of a special control on the front panel.
- The unit operates on mains power (230 V AC) as well as on DC power (24 V DC), for example, in the case of a power failure (emergency power supply).

★

Technical data	MU-307 A
Speaker	Full range chassis, 2 W with volume contro
Headphone output	max.: 1.0 W min. 8 ohms, with volume control
Input voltage	1 V – 100V (continuously variable)

MIXER PRE-AMPLIFIER 19" RACKMIXER

RCS

Description

The IMP-612 A is a professional mixer preamplifier for general public address applications with two separate outputs and seven inputs. The volume and the sound can be controlled separately for each output.

The seven inputs are assigned by means of a pushbutton switch. Each of the seven inputs has its own gain control. The device can be operated with direct voltage 24V DC (e.g. emergency power supply).

The IMP-612 A has six line inputs (cinch / 3.5 mm jack / clamp) and a microphone input (XLR). All signals can be mixed together using an input potentiometer.

Please consider the following features:

- Line input via RCA, 3.5 mm jack and clamp.
- Rear line input parallel to the jack.
- Line output (symmetrical) via screw-plug terminal.
- Microphone input with phantom power (23 V).
- Ground lift jumper.
- 2-band tone control and volume control on the output.
- 3 LEDs can be controlled via 24 V DC.

- Function keypad with 3 push buttons (3 changeover contacts)
- 2 slots for optional further type D terminal unit, such as e.g. IMD-001A
- Very flat design for rack cabinet assembly

★

- ❼ Balanced XLR outputs for master output 1 and 2.
- ❽ Terminal for 24 V DC power supply.
- ❾ Power cord for 230 V AC.

10-CHANNEL MIXER PRE-AMPLIFIER

RCS

Description

The MA-1410B is a professional 10-channel mixer preamplifier for general sound reinforcement applications. It has 10 audio inputs with level control and output selector switches for master 1, master 2, master 1 + 2 outputs. Additionally, all 10 input channels have a MIC-LINE selector switch.

The device operates both on 230 V AC mains power and on 24 V DC power (e. g. emergency power supply).

Please consider the following features:

- The unit includes an electronic 2-tone chime (selection can be made on the device). The chime can be activated manually on the front panel or automatically as pre-announcement chime via the VLM-100 desktop microphone station (P.T.T. RJ 45 input).
- The chime type is switchable with jumper to 4 chime tone inside the device.
- The chime volume can be adjusted on the front panel. Additionally, there is another contact terminal on the rear which permits chime remote control.
- All input channels (10 + chime) have a selector switch on the front panel for switching the signal to master output 1, 1 + 2 or 2.
- The input channels 1 (P.T.T.), 2 and 3 (2 and 3 switchable) as well as the electronic chime automatically have priority (voice recognition) over input channels 4 - 10, which then are attenuated.
- Input channels 2 - 10 have a 3-position switch on the front panel which serves for the signal routing to LINE-MIC and the low-cut filter (300 Hz).
- All input channels have XLR sockets. Inputs 7 – 10 are additionally equipped with RCA sockets for line signals.

- Each input channel has a separate signal LED indicator.
- All MIC inputs have phantom power (+15 V DC). This means that both electret condenser microphones and balanced dynamic microphones can be connected to the XLR MIC inputs.
- Both master output channels have a dual-band equalizer and can be controlled separately on the front panel. Additionally, there is another output (REC-OUT) with RCA sockets.
- Multicoloured 5-segment master output level LED chains indicate the level for each channel.
- Apart from the numerous features such as balanced inputs and outputs, the 10-channel mixer preamplifier offers excellent sound characteristics, ease of installation and operation.

AMOK SOLUTION

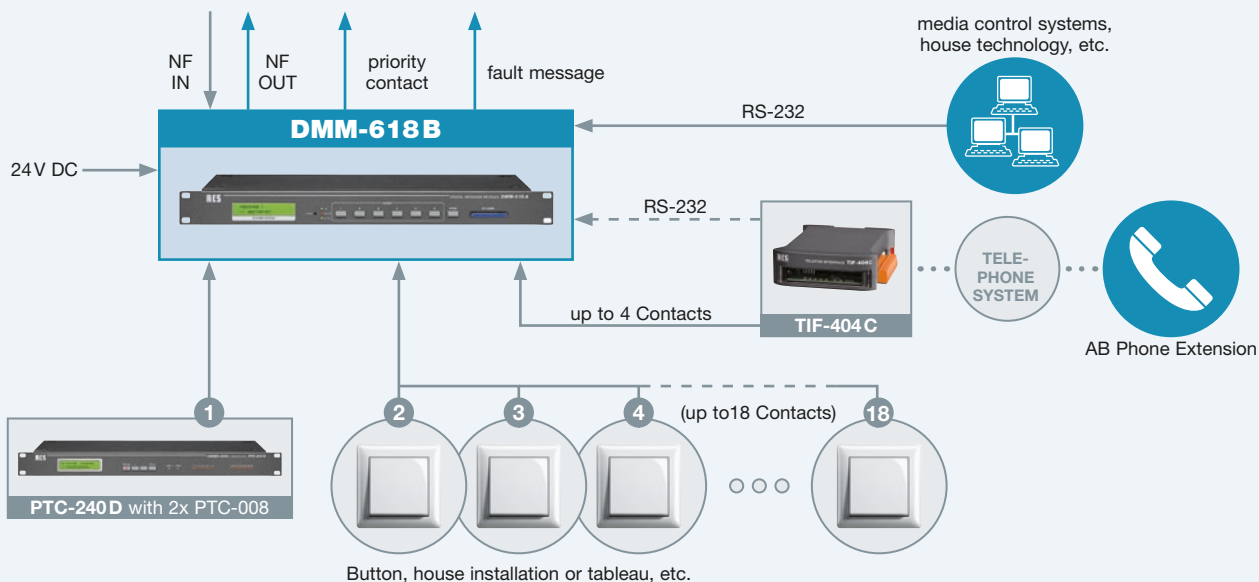

FEATURES

Features of the applications:

- + 18 texts triggered, via potential free contacts or RS-232
- + 6 texts can be triggered directly via buttons on front panel
- + Fault message output with changing switch contact
- + NF audio input and output with priority
- + Connection of up to 18 manual call points lines possible
- + 4 texts about contacts from TIF-404C triggered (by election)
- + Application and integration into existing systems possible
- + Monitored text and signal memory
- + Controlling of media techniques possible

ADVERTISING TEXT

Description

The Digital Message Module is a universal flash memory module for MP3 files. It can be operated in two operating modes, as a voice memory for alarm systems or as an advertising text device. Because its flash memory is permanently monitored DMM-618B acts as an ideal addition to any existing voice evacuation or paging system.

There are 7 buttons on the front of the device. The buttons 1-6 start the respective text, the button „Stop“ stops the playback. Furthermore, a reset button is provided. Up to 18 messages can be triggered remotely, for example from an system clock (e.g. PTC-240 D), from AAS-200 A or any other NO contact. A jumper is used to switch between impulse triggering or the permanent closure of a contact. Through a jumper you can set the operation as a pulse or permanent contact. Furthermore, a priority control (text 1 top priority, text 18 lowest priority), an additionally switched NF output and a priority contact are available.

A display informs about the operating states of the device (fault message, text started, ID tags). A potential-free changeover contact is available for a fault message. The text lengths of the files depend on the size of the SD memory card. Here you can use cards up to 8 GB.

Serial output

All state changes in the contacts are offered in a serial signal in addition to the dry contacts themselves. The signal level matches with a TTL-signal. Combined with a TIF-404 C telephone interface unit the contacts can be activated by RS-232 directly.

Application as moitored speech memory:

- + for Amok signaling
- + to voice alarming
- + as a supplement to existing PA systems

Application as an advertising text unit:

- + in department stores and supermarkets
- + in Restaurants
- + in medical practices, and much more...

Please consider the following features:

- Ideally suited as an addition to existing voice evacuation and paging systems. Combines perfectly with AAS-200 A, TIF-404 C, PTC-240 D and all system components of the VARES-Series range.
- Can be combined with „VARIO-LINE“ desktop mixing amplifiers and 3rd party paging systems.

Technical data	DMM-618 B
Power supply	24 V DC, power supply (optional)
Current consumption	0,55 A
Release	6 Buttons, 18 contacts
Display	2-line LCD-Display, cleartext
Memory media	CF-Card (FAT32 Format), max. 8 GB
sampling rate	min. 128 kB/Sec.
AF output	transformer balanced
Alarm output	potential free, changing switch
Connections	Screw-type terminal
Serial output	RS-232, TTL-Level
Matching power supply (optional)	PSU-048/24
Dimensions (WxHxD); Weight	483 x 44 x 171 mm; 1 RU; approx. 2 kg

Description

This radio clock PTC-240D enables you to drive and control up to 130 side clocks on 2 side clock lines. These operate independently from each other in impulse operation. The optional relay cards PTC-008B allow additional time-dependent monitoring of up to 16 relay-switch outputs.

You can easily set up the basic functions of the main clock on the front panel of the device. For any additional programming of events you are supplied with clearly structured computer configuration software.

The main clock is synchronised every hour through the DCF-receiver module PRR-077 B. The receiver as well as the directional mounting angle accord to the degree of protection IP 65. Therefore they are suitable for mounting in receiver-heavy outside areas.

Please consider the following features:

- Monitoring of the NU-lines regarding overload or short circuit.
- Storing the position of the slave clock in case of power failure without extra battery. Slave clocks be reset after return of the mains voltage.
- Monitored 24V emergency power-input, in order to maintain the impulse of the side clock.
- Freely programmable allocations of all relay contacts.
- All daily events are recorded in a "daily list".

Model designations

Main Clock, incl. side clock control, second output, etc.....	PTC-240 D
DCF-Receiver Module, dimensions 94x65x58 mm	PRR-077 B

optional Accessories

Relay Card, for Main Clock PTC-240D	PTC-008 B

Interfaces	RS-485-Bus
Memory capacity	253 (events)
Time base	Quarz, optional DCF-77
Power supply	24 V DC / max. 2 A
Dimensions / Weight	483 x 44 x 171 mm, 1 RU / approx. 2 kg

Configuration Programming adapter PCA-300

Programming adapter to configuring VARES-3000 Main Clock PTC-240D (if Main Clock PTC-240D is in use without the PSS-224C).

Description

By means of the NC-111 Ambient Noise Controller, the ratio of the desired signal (speech or background music) to unwanted extraneous signal (unwanted noise) can be considerably improved, e.g. in airports, railway stations, hotels, etc.

Please consider the following features:

- The device is supplied with the ND-011 Ambient Noise Detector, which is equipped with an XLR- or jack socket for connection of an electret or dynamic sense microphone.
- An adjustable reference level is used to set a lower limiter to the output level. A level that is below the reference level is not accepted.
- Filter performance (-width) is adjustable.

- The LED chain (-9 dB to +18 dB) on the front panel indicates the output level. There is also a clipping LED.
- The device includes an adjustable measuring band-pass filter with a range of 30 Hz to 15 kHz and a bypass switch for disabling the NC-111.
- The noise detector has a phantom power switching option and can be connected by means of an AF cable with a maximum length of 500 m.

★

+ INPUT-SECTION

- Top-quality mixer with 6 mono input channels, which can be supplied as MIC over XLR sockets or as LINE over 6.3 mm jack sockets. Channels 5/6 & 7/8 may also be supplied as stereo input channels, each over two 6.3 mm jack sockets. Channels 9/10 & 11/12 can be operated both mono (L) and stereo (L/R) over 6.3 mm jack sockets.
- The mono channels 1-4 have amplification pre-controls for MIC “Gain” and for LINE “Trim” as well as a 3-band CH-EQ and a low-cut switch (75 Hz). Channels 5/6 & 7/8 feature a pad switch (-20 dB) and a 3-band CH-EQ. Channels 9/10 & 11/12 are equipped with a 3-band CH-EQ. There are panorama controls for mono and balance controls for stereo.
- Pre-listening of all channels is possible over an adjustable headphone output as well as the “Solo function” of the CH. The mixer also features a pre-fader and a post-fader AUX way as well as allocation selector switches for Main L/R per channel and SUB 1/2 for the alternative total output.
- Phantom power is centrally switchable for all MIC inputs (+48 V DC).

+ MASTER-SECTION

- Two stereo output sockets (XLR balanced and 6.3mm jack unbalanced) for main output over stereo fader (L+R) with LED meter as well as two alternative output sockets (6.3mm jack unbalanced) over SUB-1/2-fader.
- 2 RCA input sockets with input control and 2 RCA output sockets for 2-track IN/OUT per L/R. 2 unbalanced AUX sends and 2 adjustable AUX returns are available. The AUX returns can be switched on to the monitor way.

+ HIGHLIGHTS

- A switchable digital effects board allows adding 16 high-grade effects with an adjustable DSP master to the sum and with a switch to the monitor way also. This DSP is switchable ON/OFF by a foot switch. A mono out jack socket with level control makes another pre-amplified signal output possible.
- The mixer FMX-1202 is designed to be tabletop unit as well as for integration into 19” racks or flight-cases. The 19” mounting angles „RMK-12” (8 RU) are optionally available.

Technical data	FMX-1202
Input sensitivity	MIC -55dBu (mono) 1,3 kohms (balanced)
	LINE -35dBu (mono) -20dBu (stereo)
	all other inputs >10 kohms
Output sensitivity	Tape output 1,0 kohms
	FX-returns or Aux: 10 kohms
	all other outputs <100 ohms
Signal-to-noise ratio	better than 90dB
Crosstalk	better than 85dB
Frequency range	20Hz – 60kHz +0 / -1,5dB
Channel equalizer	Highs: 12kHz shelving ±15dB
	Mids: 3,0kHz peaking ±12dB
	Lows: 80Hz shelving ±15dB
	Low Cut: 18dB/Okt.@ 75Hz
Phantom power	+48V DC
Power supply	220V – 240V/AC, 50–60 Hz
Input power	22 W
Dimensions (WxHxD)	305 x 354 x 72mm (without edges and little feet)
Weight	4,7 kg

Model designations

+ INPUT-SECTION

- Top-quality mixer with 10 mono input channels, which can be supplied as MIC over XLR sockets or as LINE over 6.3 mm jack sockets. Channels 9/10 & 11/12 may also be supplied as stereo input channels, each over two 6.3 mm jack sockets. Channels 13/14 & 15/16 can be operated both mono (L) and stereo (L/R) over 6.3 mm jack sockets.
- The mono channels 1-8 have amplification pre-controls for MIC „Gain“ and for LINE „Trim“ as well as a 4-band CH-EQ and a low cut switch (75 Hz). CH 9/10 & 11/12 feature a pad switch (-20 dB) and a 3-band CH-EQ. CH 13/14 & 15/16 are equipped with a 3-band CH-EQ. There are panorama controls for mono and balance controls for stereo.
- Pre-listening of all channels is possible over an adjustable headphone output as well as the “Solo function” of the CH. The mixer also features a pre-fader and a post-fader AUX way as well as allocation selector switches for Main L/R per channel and additionally SUB 1/2 for the alternative total output.
- CH insert for channel 1 and 2 PRE-fader/PRE-EQ allows feeding in external signals (e.g. compr./lim./gate).
- Phantom power is centrally switchable for all MIC inputs (+48 V DC).

+ MASTER-SECTION

- Two stereo output sockets for main output can be supplied by a stereo master fader (L+R) with LED meter display. Two alternative output sockets (6.3 mm jack unbalanced) are fed over separately adjustable SUB-1- and SUB-2-faders.
- 2 RCA input sockets with level input controls and two RCA output sockets for 2-track IN/OUT per L/R. 2 unbalanced AUX sends and 2 adjustable AUX returns are available. The AUX returns can be switched on to the monitor way.

+ HIGHLIGHTS

- A switchable digital effects board allows adding 16 high-grade effects with an adjustable DSP master to the sum and with a switch to the monitor way also. An additional mono out jack socket with a level control enables another pre-amplified signal output.
- FMX-1602 is designed to be tabletop unit or for integration into 19" racks. The 19" mounting angles „RMK-16“ (8 RU) are optionally available.

19" Rack-Mounting-Kit, 8 RU	RMK-16

+ INPUT-SECTION

- Professional power-mixer with nine mono LINE inputs (CH 8/9 & CH 10/11 also adaptable as stereo) over 6.3 mm jack socket and nine mono MIC inputs over XLR socket, which can be transmitted to monitor out, record out and master out (L/R or bridge L+R).
- 2 stereo inputs (TAPE in as RCA socket and AUX in 6.3 mm as jack socket) with combined volume control can be transmitted to the master section. Another combined control makes it possible to additionally put these two signals on the monitor way.
- All inputs are equipped with input level, PAN, effect (DSP), monitor as well as highs, mids, and lows controls.
- PAD switches (-10 dB) for CH 1-7 in order to damp the input signal.
- Phantom power for all MIC inputs (+48 V DC) centrally switchable.

+ AMPLIFIER-SECTION

- Apportionment of the 3 integrated amplifiers: 2 x 300 W @ 4 ohms for stereo operation, each with two 6.3 mm jack output sockets L+R connected in parallel, or 1 x 600 W @ 4 ohms for mono operation over a 6.3 mm jack output socket L+R (bridged). Additionally, one power amplifier with 300 W @ 4 ohms is available for monitor operation with two 6.3 mm jack socket outputs connected in parallel.

+ EFFECT-SECTION

- Effects processor with adjustable effect values such as Reverb-Time (0-10ms), Delay-Time (0-1000ms), Delay-Feedback (0-100%) and Delay/Reverb balance control. The effects can be added to the monitor way and separately to the master out (L/R and bridged L+R). The effects may be externally switched ON/OFF via the foot switch jack socket. Effect-send AUX for external effects devices.

+ MASTER-SECTION

- The mixer features three 7-band graphic equalizers, relating to stereo master L/R, mono master L+R (bridged) and monitor master, as well as monitor out and main L/R out.
- Furthermore, the mixer has master level controls with LED meter displays and a mode switch for selecting between mono L+R (bridged) and stereo L/R.
- Monitor-Out and Main L/R-Out.

+ INPUT-SECTION

- 6 mono input channels can be supplied as MIC over XLR sockets or as LINE over 6.3 mm jack sockets. CH 7/8 & 9/10 can be operated mono (L) and stereo (L/R). CH 11/12 & CH 13/14 used as stereo AUX returns or as LINE level CH.
- CH 1-6 have pre-amplifying controls for MIC "Gain" and for LINE "Trim". CH 7/8 & 9/10 have input level switches. CH 1-3 are equipped with low-cut switches and a 3-band channel-EQ with semi-parametric mids. CH 4-10 feature a 3-band CH-EQ. There are panorama controls for mono and balance controls for stereo CH (except for CH 11-14).
- Pre-listening to all CH and monitor sum, main L/R, mono out and AFL/PFL is possible with an adjustable headphone output. 2 pre-fader and one post-fader AUX ways per CH as well as CH-insert for CH 4-6 PRE-Fader/ PRE-EQ.
- Phantom power is centrally switchable for all MIC inputs.

+ AMP.-/ MASTER-SECTION

- The main amplifier output (L/R, each 300 W @ 4 ohms) has 2 speak-on output sockets or 2 jack sockets, connected in parallel, which can be adjusted by a stereo master fader (L+R) over a LED meter display and a graphic-EQ L/R. Amp-mode, either L+R monitor or L/R stereo, selectable.
- 2 RCA in-/output sockets with level control and solo switch serve for 2-track IN/OUT (L/R). A mono-fader with switchable LPF serves for subwoofer-out, main L/R and monitor pre-amp out for external power amplifiers.

+ EFFECT-SECTION

- A switchable 24-bit digital effects board enables to add 99 high-grade effects with a DSP master fader to the sum and with another control also to the monitor way. Easy to handle over digital display with up/down push-button.

+ HIGHLIGHTS

- Use of the internal power amplifier and the master EQ automatic switch-off of the mixer section over amp-input.
- The mixer PMX-614 is designed to be tabletop unit or for integration into 19" racks. The 19" mounting angles "RMK-14 P" (9 RU) are optionally available.

4 CHANNEL AMPLIFIER WITH DSP (DIGITAL)

RCS

QDA-428 A
2.800 W
4x 700 W

Description

The QDA-428A is a fully digital Class D high power amplifier with 4 separate and independent channels. It includes full audio DSP features such as matrix routers, 6 full parametric equalizers, 2 crossovers, delays and dynamics processor per channel.

All parameters of these modules as well as further inputs are set directly on the device via the 5-button navigation pad and 4 encoders with key function.

A graphics-compatible LCD display and 4 RGB LEDs form the output interface and also provide information about the current operating parameters of the device such as input and output levels as well as the status of the individual channels.

Factory and user-presets can be stored in the device. The QDA-428A has an SD card slot. A module slot for future extensions, such as connection to audio and control network has been integrated (RS-232 interface and NC signal contact).

There are 4 analogue or 2 digital inputs available, which can also be used in combination. Furthermore, link jacks are available for the respective input signal used or as „processed“ digital outputs.

Four neutrik speakon jacks are available on the output side (two of them are double-assigned for bi-amp mode).

AES / EBU as well as S / PDIF with 16 - 24 bit and 32 - 192 kHz are accepted as digital input signals. The device generates AES / EBU with 24 Bit and 48 kHz.

Another feature is the PFC supported audio optimized wide-range switching power supply (SMPS). Extensive protection circuits and digital monitoring functions round off the professional features of this device, whose broadband

applications range from monitor operation and system operation with passive PA components (in actively separated PA systems) to the realization of multi-channel systems in fixed installations.

Please consider the following features:

- The front LEDs indicates important signal and operating conditions.
- 4 integrated, fully digital power amplifiers with high efficiency (> 90%).
- Protection circuits per channel (adjustable GAIN, crossover, subsonic filter, 6 full parametric EQs, peak RMS limiter, compressor, phase (180 °), delays (0-1000 ms), mute functions, matrix router).

PRO-SOUND CLASS-D POWER AMPLIFIER

RCS

Class-D Power Amplifier · bridge operation possible

Description

These digital (Class D) 2-channel 19" power amplifiers (1 RU) are ideal for the use in professional acoustic sounding devices.

The devices are manufactured in state-of-the-art production processes using high quality components.

They have been designed for continuous operation. They are absolutely short circuit and open circuit proof and are equipped with all relevant protection devices.

Please consider the following features:

- The Led's on the front inform about important signal and operating conditions
- Special protection circuits against open circuit, short circuit, over temperature and a delay is granted.
- The digital technology achieves a very high level of efficiency in the power amplifier, which results in very little heat generation (longer service life of the components in the amplifier) and relatively low power consumption.
- Across the digital technology there is a very high efficiency of the amplifiers which achieves results in a very low heat development (natural life of the devices) and a relatively low power consumption.
- The amplifiers have protection circuitry against short circuit, overheating, power up delay, DC fault protection and a clip limiter to prevent overloading the speakers.

- The front panel of the amplifiers is designed that all important information's about the operating status are visually. These indicators are: power LED display, clip LED display, protect and signal LED.

★

- + Degree of efficiency of over 90%
- + Energy saving
- + Minimum space requirement (only 1 RU)
- + Low heat waste

EXAMPLE OF USE | Installation possibility of induction loops

up to 450 m²

In the rooms to be supplied a single-pole wire loop is laid.

In particular arrangements, such as Listener area in several blocks, blanking of certain areas, etc., it may come to other loop forms (double loop, single-eight-form, double-eight-form).

INDUCTION LOOP AMPLIFIERS up to 450 m²

up to 450m²

Description

The ISV-300A represents a loop amplifier as a professional solution for the construction of induction loops. The loop amplifier for audio transmission is widely used to provide hearing aids with inductive audio signals.

The ISV-300A Induction Loop Amplifier has been developed as a high-quality LOOP amplifier for middle inductive loop sizes.

The system is characterized by particularly easy installation, customer-oriented operation and easy use of the device for optimal performance.

Induction loop amplifiers are very often used in churches, cinemas, theatres, outlets, bank counters, interpreting systems or DRIVE-IN / DRIVE-THROUGH, so that hearing aid users under heavy acoustic operations (background noise, reverberation, etc.) by the inductive coupling of hearing aids, the useful signal (Audio transmission) can hear much better without disturbing noises.

By transmitting an audio signal through the induction loop, an acceptable signal-to-noise ratio is achieved.

A purely acoustic, direct sound transmission (between loud-speaker and hearing aid) through reverberation and background noises considerably worsens the perception of the useful signal by the hearing device wearer.

Please consider the following features:

- Depending on the loop design, the coverage area is up to 450 m².
- Equalization by 2-point LF / HF equalizer.
- "MLC" control for frequency error correction.
- All controls are recessed and provide protection against incorrect operation.
- Equipped with protection circuit for short circuit, overheating, no load, overload and overload.

- Loop detector for automatic measurement and power matching to loop impedance.
- Equalization by 2-point LF / HF equalizer.
- „MLC“ control for frequency error correction.
- All controls are recessed and provide protection against incorrect operation.
- Equipped with protection circuit at short circuit, Overheating, Idle, and Overload.

★

Model designation

Automatic Induction Loop Amplifier..... ISV-500 A
For loop surfaces up to 1.000 square meters; 1 RU

Description

The device allows the construction of an induction loop double-loop system by phase shifting.

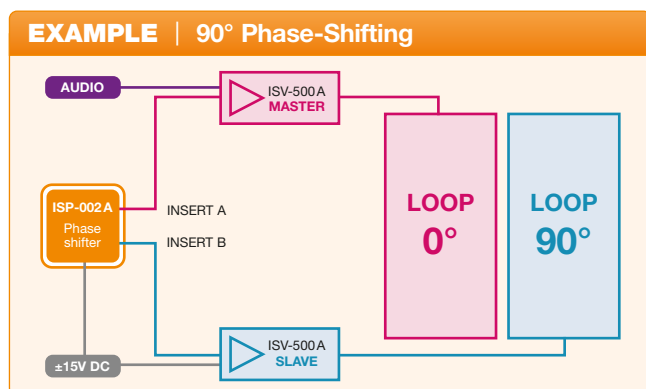

Due to the phase modulation, the audio signal is shifted by 90° phases and forwarded to the second loop amplifier of the ISV series, or to the second induction loop. The first audio loop amplifier operates without phase shift at 0° .

Such double-loop systems are recommended for large areas and with large induction field influence by metal objects in the concrete. These are used, for example, in large churches, exhibition halls, railway stations, schools, gyms, etc.

Please consider the following features:

- Compatibility according to EN 60118-4
- By laying a double-loop system with phase shift, constant field strength is achieved.
- Advantage of the double-loop system is the up to 4-fold lower loss of the audio loop (low power -large area).

★

Model designation

Phase shifter, for double-loop system **ISP-002 A**

POSSIBILITIES

WHAT CAN BE CONFIGURED AND CONTROLLED VIA REMOTE ACCESS?

- + Change of chime times
- + Calibration of speakerlines
- + Button programming of the microphone stations
- + Change or assign alarmtexts or other messages
- + Read out status / error messages from the system controller and emergency power management (maintenance work)
- + Define zones for background music
- + Activate or deactivate line monitoring
- + and much more

SAMPLE CALCULATION*

SAVINGS

SAMPLE CALCULATION				
 ON-SITE SERVICE		VS	 REMOTE ACCESS	
Arrival/Departure (6 hours)	450,00 €		Arrival/Departure (not applicable)	0,00 €
Kilometers flat rate (560km)	308,00 €		Kilometers flat rate (not applicable)	0,00 €
Working time (1 hour) Hourly billing mode: 85,00 €	85,00 €		Working time (4x 15min*) Billing mode every 15 minutes 34,00 €	136,00 €
Total service costs:	843,00 €		Total service costs:	136,00 €

*This calculation example compares the upcoming costs of a on-site service with the costs for a service via remote access to an RCS system. A service assignment with a journey of approx. 280 km (one way) was set as an example here.

DIAGNOSTICS AND REMOTE ASSISTANCE

REMOTE CONFIGURATION AND DATA EXCHANGE OF RCS SYSTEMS

RCS

- + Robust industrial PC
- + Emergency power supplied by the PA system
- + optionally with WLAN and LTE module

Description

With the service and diagnosis PC **SPC-200A**, the status of the PA system can be read out quickly, easily and without long journeys by remote access and changes can be made to the configuration.

A wired network connection (10/100/1000 MBit) with internet access is required for communication. If this is not possible, the system can be optionally expanded with a WLAN or LTE module.

Compared to the conventional assignments of our service employees, problems or settings on the PA system can be solved quickly and cost-effectively (see sample calculation) by RCS or other authorized specialists.

Please consider the following features:

- Protected remote access to the PA system from external.
- Possibility for quick remote diagnosis in the event of a fault or change in the system configuration..
- In combination with a new RCS installation system, it is already factory-wired and preconfigured.

★

What hardware is required on site?

- Ideally an network connection (10/100/1000 Mbit) with internet access
- **Option 1:** WLAN access in connection with the additional module WLAN option **SPW-100A**
- **Option 2:** Via mobile data connection (LTE) with the additional module **SPL-100A**. Please check network coverage in advance. The installer / operator provides the SIM card with the data volume

Technical data	SPC-200A
Operating system / CPU	Windows 10 / 64 Bit; Intel Atom® E38xx processor
Memory / Storage	4 GB RAM / 64 GB SSD
Interfaces	2x Ethernet (10/100/1000 Mbit/s), 2x miniPCle, 2x COM (RS-232/422/485), 2x SIM card holder, 1x USB 3.0, 3x USB 2.0, VGA, DVI, mSATA, Mic-in, Line-Out
Optional modules	WLAN- or LTE-Module
Power supply	9-48 V DC (max. 60 W)
Emergency power supply	via PA system
Mounting type	DIN rail; 35 mm
Dimensions (WxHxD) / Weight	150mm x 37mm x 105mm; 690 g

Note: The **SPC-200A** is only available for RCS systems. Our sales and planning team is at your side for further information and detailed questions.

Model designation

Service and Diagnostic PC **SPC-200A**
Industrial PC for remote configuration and Data exchange of RCS systems

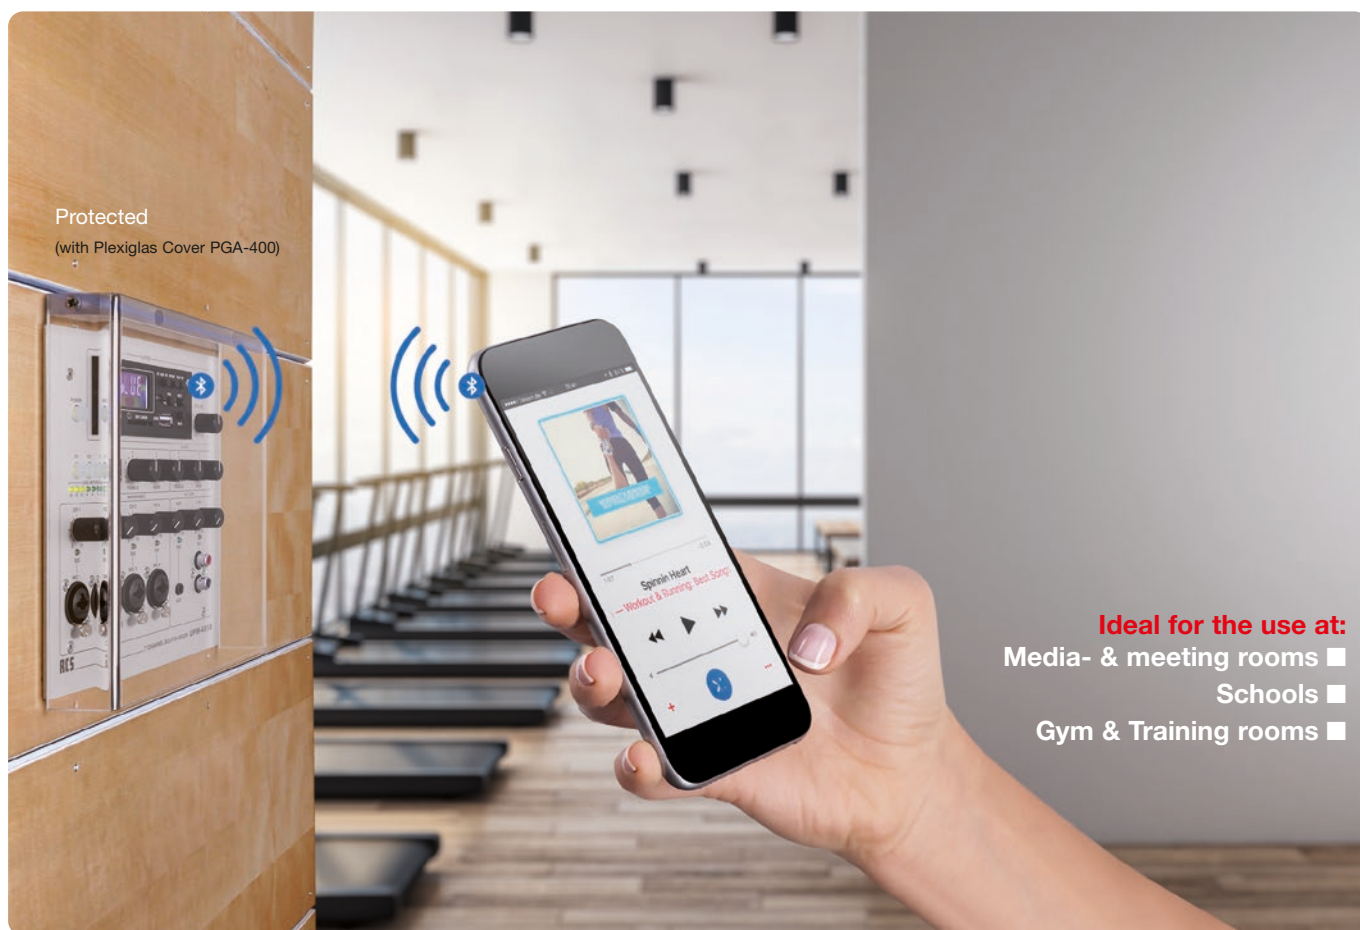

optional accessories:

LTE option, Module for Service- and Diagnostic PC **SPL-100A**

WLAN option, Module for Service- and Diagnostic PC **SPW-100A**

Front view

- 1 ON / OFF switch with ready indication and floating contact
- 2 LED level indicator of the sum signal
- 3 function keys (F1 to F3, latching) with LED display and potential-free contacts
- 4 input level controls for microphone inputs 1 to 4 with signal display LED
- 5 XLR / combo microphone inputs 1 to 4
- 6 treble and bass controls for microphone signals 1-4
- 7 iPod® (AUX) input on 3.5mm jack
- 8 input level controls for LINE
- 9 input level controls for iPod® / AUX
- 10 RCA LINE input
- 11 treble and bass controls for the LINE and iPod® / AUX signal
- 12 compartment for optional player module with BT / SD card / USB port
- 13 Volume control for the optional player module

7-CHANNEL OPERATOR CONTROL PANEL

RCS

optional with:

Description

The new 7-channel control panel, specially designed for professional applications, with the ability to feed up to 4 microphones, a stereo sound recording device and an AUX / iPod® input.

A high-quality sound is created by the separation of the signal paths. This feature creates the ability to control the mic and line inputs separately in the treble and bass. The signal display LED assigned to each channel is used to monitor the incoming signal.

The UPM-431B has a symmetrical output ex works. It is possible for the 4 microphone inputs via jumper to activate a phantom power.

The modulation of the sum signal is displayed in 3 dB increments via an 8-digit VU meter.

Optional accessories

The BT player module has a USB port and an SD card compartment. For audio transmission via BT from smartphone. The SD card player can play audio files from a corresponding SD card (in the following formats: FLAC, WAV, APE, MP3, MP2, WMA, etc.).

USB/SD-Card/BT-Player-Module **UB-100 A**
incl. remote control

In connection with the Plexiglas-cover **PGA-400**, this operating control panel can be applied e.g. in schools or sports halls, as it has a impact resistance structure.

Plexiglas Cover, ball-throwing proof **PGA-400**
Dimensions (WxHxD): 200 x 182 x 35 mm

The UPM-421 can optionally be used as flush-mount **APG-400** as well as surface-mount housing **UPG-400**.

Flush-Mount Housing **UPG-400**
Dimensions (WxHxD): 159 x 159 x 76 mm

Surface-Mount Housing **APG-400**
Dimensions (WxHxD): 205 x 205 x 85 mm

Please consider the following features:

- 7 channels for 4x microphone, sound carrier, AUX and iPod®
- Separate signal ways for Mic and Line with their own height and depth control
- Per volume assigned volume knob with signal indicator LED
- Calibrated, 8-digit total VU meter
- Phantom power 18 V for all mic inputs
- Output levels adjustable from -9dBu to +3dBu
- Three function keys with status LED
- Power button with additional control function
- MIC 1 can jumper a voice-over function for the AUX / Line inputs
- Audio on and off delay

★

Technical data	UPM-431 B
Power supply	24V DC
Power supply	100 mA (Standby)
Output level (sym.)	-9dBu bis +3dBu
Output impedance (sym.)	100 ohms
Sensitivity MIC	-50dB
Sensitivity LINE	-16dB
Sensitivity AUX	-16dB
Tone control (H/T)	±12dB
Frequency range	50-20.000 Hz
Dimensions (WxHxD), Weight	182 x 182 x 55 mm; 195 g

Model designation

7-Channel Control Panel **UPM-431 B**

Front view

- 1 LINE 1 input on RCA, e.g. for stereo sound recording device
- 2 Ready for operation display
- 3 XLR microphone input on XLR jack
- 4 LINE 2 input on jack 3.5 mm, e.g. for iPod® / AUX or similar
- 5 input level control for LINE 2 with signal display LED
- 6 input level control for LINE 1 with signal display LED
- 7 input level control for the microphone input with signal display LED
- 8 Optional function key module with NO contact (only available for UPM-300H)

3-CHANNEL FLUSH MOUNTING MIXER

RCS

Description

The new development 3-channel built in Mixer for 1x Mic/line and 2 line Stereo Inputs. One XLR connector for mic/line signal with or without Phantompower (18VDC), one stereo-cinch and one Stereo jack 3,5 mm (for example iPod®, etc.).

For each input you have a separate regulator. The individual channels assigned signal LED indicator is used to monitor the incoming signal. The UPM-300 is factory-fitted with a balanced output.

The mixer is suitable for installation in a space-saving 3-fold flush-mounting box or 3-fold wall mounted housing.

Please consider the following features:

- 3 Channels for 1x Microphone, LINE 1 (Cinch-Socket) and Line 2 (3,5 mm phone jack)
- Each Input has an assigned Volume-Controller with Signal-LED
- Phantom power 18 V for MIC-Input
- Output level is reversible from 0dB to +6dB
- Ball-throwing proof with optional Plexiglas Cover PGA-300
- Connection by easy to install, screwing free connection clamp
- Optionally available keypad with two buttons, with changer contact (UPM-002B). Can be used as push button or switch via the jumper.

★

Optional accessories

In connection with the Plexiglas-Cover **PGA-300**, this mixer can be applied e.g. in schools, sport halls, as it has an impact resistance structure (flush-mounting version only)

Plexiglas-Cover, ballwurfsicher **PGA-300**

The UPM-300 H/V can be optionally used for both surface mount **APG-300** and flush mount **UPG-300** (also suitable for cavity assembly).

Flush-Mount and Cavity Housing, 3-fold **UPG-300**
Dimensions (WxHxD): 215 x 74 x 44 mm

Surface-Mount Housing, 3-fold **APG-300**
Dimensions (WxHxD): 223 x 81 x 52 mm

Technical data	UPM-300 H / V
Power supply	24V DC (external)
Power supply	40 mA
Output level (sym.)	0dB or +6dB
Output impedance (sym.)	600 ohms
Sensitivity Micro	-63dB
Sensitivity LINE 1	-20dB
Sensitivity LINE 2	-20dB
Frequency range	30 - 20.000 Hz
Dimensions (WxHxD), Weight	223 x 80 x 37 mm; 187 g

Model designation

3-Channel Flush-Mount Mixer, (horizontal) **UPM-300 H**

3-Channel Flush-Mount Mixer, (vertical) **UPM-300 V**

Button Module 2-fold, (for UPM-300 H/V) **UPM-002 S**

Description

The new 4-channel control panel specially developed for small central units, with the ability to feed up to 2 microphones, 2 stereo signals and a USB connection for mp3-files.

Versatile system-extension for the Vario-Line intercom bus makes it easy to remotely control the output lines of the Vario-Line amplifiers.

The modulation of the sum signal is displayed via a 5-digit VU meter.

Please consider the following features:

- 4 channels for 2x microphone and 2x AUX; each channel is individually adjustable
- USB port for mp3 files; controllable with play / break and title jump - buttons
- Control of the output lines of the VLZ amplifier series. The control of the 6 lines is possible individually or with All-Call button
- Simultaneous operation on intercom bus possible via CAT cable
- Call stations can take precedence over VPM- 6000 U via Priority / Slave switch
- Voltage supply also possible externally via 24V input
- Volume control assigned to each input
- 5-digit total VU meter

- Phantom power 18V can be activated with jumper for all MIC inputs
- Input impedance of the MIC / LINE inputs switchable
- Key switch for switching the device on / off

★

Technical data	VPM-6000
Power supply	via VARIO-LINE amplifier or 24V DC
Power consumption	3 W
Output level	+8dB
Sensitivity MIC	-50dB (2,45mV), 2kohms, bal.
Sensitivity LINE	0dB (775mV), 2kohms, bal.
Sensitivity AUX	-10dB(245mV), 15kohms, unbal.
Frequency range	20 - 20.000 Hz
Signal to Noise Ratio	MIC: better than 50dB; LINE: better than 80dB
Harmonic distortion (THD) bei 1kHz	better than 0,3%
Dimensions (WxHxD)	220 x 158,5 x 61 mm
Hole cut-out/installation depth (WxHxD)	200 x 125 x 59 mm
Weight	1,2 kg

Model designations

4-Channel Operator Control Panel, (for VLZ-Series), with 4 inputs and USB-Interface **VPM-6000 U**
Digital Receiver Module, for VPM-6000 U **RR-60**
Flush-Mounting Housing, for VPM-6000 U, Dimensions (WxHxD): 220 x 195 x 70 mm **UPG-600**

Description

The RVC-201 A remote volume control is a 2-channel, voltage-regulation volume control for gain control. It is designed for use in professional PA or public address systems. The signal level for each channel can be remotely controlled separately by DC voltage.

The preamplifier can be used to connect LINE-level stereo and mono devices (such as CD players, mixers, tape recorders, etc.). It is designed specifically for DIN rail mounting, but it can also be mounted freely.

The distance of the potentiometers to this module can be up to 100 meters. If a stereo signal is used, then a jumper can be set internally and the Stereo signal can be controlled with a potentiometer, e.g. with the RVC-001 A or the RVC-002 A.

Please consider the following features:

- Before switching on, the control voltages should be set to 4 V (0 ohms) to avoid strong switch-on noises.
- The device complies with all required directives of the EU and is therefore marked with „CE“.

- The RVC-201 A is suitable for indoor use. Protect it against dripping and splashing water, high humidity and heat (admissible ambient temperature range 0°C to +40°C)
- The two potentiometers RVC-001 A or RVC-002 A are required for use.

★

The controllers RVC-001 A and RVC-002 A are supplied in the switch program.

Technical data	RVC-201 A
Inputs	2x LINE, mono: 1 V / 30 kOhm, symmetrical 2x control input: 0 - 4 V / 10 kOhm, linear
Outputs	2x LINE mono: 1 V/ 600 ohms, symmetrical
Frequency range	20 - 20.000 Hz
Harmonic distortion	0,1 %
Signal to noise ratio	70 dB, unweighted
Power supply	24 V DC (external)
Operating temperature	0 - 40 °C
Dimensions (WxHxD)	85 x 103 x 30 mm
Weight	0,5 kg

Alarming via cell phone

- Integration into VAS
- Authorized up to 256 telephone numbers
- No landline connection required
- Easy installation and setup

Description

The amok alarm system AAS-100A is activated by an incoming call from an authorized cell phone, for example owned by a teacher at a school. In a standard setup the incoming call triggers a pre-recorded, automatic announcement via the paging system. Additional functions, for example an automatic call to an emergency response centre, can be implemented as well.

Please consider the following features:

- **Operation:** AAS-100A checks the phone number of an incoming call and triggers an alarm if this number is authorized
- **Configuration:** AAS-100A is set up using the bundled PC software (requires Microsoft Windows OS and a USB connection to the host PC)

The emergency call in three steps

- 1st The teacher chooses the emergency number stored in his cell phone.
- 2nd The AAS shall examine the caller's number and at authorization it switch a contact.
- 3rd The switched contact activated, for example, a speaker system that separates an automatic announcement.

- **Protection against mains power failure:** if the 230 V AC mains power fails the facility manager is automatically informed with an SMS to his cell phone; AAS-100A remains functional for two days after mains power is lost
- **Upgrades:** by using multiple AAS-100A different types of alarms can be distinguished between; for this mode of operation different phone numbers are saved in the authorized cell phones, with each number assigned to one type of alarm (for example fire alarm, amok alarm and silent alarm)
- **Outbound alarm:** external institutions (for example police or fire department) can be called automatically when an alarm is triggered by an authorized cell phone

★

Technical data	AAS-200 A
Housing	for wallmounting
Programming	Phone call, SMS, PC
Alarm inputs	4 (conventional)
Relay outputs	4 (conventional)
Operating temperature	±0 up to +40 °C
Protection class	IP20 (compliant to DIN EN 60529)
Power supply	12V DC/ 1 A
Telephone connection	GSM (CTR 31, CTR 32)
Dimensions (WxHxD)	96x63x28 mm
Weight	approx.200 g

Model designation

Amok Alarm System, GSM/GPS

AAS-200 A

Description

The telephone interface **TIF-404C** can be operated in two operating modes. In the telephone interface mode for announcements in 1 to 4 different areas and collective announcements, as well as in the control mode for the control of up to 4 contacts, like e.g. for external signal storage. There are either 4 permanent contacts or 4 pulse contacts available, which can be controlled by dealing via the telephone keypad.

The devices can be operated on any analogue extension port. The interface can be adapted to any telephone network by means of adjustable occupancy tone detection. The AF signal outputs are provided with level control. All switching outputs have potential-free changeover contacts.

- + to speak into the PA system
- + to trigger switching operations
- + to trigger amok alarm
- + as upgrade to existing PA system

The housing can be mounted on conventional DIN rail and installed by means of Phoenix terminal. Due to its small dimensions, this module is also the ideal extension for any existing PA system.

Please consider the following features:

- **Telephone Interface Mode:** In this mode, K1-K4 can be controlled in up to 4 zones via floating contacts. Another potential-free contact signals the start of the announcement.
- **State RAM mode:** In this mode, an external signal memory can be controlled. Depending on the input, a permanent contact or a pulse contact (1 second) is activated.
- **Busy tone mode:** In this mode, the frequency and level of the busy tone can be adjusted.
- **Serial output:** All contact changes are output parallel to the switching contact as a serial signal. The output level corresponds to the TTL signal.
- Ideal for combination with the digital language storage module DMM-618B, with VARES series systems.
- Furthermore, this module is also used with the small central units of the „VARIO-LINE“ series.

★

Technical data	TIF-404 C
Power supply	24V
Current consumption	70mA

Description

The DVM-210A is a Class-D technology digital stereo amplifier module with an output power of 20W per channel.

The four-stage rotary switch behind the transparent front flap allows the setting of four different gains to adapt to existing audio input level.

The multi-color LED shows the operational readiness and stays green. In case of overload, the LED lights up red in the signal beat.

Please consider the following features:

- Easy installation and installation costs.
- Placement in subdivisions possible, the module width is only 1 HP (horizontal pitch).

- Low heat generation by digital circuitry.
- Protective circuit against short circuit, reverse polarity and overheating.

★

Technical data	DVM-210 A
Output power at 24V	2x 20 W on 4 ohms / 2x 10 W on 8 ohms
Frequency range -3dB	40 – 30.000 Hz
Audio inputs	unbalanced
Protection circuits	thermal, short circuit, reverse polarity
Rotary switch (4 gain stages)	20dB, 26dB, 32dB, 36dB
Input level	0dB, -6dB, -12dB, -16dB
input resistance	60kohms, 30kohms, 15kohms, 10kohms
Output impedance	4 ohms
Operating voltage	24 V DC
Current consumption at 24V/max.	45mA/2A
Connections	screw terminals up to 2,5 mm ²
Weight	65 g
Dimensions (WxHxD)/horiz. pitch	89,7 x 62,2 x 17,8 mm; 1 HP

Model designation

Digital Audio Amplifier Module **DVM-210 A**
2x20W, suitable for DIN rail mounting, 1 HP

Description

The **manual call points HMA-001 G/Y/O** (green, yellow, or orange) are used to control amok alarming systems. With the label "Amok alarm" (replaceable), they point directly to the warning system.

The **manual call points HMA-001 B** (blue) is used to control house alarming systems. With the label "House alarm" (replaceable), it points directly to the warning system.

The **manual call point HMA-001 W** (white) has been specially designed for use in NGRS systems.

The **manual call points** are housed in a sturdy aluminium housing, which proves to be advantageous in comparison with plastic housings thanks to its environmental resistance even with years of use. It is unbreakable, dimensionally stable and does not discolour in sunlight.

Please consider the following features:

- The swivelling door with an opening angle of 180 ° has a removable glass panel.
- If the detector is released, the integrated locking lug prevents the closing of the door.
- All MCP are ideally suited for combination with the ASS-100A, DMM-618A and with any system of the VARES-series.

NUR-302DW/DD
NUR-402DW/DD
(incl. wall bracket)

Description

The analogue slave clocks can be operated indoor in combination with the system clock PTC-240D from the RCS VARES-3000 system. With the classic design, this slave clocks can be integrated harmoniously into each architecture.

The one-sided clock variant can be hung up with a single-point fixing to the wall.

In the double-sided version two one-sided clocks with a wall bracket are assembled together..

Please consider the following features:

- One-sided for mounting on the wall with a single-point attachment.
- Clockwork: 24V DC, 1/1 minute impulse.
- 24V DC pole changing minute impulse, 7.5 mA current consumption.

- Single-sided clocks for wall or ceiling mounting is composed of a clock with back wall and a wall bracket
- Watch dial models with Arabic numerals. Other design e.g. without numbers or with red second hand is available on request.
- Additional slave clocks in square, ball-punched or metal versions are available on request.

Description

The xenon beacons are signal generators for optical alarms. The BL series is characterized by a very high flash energy and a robust design, which enables use even under rough environmental conditions.

This optical signaling device was developed for a variety of applications and blends harmoniously into the respective architecture. The power consumption of the beacons depends on the operating voltage.

The standard base is included with the beacons. Cable entry is from behind or from the side.

To increase the degree of protection to IP65, the BLS-100 base is optionally available in white or red. These deep base versions also allow lateral cable entry via cable glands.

For applications with a mains voltage of 230V AC, a base with an integrated voltage converter is available as an option.

Please note: The signaling area of the beacons depends on the ambient lighting and mounting height.

Please consider the following features:

- Large voltage range 9 - 60 V DC
- Starting current limitation
- Automatic synchronization
- High efficiency
- Constant power across the entire voltage range
- Screwable base
- IP65 base in white or red and the matching protective cage are available separately and on request.

★

Technical data	BL-024 SERIES
Voltage range	9-60V DC
Power consumption	88 mA @ 24V
Luminous intensity	10 Cd
Flash rate	1 Hz ± 20%

VLM-200A | for all-call

Microphone station (condenser) for announcements in zones selected on the amplifier. With activated dip-switches (rear panel) it is possible to add a all call with priority and pre-chime. Connection via RJ45 socket. With busy indicator.

Microphone Station **VLM-200A**
for VLA-602A

Technical data	VLA-602A
Output power	900/600 W (Program/RMS)
Frequency resp., noise level	55 Hz – 16.000 Hz (better than -3 dB), MIC better than 70 dB, LINE better than 80 dB
THD at 1 kHz	better than 1 %
Inputs MIC – AUX/LINE	All Mic/Line-Inputs are electronically balanced. Input 1+2 with priority. All Mic/Line-Inputs feature combo-females (Jack 6.3 mm, XLR). Mic: -50dB (2,45 mV), Line: -10dB (245 mV) PAGING: -10dBu(245mV) 5kOhm, symm.
Outputs, speakers	100V, low impedance 4 ohms
Additional input or output	REC-OUT: 0dBu (775 mV)
Chime and Siren	2- or 4-tone chime (switchable); siren with up-down or continuous tone (adjustable on the frontside)
Power Supply AC/DC	AC 230 V (50/60 Hz), DC 24V
Dimensions (WxHxD) / Weight	483 x 133 x 379 mm; 21 kg

Description

This amplifier and intercom system „VARIO-LINE“ makes it possible to switch up to **20 speaker zones** as well as „all-call“ from the control panel.

The amplifier can be used with any microphone, but has been optimized for the use with the „VARIO-LINE“ microphone stations VLM-200A, VLM-220A (digital remote control of the speaker zones and the digital announcement module DMT-10).

Please consider the following features:

- The inputs 1 - 3 are to be switched to MIC or LINE and have priority over the inputs 4 + 5. The respective volume as well as height and depth are regulated separately.
- All MIC inputs have gain control and switchable phantom power. The priority switches define the priority of the inputs.
- The MIC inputs are balanced on combo sockets. MIC-1 is additional on RJ-45 socket. The LINE inputs are via RCA sockets.
- For cascading with other amplifiers, the AMP-IN and PRE-OUT jacks can be used.
- The amplifier operates on mains power (230 V) or 24 V DC (emergency power supply).
- Integrated is an electronic 4-tone chime (internally with jumper to 2-tone chime convertible), an electronic siren (swelling, continuous tone) and a PAGING input (LINE-IN with priority)
- Other external connections are e.g. the remote activation „POWER REMOTE“ or the alarm contact „E/M Message Control“ (in conjunction with text module).
- In addition to the 100 V outputs, the amplifier has a low-impedance 4 Ohm output.

Special functions

As an optionally available special feature, we can provide you with an additional gong module that gives you 5 different types of gongs incl. DIN Siren provides. (Article No. : VL-Service 08)

- This mixer amplifier offers the option of inserting a sound carrier module into the empty space provided for this purpose.

- 6 AMP-IN and PRE-OUT, Jack 6.3mm, unbal. 0dB
- 7 Speaker outputs 10 zones; switchable for 100V, 70V, 50V, 25V, 12.5V
- 8 100 V output and 4 ohm output, unswitched
- 9 PAGING-IN (priority entry)
- 10 Switching input for text announcing of DMT-10 and all-call
- 11 Connection for DC power supply DC 24V and Power Remote
- 12 AC power connection cable
- 13 Slot for antenna connection or switching inputs for the text module
- 14 Connection for Microphone Station (VLM-210A) to RJ45
- 15 Volume controls REMOTE for announcement of VLM-210A

VLM-200A | for all-call

Microphone station (condenser) for announcements in zones selected on the amplifier. With activated dip-switches (rear panel) it is possible to add a all call with priority and pre-chime. Connection via RJ45 socket. With busy indicator.

Microphone Station **VLM-200A**
for VLA-601A

Technical data	VLA-601 A
Output power	900/600 W (Program/RMS)
Frequency resp., noise level	55 Hz – 16.000 Hz (better than -3 dB), MIC better than 70 dB, LINE better than 80 dB
THD at 1 kHz	better than 1 %
Inputs MIC – AUX/LINE	All Mic/Line-Inputs are electronically balanced. Input 1+2 with priority. All Mic/Line-Inputs feature combo-females (Jack 6.3 mm, XLR). Mic: -50dB (2,45 mV), Line: -10dB (245 mV) PAGING: -10dBu(245mV) 5kOhm, symm.
Outputs, speakers	100V, low impedance 4 ohms
Additional input or output	REC-OUT: 0dBu (775 mV) 3 kohms unsw.
Chime and Siren	2- or 4-tone chime (switchable); siren with up-down or continuous tone (adjustable on the frontside)
Power Supply AC/DC	AC 230 V (50/60 Hz), DC 24V
Dimensions (WxHxD); Weight	483x133x379 mm; 21 kg

VLM-210A

- + 10 SPEAKER LINES**
- + UP TO 32 TALKS**
- + ADDITIONAL POWER AMPLIFIER FOR**

Supplied with
19" mounting brackets.

Description

The amplifier and intercom system „VARIO-LINE“ makes it possible to switch up to **10 speaker lines** from the control panel.

Each microphone can be connected to the amplifier, but in particular the „VARIO-LINE“ stations VLM-200A („all-call“) and VLM-210A (digital remote control of the speaker zones and the digital text module DMT-10).

Please consider the following features:

- The inputs 1 - 3 are to be switched to MIC or LINE and have priority over the inputs 4 + 5. The respective volume as well as height and depth are regulated separately.
- All MIC inputs are equipped with gain control and switchable phantom power. The priority switches determine the priority among each other.
- The MIC inputs are symm. on combo sockets, MIC 1 additionally with RJ-45 socket. The LINE inputs are equipped with RCA jacks
- For cascading with other amplifiers, the AMP-IN and PRE-OUT jacks can be used.
- The amplifier is operated with mains current (230V) or 24V DC voltage.
- Other external connections are e.g. the remote activation „POWER REMOTE“ or the alarm contact „E / M Message Control“ (in conjunction with text module).
- The amplifier has a low impedance 4 ohm output in addition to the 100V outputs.
- As a special feature, this amplifier has an additional output stage for selective announcements in one or max. 2 zones. When these zones are selected via the VLM-210A intercom station, simultaneous announcement in these zones is possible, while the background music in the remaining zones is not interrupted.

Special functions

As an optionally available special feature, we can provide you with an additional gong module that gives you 5 different types of gongs incl. DIN Siren provides. (Article No. : VL-Service 08)

- Integrated is an electronic 4-tone gong (internally with jumper to 2-tone gong convertible), an electronic siren (swelling, continuous tone) and a PAGING input (LINE-IN with priority)).
- This mixer amplifier offers the option of inserting a sound carrier module into the empty space provided for this purpose. The following modules are available:

FM/AM Tuner module
18x FM + 6x AM memory stations

TP-10 USB

DAB Internet Radio
DAB/DAB+, FM-RDS, USB

TP-200 IR

CD/MP3-Player module
Repeat, Random, etc

CDP-10 USB

CD/MP3-Tuner module
RDS-Tuner and MP3-/CD-Player

CDR-10 USB

Digital text module
with timer functions, microSD-Card

DMT-10

BT-Player module
USB-Port/SD-Card, Remote

BM-10 U

For a detailed description of the modules see pages 126 and 127.

Model designation

10-ZONES „VARIO-LINE“, 600W, 3 RU VLA-601 A

Microphone Station, for all-call VLM-200 A

Microphone Station, digital for 10 Zones VLM-210 A

Front view

- 1 Inputs for MIC / LINE control
- 2 Power switch

VLM -206

- + 6 SPEAKER LINES
- + MONITORING OF THE BASIC FUNCTIONS
- + UP TO 600W (RMS) POWER

Supplied with
19" mounting brackets.

Description

The „VARIO-LINE“ amplifier and microphone system permits the switching of up to **6 speaker zones** and of the all-call function as well as the setting of the desired volume for each zone from the central unit.

The amplifier can be used with any microphone, but has been optimized for the use with the „VARIO-LINE“ microphone stations VLM-100A, VLM-106 (digital remote control of the speaker zones) and VLM-206 (digital remote control of the speaker zones and the DMT-10 digital announcement module).

Please consider the following features:

- Inputs 1 - 3 can be switched to MIC or LINE. The respective volume as well as treble and bass are controlled separately and have always priority over LINE-IN.
- All MIC inputs have gain control and switchable phantom power. The priority switches define the priority of the inputs.
- The MIC inputs are balanced combo sockets. MIC-1 is additional on RJ-45 socket for VLM-100A. The LINE inputs are RCA sockets.
- Optionally available are the Module FD-21 monitor the amplifier. Further available the Module FM-30 with fan/fuse fault relay contacts and the FS-40 Frequency-Shift-Module.
- The AMP-IN and PRE-OUT sockets allow cascading of further amplifiers. The 5 output circuits may also be used for this purpose after they have been modified (VLZ-SERVICE 01).
- The unit is also equipped with an electronic 2- or 4-tone chime (switchable), an electronic siren (high-low, switchable to alarm sound) and a telephone paging input (Line-in with priority); all these signals can be controlled separately on the front panel.

- The amplifier operates on mains power (230 V) or 24 V DC (emergency power supply).
- A special feature of all models is the option for integrating a sound source module. An empty compartment is provided for the installation of an additional module. The following modules are available:

FM/AM Tuner module
18x FM + 6x AM memory stations

TP-10 USB

DAB Internet Radio
DAB/DAB+, FM-RDS, USB

TP-200 IR

CD/MP3-Player module
Repeat, Random, etc

CDP-10 USB

CD/MP3-Tuner module
RDS-Tuner and MP3-/CD-Player

CDR-10 USB

Digital text module
with timer functions, microSD-Card

DMT-10

BT-Player module
USB-Port/SD-Card, Remote

BM-10 U

For a detailed description of the modules see pages 126 and 127.

Model designations

- 6-ZONES „VARIO-LINE“, 240 W, (3 RU).....VLZ-6240 A**
- 6-ZONES „VARIO-LINE“, 480 W, (3 RU).....VLZ-6480 A**
- 6-ZONES „VARIO-LINE“, 600 W, (3 RU).....VLZ-6600 A**

VLM-100 A | for all-call

Microphone desk (condenser) with pre-announcement chime, priority switching via RJ-45 connection.

Microphone desk **VLM-100A**

VLM-106 | for 6 zones

Digital microphone desk to select and control 6 speaker zones. Pre-announcement chime and all-call.

Microphone desk **VLM-106**

Microphone desk **VLM-106WO**
as VLM-106 but without interface RR-60

Function extension module **VLE-004**
to remote special functions (via separate line)

VLM-206 | for 6 zones & text module

Digital microphone desk to select and control 6 separately speaker zones, further for remote control of the digital text module DMT-10.

Microphone desk **VLM-206**

Microphone desk **VLM-206WO**
as VLM-206 but without interface RR-60

OPTIONAL | Pilot Tone Module

FD-21

Description

This pilot tone module serves to monitor the performance of amplifiers.

The generator produces a 20 kHz test signal. Apart from the test of the power amplifier functioning, the speaker line is checked for short circuit faults.

Pilot Tone Module **FD-21**
Extension-Module for the VLZ-series

OPTIONAL | Error Monitoring Module

FM-30

Description

The Error Monitoring-Module has three potential-free relay contacts (NO/ NC).

Fault monitoring is operating if AC- or DC-fuse is blown and if AC- or DC-power is off or disconnected. Also the module reacts when fan fault or fan is disconnected.

Error Monitoring Module **FM-30**
Extension-Module for the VLZ-series

OPTIONAL | Frequency Shift Module

FS-40

Description

Module for the reduction of feedback noise (takes only effect at Input 1 of VLZ).

The possible frequency shifts of 7 - 10 Hz make sense, even if background music in addition to microphone announcements take place.

Frequency Shift Module **FS-40**
Extension-Module for the VLZ-series

SPECIAL FUNCTIONS „VARIO-LINE“ 6-ZONES

OPTIONAL

RCS

Example 1: Paging system with 6 Speaker lines, total power 2520 W

VL-SERVICE 01

Up to 5 speaker zones are adapted to LINE level for cascading with further amplifiers:

Example 2: Paging system with recess chime and alarm siren

VL-SERVICE 03

Additional input for the external control of chime, siren and All-Call:

VLM-100 A | for all-call

Microphone desk (condenser) with pre-announcement chime, priority switching via RJ-45 connection.

Microphone desk **VLM-100A**

VLM-106 | for 5 zones

Digital microphone desk to select and control 5 speaker zones. Pre-announcement chime and all-call.

Microphone desk **VLM-105**

Microphone desk **VLM-105WO**
as VLM-105 but without interface RR-10

Function extension module **VLE-004**
to remote special functions (via separate line)

VLM-205 | for 5 zones & text module

Digital microphone desk to select and control 5 separately speaker zones, further for remote control of the digital text module DMT-10.

Microphone desk **VLM-205**

Microphone desk **VLM-205WO**
as VLM-205 but without interface RR-10

Technical data	VLA-120 C – VLA-240 C
Output power	VLA-120: 120 W RMS (max. 180 W) – VLA-240 C: 240 W RMS (max. 360 W)
Frequency resp., noise level	50 Hz – 18.000 Hz (better than -3 dB), MIC better than 70 dB, LINE better than 80 dB
THD	better than 1% at 1 kHz
Inputs	MIC/LINE 1–3: -50 dBu (2.45 mV), 5 kohms, balanced MIC/LINE 1–3: -10 dBu (245 mV), 5 kohms, balanced LINE 4 – 5: -10 dBu (245 mV), 15 kohms, unbalanced TEL-PAGING: -10 dBu (245 mV), 10 kohms, electr. balanced REMOTE-MIC: -50 dBu (2.45 mV), 5 kohms, unbalanced AMP-IN: 0 dBu (775 mV), 10 kohms, unbalanced
Outputs	REC-OUT: 0 dBu (775 mV), 3 kohms, unbalanced PRE-OUT: 0 dBu (775 mV), 100 ohms, unbalanced
Outputs, speakers	100V or 70 V and 4 ohms low-impedance Controller steps: 100 V – 70 V – 50 V – 25 V – 12.5 V – 8.9 V on 5 zones and all-call
Two- or Fourtone chime	volume can be set on the front panel, chime type switchable by jumper
Siren	continuous tone or high-low, can be set on front panel
Telephone paging	can be set on the front panel (night ringer also adjustable)
Phantom power	on all MIC inputs (combo socket for XLR and 6.3 mm jack)
Treble and bass controls	on the front panel, separately for inputs 1 – 5 and audio source module
Gain	on the front panel for inputs 1 – 3
Priority	can be set separately for MIC 1 – 3 on the rear
Power supply	230 V mains (50/60 Hz) and 24 V DC (emergency power supply)
Power consumption	VLA-120 C: 350 W – VLA-240 C: 630 W VLA-120 C: 1/8-0,8 A – rated-1.8 A – VLA-240 C: 1/8-1.6 A – rated-3,2A

Ball-bearing fan ensures long life and quiet running

Description

The „VARIO-LINE“ amplifier and microphone system permits the switching of up to 5 speaker zones and of the all-call function as well as the setting of the desired volume for each zone from the central unit.

The amplifier can be used with any microphone, but has been optimized for the use with the „VARIO-LINE“ microphone stations VLM-100A, VLM-105 (digital remote control of the speaker zones) and VLM-205 (digital remote control of the speaker zones and the DMT-10 digital announcement module).

Please consider the following features:

- Inputs 1 – 3 can be switched to MIC or LINE. The respective volume as well as treble and bass are controlled separately and always have priority over LINE-IN.
- All MIC inputs have gain control and switchable phantom power. The priority switches define the priority of the inputs.
- The MIC inputs are balanced on combo sockets. MIC-1 is additional on RJ-45 socket. The LINE inputs are via RCA sockets.
- The amplifier is equipped with an automatic DC fan as well as with all required protective devices such as overload and overheating protection as well as soft start.
- The AMP-IN and PRE-OUT sockets allow cascading of further amplifiers. The 5 output circuits may also be used for this purpose after they have been modified (0 dB control).
- The amplifier operates on mains power (230 V) or 24 V DC (emergency power supply).
- The unit is also equipped with an electronic 2-tone chime (4-tone chime optional), an electronic siren (high-low, switchable to alarm sound) and a telephone paging system (Line-in with priority); all these signals can be controlled separately on the front panel of the unit.

Special functions

Special functions such as ground fault detection, remote of chime, siren, deactivation of priority, all-call paging and 0-dB setting element for the power extension can be integrated in the unit. Please consider the options, shown in extracts on the next pages.

- A special feature of all the models of this series is the option for integrating a sound source module into the unit. An empty compartment is provided for the installation of an additional module. The following modules are available:

FM/AM Tuner module
18x FM + 6x AM memory stations

TP-10 USB

DAB Internet Radio
DAB/DAB+, FM-RDS, USB

TP-200 IR

CD/MP3-Player module
Repeat, Random, etc

CDP-10 USB

CD/MP3-Tuner module
RDS-Tuner and MP3-/CD-Player

CDR-10 USB

Digital text module
with timer functions, microSD-Card

DMT-10

BT-Player module
USB-Port/SD-Card, Remote

BM-10 U

For a detailed description of the modules see pages 126 and 127.

Model designations

Small central unit „VARIO-LINE“, 120 W, 3 RU .. **VLA-120 C**

Small central unit „VARIO-LINE“, 240 W, 3 RU .. **VLA-240 C**

EXAMPLE 1: Paging system with 5 speaker lines, total power 1680 W

VL-SERVICE 01

Up to 4 speaker zones are adapted to LINE level for cascading with further amplifiers:

EXAMPLE 2: Medical practice with chime and siren

VL-SERVICE 03

Additional input for the external control of chime, siren and All-Call:

VL-SERVICE 01

0-dB adjustment for power extension

The desired numbers of speaker zones are adapted to LINE level for cascading with further amplifiers.

- Power extension up to 3000 W
- Separate control- and switchable lines remain
- 0-dB adjustment internal (please indicate desired number with the order)

0-dB adjustment, for power extension... **VL-SERVICE 01**

VL-SERVICE 03

Input for the external control of 4-tone chime, siren and All-Call

Input for the external control of 4-tone chime, siren and All-Call:

- For release of chime and siren via potential free contacts, e.g. by BMZ, clock timer, remote microphone etc.
- Simultaneous release of All-Call
- 2-tone chime as pre-chime of remote mic

Input for the external control... **VL-SERVICE 03**

VL-SERVICE 05

Potential free contacts

Input for potential free contacts for external control of the 5 or 6 speaker lines:

- Easy activation of desired speaker lines, e.g. via substation, key pad or clock timer
- 7-pin DIN-socket as interface

Potential free contacts... **VL-SERVICE 05**

VL-SERVICE 06

Ground leak monitoring

Module installation for ground leak monitoring:

- Monitoring of the 100V-outputs for ground leak
- Alarm tone at fault

Ground leak monitoring... **VL-SERVICE 06**

VL-SERVICE 07

Microphone station extension

Attachment of the key modules in the VLE-004 Microphone stations VLM-105/106/205/206. The extension provides the following additional features:

- Covered alarm switch
- Two LEDs to indicate an error
- Three keys for special functions

Microphone station extension... **VL-SERVICE 07**

VL-SERVICE 08

MP3-/Micro-SD Card module for external start of audio files

Installation and wiring of the digital MP3/Micro-SD card module as well as a 10-pin plug-clamp connector on the rear of the device.

- LF output wired directly to the preamplifier unit
- At gong or siren sequence, all-call are activated via status output
- Power supply through mixing amplifier

MP3-/Micro-SD Card module... **VL-SERVICE 08**

3 power classes
120-240-480 W

Description

The PA center of the „CPA-5000 Series“ is available in 3 power classes: **120 W**, **240 W** and **480 W**. The units include 5 100V and 70 V speaker circuits, which can be switched and controlled separately.

They feature chime, siren, phantom power and priority switching and are well-suited for professional audio applications.

- Please consider the following features:
- The PA center operates on mains power (230 V) or 24 V DC.
- The speaker outputs are available as 100V and 70 V as well as 8 ohms (low-impedance) outputs.
- All models have 5 speaker circuits which can be controlled separately on the front panel.
- All microphone inputs are balanced and have switchable phantom power. Inputs 2, 3 and 4 can be switched to line.
- Mic input 1 has an adjustable electronic priority control.
- The AMP-IN and PRE-OUT sockets on the rear allow cascading of further amplifiers and insertion of other units such as equalizers.
- The two-tone chime and the siren can be remote-controlled and can be adjusted on the rear.
- Input 1 has voice-activated priority override, inputs 2-3-4 have contact-activated priority over AUX 5-6-7.
- The special MS-050P microphone station is connected through a 4-pin screw-type connector (a maximum of 3 microphone stations can be connected). It has a function to enable pre-announcement chime and priority.

- A special feature of all the models of this series is the option for integrating a sound source module into the unit. An empty compartment is provided for the installation of an additional module. The following modules are available:

FM/AM Tuner module
18x FM + 6x AM memory stations
TP-10 USB

DAB Internet Radio
DAB/DAB+, FM-RDS, USB
TP-200 IR

CD/MP3-Player module
Repeat, Random, etc
CDP-10 USB

CD/MP3-Tuner module
RDS-Tuner and MP3-/CD-Player
CDR-10 USB

Digital text module
with timer functions, microSD-Card
DMT-10

BT-Player module
USB-Port/SD-Card, Remote
BM-10 U

For a detailed description of the modules see pages 126 and 127.

- 4 Fuse holder (AC and DC))
- 5 Optional: Antenna input (only with modules TP-10USB and CDR-10USB)
- 6 Contact for the release of text 6 at DMT-10
- 7 Remote control for two-tone chime
- 8 LINE-input with priority e.g. for telephone center
- 9 Inputs for MIC / LINE 2 - 3 - 4
- 10 Priority control for MIC 1
- 11 LINE selector switch for MIC / LINE
- 12 PHONO / LINE input
- 13 PHONO / LINE selector switch
- 14 Pre-amplifier OUT, amplifier IN
- 15 Phantom power switch for CH2/CH3
- 16 Speaker terminal strip

Drawing shows model CPA-3120C

Technical data	CPA-3060 C	CPA-3120 C
Output power	60 W RMS (max. 90 W)	120 W RMS (max. 180 W)
Frequency resp., noise level	50 Hz – 18.000 Hz (± 3 dB), noise level MIC better than 60 dB, AUX/LINE better than 70 dB	
THD at 1 kHz	better than 1 %	+better than 1 %
MIC - AUX/LINE inputs	All MIC and AUX / LINE inputs as well as CH-5 (LINE/PHONO) are electronically balanced, MIC-1 (CH-1) with priority override (adjustable) With all models, inputs 2, 3 and 4 (CH 2, 3 and 4) are balanced on 3-pin XLR-sockets, the other inputs are on jack (6.3 mm) or RCA	
Outputs, speakers	100V – 167 ohms, 70 V – 83 ohms, 4 – 8 ohms	100V – 83 ohms, 70 V – 41 ohms, 4 – 8 ohms
Additional input or output	Serves as pre-amplifier output or amplifier input.	
Two-tone chime and siren	Two-tone chime can be remote-controlled, siren optional with high-low or continuous tone.	
Power supply AC/DC	AC 230 V (50/60 Hz), DC 24 V	AC 230 V (50/60 Hz), DC 24 V
Dimensions (WxHxD) / Weight	420 x 110 x 320 mm, 10,0 kg	420 x 110 x 320 mm, 12,0 kg

Description

The „CPA-3000 PA-center Series“ are available in 2 power classes: 60 W (RMS) and 120 W (RMS). They are short circuit and open circuit proof. They have been designed to the latest standards and meet the requirements of professional audio applications. All the devices of this series are equipped with an electronic two-tone chime (switchable to four-tone), a siren (continuous tone or high-low tone), a speaker control panel (4 zones).

Please consider the following features:

- All the devices of this series operate both on 230 V mains power and 24 V DC.
- The speaker outputs are available as 100V and 70 V as well as 4 and 8 ohms low-impedance outputs.
- MIC input 1 has an adjustable electronic microphone priority override.
- All microphone inputs are electronically balanced. Inputs 2, 3 and 4 can be switched to LINE. The input 2 and 3 can be switched to phantom power.
- The unit also includes the following special features: CD input on RCA sockets, PHONO input on RCA sockets, pre-amplifier input and output, remote control for four-tone chime, input for central telephone system.
- To obtain the desired power, further 19" power amplifiers can be cascaded.
- With all models, the two-tone chime can be remote-controlled, e.g. by means of the MS-202 microphone station.

- A special feature of all the models of this series is the option for integrating a sound source module into the unit. An empty compartment is provided for the installation of an additional module. The following modules are available:

FM/AM Tuner module
18x FM + 6x AM memory stations

TP-10 USB

DAB Internet Radio
DAB/DAB+, FM-RDS, USB

TP-200 IR

CD/MP3-Player module
Repeat, Random, etc

CDP-10 USB

CD/MP3-Tuner module

Power consumption	125 W	210 W
Power supply	230 V mains current and 12 V DC	230 V mains current and 12 V DC
Dimensions WxHxD /Weight	375 x 88 x 260 mm; approx. 5,4 kg	375 x 88 x 260 mm; approx. 6,6 kg

Description

In spite of its small dimensions, this versatile desktop amplifier offers the option for installing additional audio modules in the empty compartment provided.

The device is available in 2 power classes: 30W and 60W (sine wave). It is perfectly suited for professional audio applications. The unit operates on mains power (230 V) or DC (12 V).

Please consider the following features:

- The amplifiers have 2 balanced MIC inputs with **switchable priority**, 2 balanced AUX inputs, of which one can be switched from AUX to MIC, and 1 unbalanced TAPE input.
- To compensate for the effects of noise, the inputs are electronically balanced, which ensures high immunity to interference.
- All inputs have a separate volume control. Additionally there are treble and bass controls (equalizer).
- The speaker outputs are available as 100V and 70 V outputs or alternatively as 4 – 16 ohms low-impedance outputs.
- As the amplifier can operate both on 230 V AC and 12 V DC, a car battery may also be used for power supply.
- LEDs indicate the signal level. Operation in the clipping range of +3 dB (red diode) should be avoided.
- Via the TEL RING terminal a telephone buzzer can be activated. The TEL IN terminal provides the option for outputting announcements from the central telephone system via the amplifier.

- There is a blank field for the installation of an antenna terminal or the control output of the DMT-10 digital announcement module.
- A special feature of all the models of this series is the option for integrating the following sound source modules into the empty slot:

FM/AM Tuner module
18x FM + 6x AM memory stations

TP-10 USB

Digital text module
with timer functions, microSD-Card

DMT-10

BT-Player module
USB-Port/SD-Card, Remote

BM-10 U

FM/AM-Tuner module

Technical data	TP-10 USB
Wavebands	FM 87,5 to 108,0 MHz and AM 522 to 1.620 kHz
Antenna inputs	75 ohms unbalanced; with coax-jack and antenna
Sensitivity	FM: 2 µV; AM: 4,5 µV
S/N	FM: 60 dB; AM: 45 dB
Dimensions (WxHxD) / Weight	194 x 40 x 84 mm; approx. 0,25 kg

FM/AM-Tuner module **TP-10 USB**

Description

The TP-10USB FM/AM tuner module has been especially developed for installation in the compartment provided for this purpose on the PA center. The modules can be installed very easily. The required fasteners and connectors as well as detailed installation instructions are supplied with.

- The modules can also be installed in any other device (amplifier, central audio unit, etc...).
- The tuner has 24 pre-sets, 3 x 6 for FM and 1 x 6 for AM.
- Tuning and programming is performed with the respective buttons.
- USB Interface

**DAB
RDS
USB**

DAB/DAB+/FM-RDS Internet-Radio Module

Technical data	TP-200 IR
Power supply	17V DC, via PA Center
Display	LCD graphic display, menu guidance and time display
Empfangsbereiche	FM 87,5 to 108,0 MHz and DAB 174,928 to 239,200 MHz
Ausgangsaudiopegel	0 dBm / 600 ohms
Audio formats	MP3, AAC, WMA, WAV, FLAC
Dimensions (WxHxD) / weight	194 x 40 x 113 mm; ca. 0,36 kg

DAB Internet-Radio Module **TP-200 IR**

Description

The DAB / DAB + Internet radio module is suitable for installation in the corresponding empty field of the small central units or module carriers. It offers access to the digital radio world and podcasts via the Internet.

- The device has an RJ-45 network socket (LAN) and a separate FM antenna connection.
- Graphic display showing the playing time, track numbers, functions, audio levels and player modes.
- Play various audio files from a USB stick or an external USB hard disk.
- Automatic time update and Alarm function.

MP3/CD player and FM/AM tuner module

Technical data	CDR-10 USB
Tuner section	Analogous to the TP-10RDS FM/AM tuner module described on the next page
CD/MP3-player section	Analogous to the CDP-10USB CD player module described above
Dimensions (WxHxD)	194 x 40 x 200 mm
Weight	approx. 1,0 kg

CD/MP3 player and tuner module (RDS) **CDR-10 USB**

Description

The CDR-10USB MP3/CD player and FM/AM tuner module has been especially developed for installation in the compartment provided for this purpose on the PA centers. However, it is also possible to install the module in other devices such as amplifiers, central audio units, etc. The respective installation instructions are supplied with the device.

- The features of the CD player section are identical with the CDP-10USB module above.
- The features of the tuner section are the same as the ones of the TP-10USB module described above.
- USB interface

Description

The digital text module DMT-10 is suitable for installation in the empty compartment of the small central unit or the Modular Pre-Amplifier ME-2A.

- 6 memory texts can be selected via buttons, external contacts or desk mic.
- Timer function for 26 texts / signals with weekly function
- Connecting a radio receiver DCF-77 to control the internal quartz clock (summer and winter time).
- Connecting an alarm contact for a priority signal with priority function.
- Recording capability on the front side LINE signal or dynamic microphone.
- Uploading the texts as mp3 on a microSD-card.

Digital-Text module with Timer

Technical data	DMT-10
Power supply	15V – 18V DC, via PA center
Display	LCD display, two lines; Menu navigation and time display
Inputs	MIC: -50dB/600Ohms, LINE: -10dB/10kOhms unbal.
Outputs	Audio Out: -10dB unbal.; Headphone jack 3,5mm; jack: 24mW >- 64 ohms
Media	microSD-Card, internal memory
Storage capacity	M1 – M6 each 2176 kB (360 sec.); VOICE1 – VOICE20 each 128 kB (23 sec.)
Dimensions (WxHxD) / weight	194 x 40 x 85 mm; 0,27 kg

Digital text module with timer **DMT-10**

Radio receiver DCF-time, 3-wire version **DMF-077**

Description

The BT player module BM-10U is suitable for installation in the corresponding empty field of the small central units or module carriers.

- Direct audio transmission via BT from PC, tablet or smartphone.
- Play various audio files from an SD card, a USB stick or an external USB hard disk.
- All functions can also be controlled via the supplied remote control.
- Graphic display showing the playing time, track numbers, functions, audio levels and player modes.

For audio transmission from smartphone, tablet or PC, incl. Remote control

Technical data	BM-10U
Power supply	12V DC, via PA Center
Display	LCD graphic display, menu guidance and time display
Inputs	SD-Card, USB-Port (Stick, HD or PC), BT (Audio)
Power consumption	40 mA
Dimensions (WxHxD)	194 x 40 x 53 mm
Weight	0,2 kg

BT-Player module, USB-Port/SD-Card, Remote **BM-10U**

Description

The CDP-10USB CD/mp3 player module has been especially developed for installation in the compartment provided for this purpose on the PA centers. However, it is possible to install the module in any other device such as amplifiers, central audio units, etc.

The respective installation instructions are supplied with the device.

- The device features „repeat play“ and „random play“ functions.
- Other functions included are „intro scan play“ and „cue review“.
- Playing mp3 CD's.
- USB interface

USB CD/mp3 player module

Technical data	CDP-10USB
S/N – THD	Better than 85 dB – less than 0,03 % (1 kHz)
Frequency range	10 Hz – 20.000 Hz (± 1 dB)
Digital-Filter	8x over sampling
Loading Time	6 sec.
Dimensions (WxHxD) / Weight	194 x 40 x 200 mm; approx. 1,0 kg

CD/MP3 Player module **CDP-10USB**

Supplied with
19" mounting brackets.

Description

The ME-2A modular preamplifier serves to transmit sound programmes by means of the modules that are shown on the right. For this purpose, the ME-2A can be extended by 1 or 2 modules. The individual modules can be installed very easily. All required connections are provided inside the unit or on the rear.

Please consider the following features:

- The ME-2A has 2 separate balanced XLR outputs (module 1 and 2) and 1 master output. The volume is controlled by means of a volume control of the respective module.
- The device operates on 230 V AC mains power and 24 V DC (emergency power supply).
- The device can be used both as a 19" unit and as a desk-top unit. The 19" mounting brackets are already fitted, but can be easily removed.

Technical data	ME-2 A
Output impedance	max. 0.775 V (0 dBu), 600 ohms, unbalanced on XLR
Frequency range	less than -0,5 dB) 20 – 20.000 Hz
Signal-to-noise ratio	better than 68 dB
Power supply	AC 230 V (50 – 60 Hz), DC 24 V
Power consumption	approx. 25 W
Dimensions (WxHxD)	483 x 88 x 350, 2 RU
Weight	approx. 5,0 kg

Model designations

Modular pre-amplifier, (2 RU) ME-2A

- The modular preamplifier can be connected directly to any mixer amplifier, but also to any power amplifier.
- The following sound source modules are available for installation in the ME-2 A modular pre-amplifier.

19"-MODULAR PRE-AMPLIFIER (for up to 2 modules)

Description

The module carrier ME-1A offers in just one rack unit, the possibility to mount up to two audio modules, to save space. The modules of the AM-Series can be combined as necessary depending on.

On the back there is a L/R output per module and an additional output priority. The signal from the built-in module 2 (on the right side) has output priority. Ends the playback of this module, it automatically switched to module 1.

A 75 ohm antenna input and the 24V DC input complete the multi-purpose device.

Please consider the following features:

- The ME-1 A has a priority output.

The device operates on 230 V AC mains power and 24 V DC (emergency power supply).

- Suitable for 19" mounting or table top.

Description

The DVD-player DVD-200X will be delivered in a 2 RU-cabinet and therefore it is perfectly suitable for 19" 100V power amplifier.

This device plays all of the well-established audio formats such as MP3, WMA, CD-R or CD-RW. Furthermore this DVD-player supports all standard operating functions, which can be found in premium CD/MP3-players. A serial remote control is included in the scope of delivery.

The multifunctional display provides continuous information via a progress-indicator, regarding the current replay status.

Please consider the following features:

- HDMI-, Cinch and USB 2.0 port
- Control panel on the front of the unit for control if the enclosed remote control is not at hand.
- Supported disc media: CD, CD-R / RW, DVD, DVD-R / RW, DVD + R / RW

- USB input on the front panel for playback of multimedia contents of a USB stick.
- Supported file formats: MPEG1, MPEG2, MPEG4, JPEG, VCD, MP3, WMA, Audio CD, DIVX, Xvid

★

Technical data	DVD-200 X

19"-DAB INTERNET RADIO / MULTI-TUNER

RCS

Description

For music lovers, and friends of the digital listening pleasure. Experience crystal-clear radio and the variety of more than 20,000 radio stations and podcasts 8,000. If LAN or WLAN is not available, the device includes at the same time a DAB tuner, which allows terrestrial digital radio.

In addition to the radio function, the device has a USB interface. This allows you to play audio files on a USB stick, MP3 player or an external hard drive. Supported formats are AAC/AAC +, MP3, WMA and WAV.

In the very clearly arranged multilingual menu, you can edit your channel list, take equalizer settings or set up your Internet access (if available).

Please consider the following features:

- Multi-tuner to receive Internet radio, FM radio with RDS, DAB and DAB +.
- Easy setup of Internet Radio stations through clear country, transmitter and genre selection.
- Headphone output.

- Front panel auxiliary input for supplying external signals.
- 19" design (1 RU) for installation in system control centers.

★

An infrared remote control with key operating functions is included.

Technical data	DNT-400 DAB
FM tuning range	87,5 – 108 MHz
Antenna input FM	75 Ohms, coaxial
DAB-Frequency range L-Band	1452,96 – 1490,62 MHz
DAB-Frequency range Band III	175,928 – 239,2 MHz

Audio frequency range	20 – 20.000 Hz
THD at 1kHz	0.3%
Signal-to-noise ratio	65dB
Dimensions (WxHxD)	483 x 44 x 150 mm (1 RU, 19")
Weight	2,8 kg

Model designation

19"-DAB Internet Radio Multi-Tuner, (1 RU) incl. Remote control DNT-400 DAB

Description

These volume control panels have been designed as 19" rackmount units. Using 6 100V-transformers, they provide central control for up to 6 speakers or speaker groups. Each control has 11 steps (10 control steps and 1 zero position). The first 7 steps provide an attenuation of 3dB each, and the last two steps provide an attenuation of 6dB each. Therefore, the maximum overall attenuation is -33dB.

Please consider the following features:

- Three models are available with 6 x 30 W, 6 x 60 W and 6 x 120 W.
- The individual controls with 100V-transformer are mounted on a stable 19" panel (extruded aluminium). The speaker volume control panels are suitable for installation in 19" racks.
- The speaker volume control panels are suitable for installation in 19" racks.
- Additionally, 6 priority override relays (24 V) are provided. They ensure that emergency announcements can be made, even if the respective control is in the zero position.
- The individual control knobs are robust and can be operated easily.

Schematic diagram

- Screw-type terminal strips facilitate wiring.
- The 100V matching transformers have an excellent efficiency and frequency ranges between 50 Hz in the bass range and 18000 Hz in the treble range.

5-FOLD 100 V LINE-OUTPUT-ATTENUATOR

Technical data	ATT-100
Frequency	15 –30.000 Hz
Input impedance	20 kohms
Output impedance	200 ohms
Dimensions (WxHxD)	119 x 65 x 60 mm
Weight	0,5 kg

Description

This ATT-100 is connected at the backside of a 100V PA centre (e.g. VLA-240C or VLZ-6600A). The device can be mounted directly to the rear of the PA centre.

The 100V-signal of the amplifier will be transferred via the ATT-100 into a LINE-signal. It will be possible to cascade the output lines 1 to 5.

- Please consider the following features:
- Conversion of 100V-signal into a LINE-signal at 5 lines.
 - Direct mounting to the backside of the PA centre.

Model designation

Line-Output-Attenuator, 5-fold for VLA- / VLZ-Series . **ATT-100**

EMERGENCY SWITCHOVER UNIT

Technical data	ESU-002A
Switching voltage (100V / AC relay)	Relay energized: min. 16,8V DC, max. 30V DC Relay dropped: min. 0V DC, 4,8V DC
Switching current	8 A AC per switching contact (mains relay)
Switching voltage	250V DC per switching contact (mains relay)
Switching capacity	500 W (100 V-Relais)
Wire cross section per clamp contact	0,08 mm²; 2,5 mm² (without ferrule); 0,25 mm²; 1,5 mm² (with ferrule)
Stripping length connection wires	5,6 mm
Dimensions (wxhxd)	85 x 85 x 50 mm

Description

The very compact one ESU-002A emergency switchover unit can handle two independent switching functions.

The switching of 100V speaker lines from by self-program receiving to priority receiving is possible. Simultaneously the shutdown of two separate 230V power supply is conducted if priority is received. The case is compliant to the protection standard IP 66.

- Priority relay module for 100V signals and 230V mains voltage.
 - Passing the 100V signal of the alarm system to the sublet amplifier equipment.
 - Make a connection of the loudspeaker in sublet areas in case of alarm.
 - Disconnection of the sublet amplifier equipment.
- ★

Model designation

Emergency Switchover Unit, (IP66)......**ESU-002A**

PICTOGRAM DESCRIPTION

Special lacquer in all RAL colors possible, Price on request.
(**SL-100**)

Speaker chassis and transformer moisture proof impregnated
(**FI-100**)

Suitable for outdoor installation

British Standard 5839 Part 8 (Fire Protection provision) available.
(**BS-5839**)

With Emergency Call relay
(**RY-024**)

Also available with 20-ohm speaker
(**IM-20**)

Equipped with a fire-proof steel-pot

Speaker is impact-proof designed

Impact-proof certified

Impact-proof certified optional
(**BW-200**)

Description

This loudspeaker is tested by a notified product certification authority and certified to EN 54-24:2008.

The ABT-W6 cabinet loudspeaker has a robust and attractively designed metal housing.

The speaker can be used for on wall mounting or in wall mounting. It is equipped with a high-quality broadband chassis and is particularly well suited for music and voice reproduction in 100 V loudspeaker systems. The modern and discreet design is judged by architects to be particularly positive.

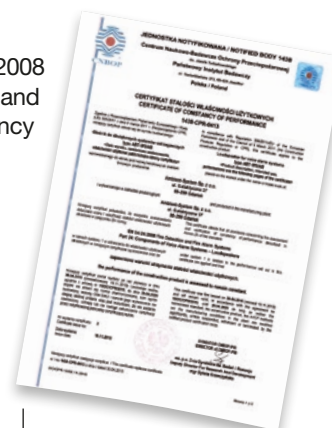

This loudspeaker series meets the requirements of **EN 54-24** and **British Standard BS 5839**.

Please consider the following features:

- Suitable for surface and flush mounting.
- Robust, powder-coated metal housing, which ensures the best drone and vibration-free.
- Broadband, high-performance speaker chassis with good speech and music intelligibility.

- Certified to EN 54-24: 2008 for voice alarm systems and electroacoustic emergency warning systems..

★

Back view

The speaker can be mounted horizontally or vertically.

When used as a built-in speaker, a ceiling cut-out of 235 x 155 ±3 mm is required. The minimum installation depth is 55 mm.

Description

This loudspeaker is tested by a notified product certification authority and certified to EN 54-24:2008.

This built-in loudspeaker made of plastic-coated metal has, like all our EN 54-24 loudspeakers, been specially developed and optimized for voice alarm systems. Equipped with a broadband speaker, it is ideal for voice announcements and background music with very good sound quality in buildings.

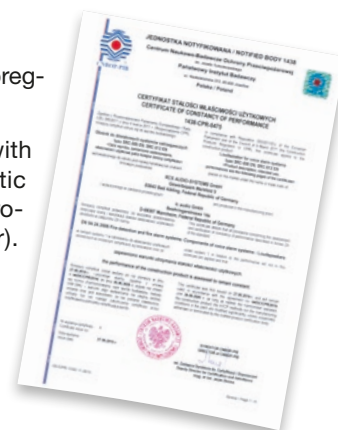

Regarding the rear plastic cover and the flat design, this speaker is suitable for installations with low installation depth.

Please consider the following features:

- 165 mm broadband speaker for best voice and music reproduction
- Fast and uncomplicated assembling with spring clamps and short tension distance
- The simple, modern mounting method adapts to all standard ceiling thicknesses of 3 - 45 mm.
- Temperature resistance of -10/+55° C

- Protection class IP21C
- Speaker with moisture impregnation.
- The speaker comes with an innovative anti-static PET plastic contact protection (plastic cover).

Description

This loudspeaker is tested by a notified product certification authority and certified to EN 54-24:2008.

In terms of safety and simplicity this loudspeaker sets new standards. It is equipped with the most modern and easiest mounting, a quick release closure.

The assembly / disassembly is carried out by tighten 4 screws which are accessible after lifting the perforated plate. The installation frame is made of high quality plastic parts; the grille is made of coated steel. The construction is theft proof.

Please consider the following features:

- The understated, modern design with a rim thickness of only 2mm is especially preferred by architects.
- Optimum sound for voice alarming and appropriate attention/alarm signals.
- Equipped with a dust cover as drip protection.
- The housing is made of impact, shock and fire resistant ABS plastic and as an option available on all RAL colors on request.

Installation case made of soaked chip-board for installation in ceilings or walls made of bricks, cement etc.
Dimensions: 233 (H) x 233 (W) x 100 (D) in mm.

Installation case for SC-106 EN-1 .. **EZ-120**

- We offer this loudspeaker also as moisture proof version. The technical data is the option "FI-100" speaker and transformer is especially impregnated.

Description

This loudspeaker is tested by a notified product certification authority and certified to EN 54-24:2008.

These cabinet speakers have been developed according to the latest knowledge in plastic technology. The acoustic issue took special attention. This gives them optimum sound for voice evacuation announcements and appropriate attention and alarm signals.

Please consider the following features:

- The plastic housing made of flame-retardant plastic to UL-94 ensures boom and swing release.
- Broadband high performance speaker chassis with an integrated high tone cone.
- The design of the soft line corpus is understated and modern. Especially architects judge him as positive.

- The fixing is theft save and can be mounted horizontally, vertically on wall or ceiling.

Description

This loudspeaker is tested by a notified product certification authority and certified to EN 54-24:2008.

The 6W speaker is equipped with a 165mm broadband speaker chassis and a 100V transformer with three power adjustments. The high-density, impact-resistant and low-resonance housing enables optimal sound.

The speaker is therefore ideal for use in voice alarm systems and the playback of attention and alarm signals.

Please consider the following features:

- The housing is made of coated, impact-resistant housing MDF wood and is absolutely design-related vibration and drone free.
- Broadband, high-performance speaker chassis with integrated tweeter cone.
- For added reliability, the integrated 2-pole ceramic terminal and thermal fuse, as well the moisture impregnation of the loudspeaker chassis.

- The loudspeaker is also protected against the risks of environmental influences with its high protection class IP 54.
- The proven spring snap on the back wall ensures fast wall mounting.
- A sturdy perforated steel grille cover ensures continuous stability.
- The loudspeaker is also compliant with **British Standard BS 5839, Part 8.**

Description

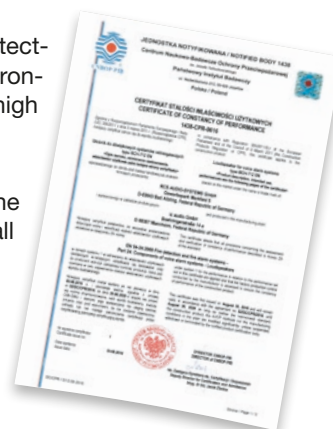

This loudspeaker is tested by a notified product certification authority and certified to EN 54-24:2008.

This professional cabinet speaker is suitable for voice alarm systems. It includes a 2-way bass reflex system from full-range woofer and a dome-tweeter. The housing is very acoustically and professionally designed

This speaker series fulfilled the requirements of **EN 54-24** and **British standard BS 5839**.

Please consider the following features:

- Due to the trapezoidal shape of the housing mounting in corners or angles is easily possible. Just as well the design is also suitable as monitor speaker.
- The swing and inclinable bracket is included in the delivery.
- On the rear of the unit there is the impedance selector which allows 4x 100 taps and 8 ohm position plus deactivation of the speaker.
- The fitted 100V-transformer avoids any loss of sound pressure and playback quality.

- Equipped with a ceramic terminal and a metallic cable cover complies with the requirements of BS speakers de 5839.

Description

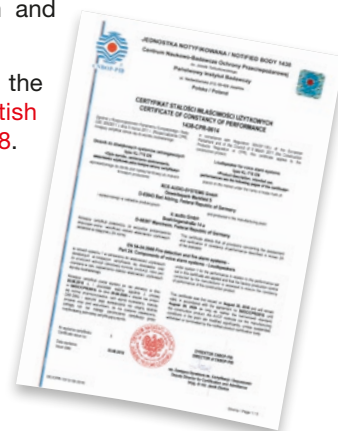

This loudspeaker is tested by a notified product certification authority and certified to EN 54-24:2008.

The compact 16 W strong ball speaker is equipped with a 130 mm broadband loudspeaker chassis and a 100 V transformer with three power adjustments. The impact-resistant, UV-resistant ABS plastic housing in RAL 9010 guarantees long-lasting stability.

Please consider the following features:

- The ball speaker are made of impact and scratch-resistant, white plastic and are particularly suitable for high ceilings where suspended speakers are necessary.
- Broadband, high-performance loudspeaker chassis with integrated tweeter cone.
- For added reliability, the integrated 2-pole ceramic terminal and thermal fuse, as well the moisture impregnation of the loudspeaker chassis.
- The loudspeaker is also secured against the risks of environmental influences with the high protection class IP 35.

- The connection is made via a 4-core, 4.5 m long cable. Quick and uncomplicated assembly using the fastening hook.
- Optimal sound for voice alarm announcements and corresponding attention and alarm signals.
- The speaker also has the conformity to the **British standard BS 5839, part 8.**

Description

This loudspeaker is tested by a notified product certification authority and certified to EN 54-24:2008.

This professional 2-way box from the Xorva E series is ideal for transmitting voice alarms and music. It includes a 2-way system with a 12" neodym bassmidrange driver and 1" neodym driver. Everything installed in an acoustically professionally designed housing made of birch wood and aluminum.

This loudspeaker meet the requirements of **EN 54-24**.

Please consider the following features:

- Predestined for use in voice alarm systems and in demanding, professional PA areas (e.g. for sports halls or school auditoriums).
- Stable construction and sophisticated sound of the highest quality – Made in Germany.

- The built-in high quality 100V ring-core transformer supports the particularly linear frequency response with almost no loss of sound or performance.
- There are two speaker sockets on the back of the device for connecting or looping through the audio signal.
- In particular, these speakers are for fixed installation (for example, for school gyms, meeting halls, etc.).
- Threaded nuts for rigging eyes.

Description

This alarming double direction speaker is tested by a notified product certification authority and certified to EN 54-24:2008.

This sound projector series fulfilled the requirements EN 54-24 and British standard BS 5839.

The loudspeaker is equipped with a two high-quality and very broadband twin cone speakers. The integrated 100V-transformer has the adjustments to 20 W – 10 W and 5 W.

Due to the excellent sound quality and dynamics, this sound projector is ideally suited for language reproduction as well as for a very good music performance.

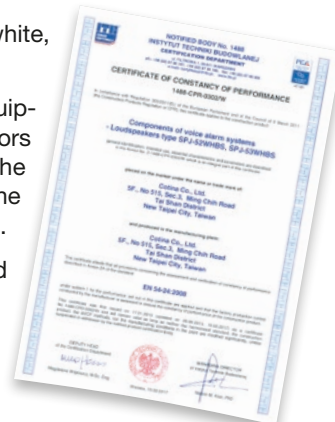

This speaker is ideal for use in corridors, halls and underground garages. It is weatherproof certified for outdoor (Type B).

Two cable inlets for in / out allow looping to the next speaker.

Please consider the following features:

- The loudspeaker is in all-metal version.
- The color of the cover is white, similar to RAL 9010.
- The form and interior equipment of the sound projectors is configured, so that the favored polar pattern of the sound radiation is ensured.
- With ceramic terminals and thermal fuse.

Description

This loudspeaker is tested by a notified product certification authority and certified to EN 54-24:2008.

This music horn speaker series fulfilled the requirements of EN 54-24 and British standard BS 5839.

The new music horn CS-6HT60WHBS combines sound pressure and weatherproof of horn speaker with excellent sound of 2-way-system. It is particularly suitable for applications, where apart from speech also a high quality music performance is required.

The weatherproof construction (protection type IP-66) allows the permanent use outdoors. Therefore the range of application possibilities is greatly extended.

Please consider the following features:

- The housing is made of impact proof ABS-plastic and can be painted in all RAL colors on option.
- 100V-transformers are used, enabling various tapping's

- Equipped with a ceramic terminal and a metallic cable cover complies with the requirements of BS speakers de 5839.
- The music horn contains two separate driver units, one for the low and one for the high frequency range.
- The mounting bracket is tilt able so the music horn speaker is optimally suited for wall- or ceiling mounting.

Technical data	CS-6HT60 BS
Load rating (Music Power)	60 W (90 W)

2-way coaxial chassis

itrol

Description

A very high quality 2-way coaxial chassis is used in this model series. A separate tweeter has been integrated into the very wide band basic membrane.

This coaxial speaker fulfills professional requirements in relation to sound pressure and sound reproduction. Maximum load 40 W.

Please consider the following features:

- Mounting is very simple. The grille can be lifted off by a screwdriver in order to have access to the fixing screws.
- The plastic cover is impact and scratch resistant and is available on request in all RAL colours.
- The fixing is theft save and can be mounted horizontally, vertically or to the ceiling.
- There is room in the cabinet to mount relays, if necessary.

- Cabinet Speaker 10 W**, with 2-way coaxial chassis **BC-110C**
with 100V matching transformer (10 – 5 – 2.5 W), white
- Cabinet Speaker 20 W**, with 2-way coaxial chassis **BC-120C**
with 100V matching transformer (20 / 10 / 5 W), white
- Cabinet Speaker 30 W**, with 2-way coaxial chassis **BC-130C**
with 100V matching transformer (30 – 15 – 7.5 W), white

6W	Adaptions 1,5/3/6 W
10W	Adaptions 2,5/5/10 W

Description

This cabinet speaker is made of coated MDF wood and is due to its thought-out construction absolutely swinging- and boom-free. In connection with the broadband high performance chassis an excellent speech and music playback can be reached. The design is modern, decent and is commented upon in a positive manner by architects. The rear panel and the comfortable spring snatch lock make the assembly substantially easier.

Please consider the following features:

- The installed 100V-transformer enables the tapping to 1/1, 1/2 and 1/4 performance in each case.
- Drilled holes in the rear panel allow a horizontal or vertical attachment of the speakers.
- The models BCH-406R/410 R are delivered with an installed volume control.
- The speakers are available in all RAL colours on request.

Description

This speaker has the simplest and most up-to-date type of mounting, a QUICK RELEASE, which sets new standards in terms of safety and simplicity.

The assembly or disassembly is carried out only by tightening 4 screws, which are accessible after lifting the perforated plate (for example with a screwdriver).

The installation frame is made of high quality plastic, the grille of coated steel. The construction is theft save and impact resistant.

Please consider the following features:

- Modern, understated design with a rim height of approx. 2 mm.
- High-quality, broadband 5¼ chassis with integrated high-tone cone are used.
- The speaker is available impregnated, with a specially prepared chassis and matching transformer.
- As with all our speaker types, a special finish is available on request.

- Optionally available with specially prepared chassis and transformer in „humid room“ design. If desired, simply order the „FI-100“ option.

Description

The RC-110C, RC-120C and RC-130C models are the same design, construction and mounting style as the model series (RC-110/120/130) described opposite.

They are larger in measurement and proportion. It is therefore possible to insert a high-quality 6 1/2" 2-way coaxial chassis. This 2-way coaxial chassis has a very wide band basic membrane with a separate tweeter integrated.

This broadband 2-way coaxial speaker chassis also meets professional requirements in terms of sound pressure and tone reproduction. The load capacity is max. 40W. A high-quality matching transformer supplies best music and speech quality.

„Snap-In Mount“

Ceiling Speaker

with 100 V-transformer

Description

This ceiling speaker is made of full metal. By the two assembly brackets, which tighten automatically by spring action when inserting the speaker into the hole, assembling time is reduced to a minimum.

The speaker is in one piece and surprisingly easy to mount. The grille and installation ring are made of varnished steel, and meet most fire regulation rules.

A high-quality, wide band speaker chassis (6½") and an equivalent 100V matching transformer allow perfect speech and music reproduction.

Please consider the following features:

- Modern, very understated design with approx. 2 mm rim height.
- Very easy to mount, suitable for all ceiling types.
- The „BW-200“ option gives the built-in speaker a ball-proof construction.
- Optionally with specially prepared chassis and transformer also in humid room execution available.

- A special lacquer finish of the speaker in all ral colours is possible, if desired.
- The high-quality 100V-transformer permits different adjustments. Please take further details from the technical data, shown below.

„Spot-Design“

Ceiling speaker

with 100 V-transformer

Description

Small, quadratic ceiling and wall speaker, which is also suitable for the installation in 100 mm conduits. Due to inconspicuous design and a harmonized choice of colour it perfectly matches any premises. A 21/2" wide band speaker ensures excellent sound and therefore this device may be used for voice transmission as well as for background music purposes.

Please consider the following features:

- The matching transformer is suitable for a 100V connection and can be adapted to 6 W, 4 W or 2 W power.
- The fitted speaker can be adapted to a lower resistance (8 ohms, 6 W). It is connected directly to the chassis. A special delivery with a 20 cm wire and connection clamp is possible.
- The speaker is also available in a moisture proof version, an especially prepared chassis and matching transformer. Please order "FI-100" for this option.

The necessary hole cut should have a Ø of 90 mm ± 3 mm.

- Special speaker colours are available on request.
- Two mounting springs ease assembling a great deal and ensure tension force for secure hold. Through this these loudspeakers adjust to any usual wall- and ceiling thicknesses.

„Spot-Design“
Ceiling speaker
with 100 V-transformer

Description

These “Spot Design” fitted speakers fit in very well with the current halogen light systems. They have a 2½” wide band speaker and an outstanding tone. This speaker is suitable for speech and background music. This speaker is used where functionality, a special design or small measurements are required.

Please consider the following features:

- The frame and the grill made of metal and are available in four colors (white, black, gold and silver), making the possibilities, even under the aspects of design and architecture, very versatile.
- The exceedingly easy mounting with 2 metal springs fits all ordinary ceilings and walls.
- The matching transformer is suitable for a 100V connection and can be adapted to 1/1 – 1/2 – 1/4 power.
- The fitted speaker can be adapted to a lower resistance (8 ohms, 6W). It is connected directly to the chassis. A special delivery with a 20 cm wire and connection clamp is possible.
- Special speaker colours are available on request.

This picture shows the simple and time-saving assembly with 2 metal springs.

- The speaker is also available in a moisture proof version, an especially prepared chassis and matching transformer. Please order “FI-100” for this option.

„eyeball tweeter“

Description

This 2-way fitted speaker with a very wide band woofer chassis and the new “eyeball” tweeter (patent) is of professional Hi-Fi quality.

The “eyeball” tweeter and grille can be tilted in every direction, by which the height emission can be driven in every direction.

Please consider the following features:

- Very practical and secure mounting with 6 quick-tightening clasps (theft save).
- Very attractive design (rim height only 3.5 mm), frame made of high-quality impact and scratch resistant plastic with a grille made of burn-in painted steel.
- High-quality 100V matching transformer for 1/1-1/2-1/3 performance, also lower ohm connection possible.
- The 2-way fitted speaker SC-400WT is suitable for high rooms with a medium disturbance level.

Installation case made of soaked chip-board for fitting the SC-400WT into ceilings, brick walls, concrete, etc.
Dimensions: 315 (H) x 233 (W) x 86 (D) in mm

Installation Case for SC-400WT ... **EZ-400**

- The installation case EZ-400 greatly improves the resonance.

Necessary hole cut: 275 mm x 190 mm, ± 5 mm.

Description

This speaker has the most modern and easy fitting method, a quick fastening clasp. It sets new standards in security and easiness. Four screws to mount or dismount and lifting off the grille (with a screwdriver) is all that is necessary.

The installation frame is made of high-quality plastic, the grille of coated steel. The construction is theft save and impact resistant.

- Modern, understated design with a rim of approx. 2 mm.
- A high-quality wide band 5 1/4" chassis is used with an integrated high tone cone.

 Sound Panel Speaker, 30 W, with 100V-transformer **SW-230C**

Description

These sound panel speakers are made of 13 mm, totally blackened chipboard on which the speaker chassis and the 100 V matching transformer are fixed.

Please consider the following features:

- The models SW-004/006/010 have a “twin cone” chassis with a diameter of 130 mm, the models SW-104/106/110 with a diameter of 165 mm.
- A high-quality 2-way coaxial case with a very wide banded basic membrane, into which a separate tweeter is fitted, is used for the models SW-210C, SW-220C and SW-230C.
- The sound panel has 4 rubber naps on the bottom side. This enables for instance a vibration- or boom disturbance-free application on ceiling grills.

Figure shows model SW-106

„Sound-Dome“
Mounting speaker
with 100 V-transformer,
outstanding sound quality and performance

Description

The high performance 2-way speaker for high musical requirements!

The high-quality coaxial chassis provides, in connection with the aluminum case and the integrated bass reflex pipe, for a brilliant sound and outstanding sound pressure. Therefore this speaker is well suited for the use in large restaurants, conference rooms, etc. The Sound-Dome can also be used in gyms and sports halls, as it has a impact resistant structure.

The impedance selector switch at the front enables fast access, so that the speaker can be adjusted to the local conditions at any time.

- Please consider the following features:
- Available on option „moisture proof impregnated“ chassis and transformer.
 - Easy installation with high-speed snap fastener.
 - On request available in all RAL colours.
 - Screw connection terminals with one input and one output per terminal, enable a speedy connection with further speakers.
 - Under the grille the impedance selector switch can also be set to 16 ohms.

Description

The ceiling and wall construction speakers of the SCS series present themselves in a new, responding optic. The form adapts outstandingly to almost all premises.

Particularly in buildings, in which a suspended ceiling is not intended, the complete metal speaker is the solution. Of course it can be used due to its method of construction also as wall speakers.

If desired, it is available in all RAL colours.

Please consider the following features:

- Speaker in complete metal execution.
- Wide-band chassis for excellent speech and music reproduction.
- Simple assembling.
- Optionally in humid room version available.

Also suitable for outdoor installation.

Description

These high-quality sound projectors have been developed according to the latest knowledge in plastic technology. The sound pressure decrees nearly to the level of horn speakers. They have a high wide band, such as dynamic speakers.

Both models (CSP-115 and CSP-220) have a built-in wide range „twin-cone“ speaker chassis. Each of the integrated transformer tapings 100 V, 70 V and also 50 V have respectively three power levels.

An excellent sound characteristic and the dynamic of these sound projectors gives best results for speech articulation as well as for a very good music performance.

It is possible to rig up a number of these sound projectors, on top of each other, by use of similar phasing of the signal connection. This effects a narrowing of the vertical transmission angle at 1/4/8 kHz, which has the same effect as a column speaker.

Of course the CSP-115 and CSP-220 are both able to be low-impedance connected.

Please consider the following features:

- Both models are established in an equal design, scratch-resistant and impact resistant plastic material.
- The colour of the case is white, similar to RAL 9010, the folding mounting bar is creme white, similar to RAL 9001.
- The form and interior equipment of the sound projectors is configured, so that the favoured polar pattern of the sound radiation is assured.
- The required connection or impedance mode is done with clamp insulated wires (well marked). The cable is led out at the rear side of the unit.

★

Technical data	CSP-220

For indoor and outdoor mounting

The lobe-shaped sound dispersion characteristic enables excellent coverage of large areas with a relatively small number of column speakers.

Description

This column speakers series is very strong and sturdily constructed. They are made of extruded aluminium with cast aluminium top and bottom covers. The aluminium grille is stove enamelled. The columns are weather- and dust-proof and are very suitable for outdoor use, e. g. open-air theatres, stadiums and public parks

- All column speakers in this series are equipped with matching transformers for half and full power use.
- Because of their trapeze-shape, these speakers are very space saving and also suitable for corner installment.
- Supplied as standard with each of these speakers. Is complete swivel and tilt wall mounting kit.

2-WAY COLUMN SPEAKERS

RCS

Description

The series LS-300 column speakers are made of sturdy, stove-enamelled sheet steel, the both covers of high firms plastic. This modern, very wide-range, high-performance speaker combined with the tweeter provides an excellent speech and music reproduction.

- All column speakers in this series are equipped with a 100V transformer, which provides two possible power taps.
- The loudspeakers have a low impedance 8 ohm power tap.
- The grill is easily removed. It is easy to handle the impedance- and „low-cut“ selector switches. The speaker can be either used in- or outdoors. The scope of delivery contains a mounting set, for pan and tilt.

With the wall bracket included in the scope of delivery, the loudspeaker column can be swiveled as well as tilted.

Description

These Column Speakers come in a very elegant design, extremely slim, so that they adapt outstandingly to every architecture (e.g. in churches etc.).

The housing is of aluminium, the top and bottom of high-quality plastic. The grille is made of steel.

The speaker-chassis, along with a high quality audio frequency transformer, ensures very good acoustic pressure and best playback quality.

- On the back of this column speaker is an internal impedance-selector switch.
- The column speaker can be connected with 100 – 70 – 25V respectively with 1/1 – 1/2 – 1/4 performance.

SPRACHE & MUSIK

30W Adaptions
7,5/15/30 W

2-Way-System

max. 50 W

Description

The music horn speaker DMH-301 combines sound pressure and weatherproof of a horn speaker with the excellent sound of a 2-way-system. It is particularly suitable for applications, where apart from speech also a high-quality music performance is required.

The weatherproof construction (protection type IP-66) allows the permanent use outdoors. Therefore the range of application possibilities is greatly extended.

Please consider the following features:

- The housing is made of impact proof ABS-plastic and can be painted in all RAL colours on option.
- 100V-transformers are used, enabling various tapplings.
- The music horn contains 2 separate driver units, one for the low and one for the high frequency range
- The mounting bracket is tiltable – so the music horn speaker is optimally suited for wall- or ceiling mounting.

HORN SPEAKERS (with 100V-transformer)

RCS

15W Adaptions
1,9/3,75/7,5/15W

Description

The horn speaker DH-115A has a very wide frequency range, which combined with the high sound pressure even with long distances for optimum speech intelligibility.

The housing of the DH-115A is made of impact-resistant ABS plastic in the color light gray RAL 7035, the fully reversible U-mounting bracket is made of stainless steel.

With the embedded impedance selector switch on the back four 100V adaptions and a low-impedance adaptation can be selected.

The base impedance of the DH-115A is 16 ohms. With this feature, this horn speaker is in addition to the usual 100V applications also suitable for use in intercom systems.

Please consider the following features:

- High reliability due to protection class IP66. Waterproof introducing the connecting cable through PG screwing.
- High quality design with stainless steel mounting bracket.
- 4 Adjustments in the 100V operation available.

Description

Very stable and attractive horn speaker with integrated 100V matching transformer. This series is of high-quality plastic and therefore shock- and scratch-resistant.

The understated colouring, a industry-gray tone, blends in very well with the surroundings. Of course it is also possible to paint these horn speakers in all RAL colours.

The mounting bar is completely tiltable and therefore very easy to fit.

Please consider the following features:

- The complete construction of the horn speakers series has the ultimate protection grade, IP 66.
- The 3-pin connection cable (flexible hose line) is led through a waterproof PG-screw joint.
- The 6-step impedance is switchable with a screwdriver at the rear side of the unit.
- The horn speaker system is constructed to give an outstanding high sound pressure and best sound quality reproduction. The sound pressure is dependent on the different models and the particular impedance change-over.

Description

Very stable and attractive horn speaker with integrated 100V matching transformer with the grade „HEAVY DUTY“. In spite of its stability this speaker series has a very modern and appealing appearance.

The back side cover, in which also the matching transformer is installed, is made of scratch- and impact resistant plastic. The horn is made of solid aluminium and the mounting of enamelled steel.

The very technical colouring (dark-metallic and black) points out the professionalism of this speaker series. Of course it is also possible to paint this equipment in each RAL colour (number) according to the architects requirement.

Technical data	DH-135HD	DH-150HD

Description

This universally usable active loudspeaker system is especially well suited for multimedia applications, monitoring, conference rooms, educational institutions and similar areas.

One PBA-040 W set consists of a self-powered pair of stereo speakers including mounting brackets and connection cables

Please consider the following features:

- Digital stereo power amp module mounted into one box, the second box is designed as a passive slave, therefore only one power cable and one line level cable to the powered box are necessary.
- Sturdy housing made of ABS plastic with metal front grille and metal mounting bracket in white colour.
- Class D stereo power amp module with 2x 25 RMS at 8 ohms.

- Swivel mounting bracket and trapezoidal box shape allow versatile mounting in horizontal or vertical orientation on walls or under the ceiling.

ACTIVE CEILING SPEAKER SYSTEM

RCS

100 V

2-Way-System

with coaxial chassis

PASSI

ACTIVE

Description

The new active speaker system RCA-220C allows a very high-quality, especially low-priced 2-way PA. Set consists of 2 coaxial ceiling speaker and an amplifier module with a power range of 2x 20 W. The used stereo amplifier is performed in Class-D technology.

The performance amplifying made directly at the speaker. This guarantees in all frequency ranges high dynamics and reproduction quality and fidelity without distortion.

The optionally available mixer UPM-121A completes the set. With this mixer all signals can be fed, for example, or laptops, CD / MP3 players mobile phones.

Please consider the following features:

- Cost effective solution, ideal for schools and presentation rooms.
- Loudspeaker cabinets in all RAL colors available on request.
- Easy installation and installation costs.

Technical data	RCA-220 C
Output power at 24V	2x 20/10 W
Frequency range -3dB	45 – 20.000 Hz
Audio inputs	unbalanced
Protection circuits	thermal, short circuit, reverse polarity
Rotary switch (4 gain stages)	20dB, 26dB, 32dB, 36dB
Input level	0dB, -6dB, -12dB, -16dB
Operating voltage	10-28 V
Current consumption at 24V/max.	45mA/2A
Connections	screw terminals up to 2,5 mm²
Speaker Ø and Impedance	165 / 8 ohms, 2-way coaxial chassis
Dimensions / installation depth	Ø 226 mm, 100 mm

Control-program combination

Surface mount socket EG-200

Description

This new LPW presents the combination of a volume control and a program selector switch. It's possible to choose 5 channels and to individually adjust the volume. For technical facts of the program selector switches and volume controls please look on the left side.

The LPW-combinations are basically constructed with a 24V emergency call relay which enables an emergency call even when all controls or program selector switches are in 0-position. The LPW combination fit in 2 cavity wall sockets (orange).

★

Rear and Front view of the Control-program combination

Model designations

Control-Program-Combination, up to 50 W **LPW-150R**
alpine white with relay

The surface mount socket **EG-200** (plastic) is made for flush-mounting installation of the control-program combination.

Mounting Case, 2-fold (flush-mounting, plastic) **EG-200**

with relay

Description

The automatic volume control is done by a matching transformer of 100V and a switch with 11 steps (10 control steps, each 3 decibel + 1 zero position). The switches are overwindable in order to avoid wilful demolition.

The volume controls come with **emergency call relay**. They are suitable for every standard 60mm mount socket. Cover plates and frames are in a modern, discreet design.

If a building project is planned to be equipped with the same surface, use of volume controls without cover plate and frame is possible, as shown on the right. If necessary, the attached control knob can also be changed.

- Attenuation in 10 steps.
- Audio transformer for 100V transmission technology.
- Flush mounting, surface mounting with suitable, optionally available mounting case EG-101.

Model designations

Volume Control up to 50 W, alpine white with relay **LR-150R**

Volume Control up to 100 W, alpine white with relay **LR-1100R**

The surface mount socket **EG-101** (plastic) is made for flush-mounting installation of the control-program combination.

Mounting Case, 1-fold (flush-mounting, plastic). **EG-101**

Volume-Control (mono)

These mono loudspeaker level controls (volume controls) are used to adjust the volume of loudspeakers on low-impedance use. They are especially suitable for the mounting in cabinet speakers etc.

Description

The **XORVA S** series is designed for indoor use. It offers two alternative models (passive or 100V) in two performance classes each.

This speaker series is characterized by the handy and inconspicuous design.

The compact housing speakers can be attached in any corner thanks to their oval characteristics.

In addition, the pivoting, tilting and rotating mounting bracket allows easy alignment of the speaker on the wall.

The new compact loudspeaker series meets all requirements for restaurants, presentations, classrooms, and much more.

Please consider the following features:

- Available in 2 different versions (passive or 100V).
- The high-quality, shapely oval plastic housing ensures perfect boom and swing freedom.
- Supplied with swiveling and tiltable metal wall bracket.
- Designed for indoor installation in restaurants, presentation rooms, schools, and more.
- The powerful 4" broadband chassis provides a nice and quiet sound with good speech audibility.

PB-730 S

Description

These professional cabinet speakers, series PB-720 and PB-730 are perfect for sophisticated PA systems. Excellent speech and music reproduction are achieved. These speakers have a 2-way-system, a full range woofer and a dome tweeter which are fitted into a professionally created case ensuring perfect acoustics.

- The trapeze form allows mounting in various angles and corners. Little feet on the case bottom make it possible to place the speaker on a table, etc.

- The model PB-720 S/W has an additional swivel bracket and a pull out eyebolt.
- There is a hidden impedance selector on the back panel with 4 x 100V and an 1 x 8 ohms position. A built-in high quality 100V matching transformer, ensures full quality of sound pressure and playback.
- The speakers can be mounted horizontally or vertically. The grille can be taken off.

Description

These professional and high volume PB-series cabinet speakers are ideal for PA systems. They offer an attractive design, best speech reproduction and perfect music performance.

The speakers have a 8" full range woofer, a 25 mm Dome Tweeter, and a bass pipe, which is integrated into a professionally fitted cabinet.

They are an excellent component for sound systems in assembly halls, congress and dance halls, gymnasiums, events, etc.

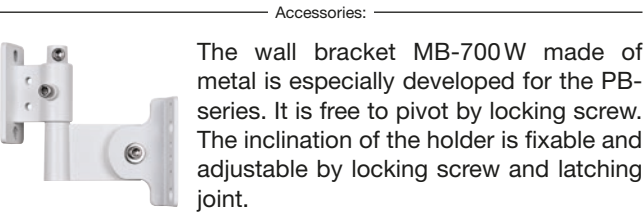

Please consider the following features:

- The trapeze shape allows mounting in corners and at various angles. Small feet on the case bottom make it possible to stand this speaker on a table etc.
- The speaker-leads connection is very easy with 2 clamp clips.
- the speakers are only suitable for indoor installation.
- There is a hidden impedance selector on the back panel with 4 x 100V and a 1 x 8 ohms position. As there is a fitted high quality 100V matching-transformer, there is no reduction of the sound pressure or playback quality.

- The speaker can be mounted vertically as well as horizontally. The grille can be removed if required by the customer for optical reasons.
- The speaker's shape and construction are excellent for the use in sound hanging lamps.

ACTIVE

The Pro-Sound Speaker series PRO with high speaking and syllable understanding is also in the best way suitable for Hi-Fi music performance.

These speakers are universally applicable, as they are made of high-quality components, are of small weight and compact dimensions.

Description

These 100V speakers have a high-quality scratch resistant and shockproof plastic housing. For mounting, three threaded inserts are used.

The Pro-Sound speakers of the series PRO are in the best way suitable in the stationary as well as in the mobile acoustic irradiation sector, because of their small weight and the compact dimensions.

Please consider the following features:

- The high-quality 100V matching transformer avoids almost any loss of sound pressure and playback quality.
- A stable unscrewable metal grille completes the robust structure.
- A laterally integrated hand grip with PRO-1210/1220 increases the transport comfort and the convenience of use.
- The speaker contains a 8" or 12" bass woofer of high quality and a 25 mm or 34 mm tweeter of the same standard.
- The outstanding sound is influenced also by the acoustically professionally designed housing. Adapted frequency switches provide for a high efficiency and an accurate sound characteristic in the various speaker.

Accessories PB-1210/20 PRO-1200

Wall Mounting Bracket PWB-100

Wall Bracket QWH-035

Floor Stand QST-185

- As input terminal of the speaker boxes serve high-quality speaker sockets. For slaving the signal through the boxes a second parallel switched speaker socket is available.

Accessories PB-806/810

- For the attachment of the speaker box PB-806/810, a mounting bracket is in the scope of supply. The active speaker can be swivelled around 180° inside of the mounting bracket. By using this bracket, the box can be attached in a vertical or horizontal position to the wall or ceiling.
- The speaker can be mounted onto the speaker stand PST-100, using an adapter flange (scope of supply PST-100).

Accessories PB-1210/1220

- The speaker stand QST-185 is suitable for the speaker box PB-1210/1220. The extremely stable floor stand is variable in height (109 - 185 mm) and easy to set up or fold up.
- The special optionally available wall bracket QWH-035 is suitable for our PB-1210/1220 as well as for all boxes with a 36 mm stand flange. The bracket is 15° swivel- and tiltable and provides a relocatable and removable retaining carriage. .

Description

Pro-Sound speaker of the QRF-series are perfectly suitable for voice and music transmission. They can be used for medium-sized up to large events. They were constructed in a very stable way.

The high-quality, sophisticated sound predestines this PA-loudspeaker for an application in an area of very professional PA and DJ. This loudspeaker is perfectly suitable for fixed installations (e.g. school gyms and event locations, etc.).

+ MOUNTING

All speaker boxes of the QRF-series can also be hung-up. This means they are equipped with five recessed eyebolts on each (one flying ear-rail on the back side and two on each side).

The eyebolts QRK-005 are optional available as Set of 5 pieces.

Ball throwing-proof certified (DIN 18032-3) in combination with the wall-bracket QWH-050, are the following speakers: **QRF-210, QRF-212**

+ ASSEMBLY

The housing of these loudspeakers consists of gray varnished (3 layers polyurethane) 18 mm MDF. They also have incorporated carrying handles. A massive metal grille completes the robust structure. Rubber feet help to avoid a damage of the housing.

+ EQUIPMENT

The speaker boxes are equipped with 10" and respectively 12"-bass woofers. These are very high quality products with excellent tweeter-horns ("double-radial").

All the boxes of this series do have frequency gates, which are adjusted to the individual assembly.

+ CONNECTORS

As input connectors the speaker boxes are provided with high-quality speaker sockets. In order to connect the signal through, all boxes are equipped with a speaker socket switched in a parallel way.

+ STAND

We recommend the speaker stand QST-185 (109 – 185 mm) for the speaker boxes QRF-210 and QRF-212.

The stands are very stable and are made of anodized aluminium circular tubes (ø 36 mm). They are adjustable for height stepwise and are very easy to build and fold up.

Wall Bracket QWH-050

+ WALL BRACKET

The wall bracket QWH-050 can be tilted 0-22° in 11° steps and is suitable for types QRF-210 and QRF-212.

Description

Pro-Sound Speakers of the „QRI“ series are ideal for the transmission of speech and music. They are e.g. Ideal for medium to large events.

In particular, this speaker Series is also suitable for the fixed installation area (for example, in sports and multi-purpose halls, theme restaurants, smaller stadiums and theatres, etc.)

+ HIGHLIGHTS

The QRI series consists of passive 2-way loudspeakers in symmetrical cluster design for permanent installation. The speakers are equally suitable for voice and music playback as top-part or full-range speakers.

This loudspeaker series is available as a low-impedance passive system as well as a 100 V system for integration in electroacoustic systems (ELA) and electro-acoustic emergency warning systems (ENS).

The Passive 8" Bass Reflex Subwoofer QRI-108S/ST makes the ideal low-frequency extension for compact systems. Its wedge design makes it ultra-compact and ideal for wall, ceiling and corner mounting.

Please consider the following features:

- Silky smooth and even reproduction of the high frequencies.
- The loudspeakers are characterized by low-feedback behaviour.
- Lifelike and transparent sound.
- Designed for both horizontal and vertical mounting positions.

System details

Multi-Mounting Bracket

Wall Bracket (clustervariant)

Corner mounting of QRI-108S/ST

- Integrated hardware for extensive install and cluster variants (horizontal and vertical) for independent installation.
- Designed for high-level sound applications, e.g. in sports and multi-purpose halls, event gastronomy, smaller stadiums and theatres.
- Of course all special paint finishes of the loudspeaker boxes in all RAL colours are possible on request.

+ WALL BRACKET

The optionally available wall brackets are swivel and tilt brackets. They are each available for horizontal or vertical wall mounting.

If required, an array system can be set up or detached by cluster (optional).

Description

Pro-Sound Speakers of the „QRI“ series are ideal for the transmission of speech and music. They are e.g. ideal for small events.

In particular, this speaker series is also suitable for the fixed installation area (for example, in catering, conference and training rooms, churches, museums, and smaller theatre halls, etc.).

+ HIGHLIGHTS

The QRI Series 400 consists of PA speakers, which are equally suitable for voice and music playback in conjunction with the QRI-108S subwoofer.

This loudspeaker series is available in both a low-impedance, passive system and as a 100 V system for integration in electroacoustic systems (ELA) and electro-acoustic emergency warning systems (ENS).

The QRI-402 / T is a passive 2-way speaker in d'Appolito arrangement in subtle mini format, which is well suited for speech or the music reproduction of moderate signal levels with its linear Frequency range.

The QRI-404 / T is a 2.5-way speaker in subtle column design, which equally suitable for both voice and music playback in conjunction with the QRI-108S subwoofer.

Please consider the following features:

- Silky smooth and even reproduction of the high frequencies.
- The loudspeakers are characterized by low-feedback behaviour.
- Lifelike and transparent sound.

Description

Our ball protection grid series protects not ball-resistant speakers from vandalism and damage. The grids were developed specifically for use in sports and multipurpose halls in which an increased protection of the speaker installation on ball hits is necessary.

The ball protection grilles are designed to minimize the loss of sound transmission. In addition, the series has a very neutral and stylish design that fits well into architecture and interior design.

Please consider the following features:

- Suitable for ceiling or wall mounting.
- Robust and stable design in white sheet steel.
- For mounting, the grid is just simply screwed on by 4 screws or 8 screws (only for BSG-350) directly to the ceiling or wall, over the speaker you want to protect.

- Protection for speakers without impact resistance.
- Special coatings in all RAL colors are available on request.

Description

The ZS-3 impedance meter measures the actual impedance of speakers and 100V speaker systems.

The measurement is carried out by a 1 kHz test generator and is displayed on a 4-digit LCD display. For measurements there are three different measuring ranges available: 0-20 ohms, 200 ohms and 2000 ohms.

The LCD display has a data hold function and displays it when the battery voltage becomes low. The device comes in a handy protective bag. Also included are test leads, the required mignon batteries and a device supplement with conversion table for power values.

Carrying and storage bag with accessories

High-quality processed vinyl fabric bag for storing the ZS-3. The measuring device is completely protected by the padding together with the supplied accessories in the bag.

There are 3 compartments in the carrying and storage bag, which provide enough space for the accommodation of measuring cables, measuring clamps, carrying strap and spare batteries.

Included with the ZS-3:

- Storage bag
- Digital impedance Tester with cover
- Two measuring cables with removable measuring terminals
- A shoulder strap
- 6 pieces of AA batteries

Please consider the following features:

- Digital display of the impedance
- For low-impedance speakers as well as for 100 V speakers
- Measuring ranges: 0-20 ohms, 200 ohms, 2000 ohms
- High measurement accuracy ($\pm 2\%$) through calibration
- Battery monitoring by display
- Protection and storage bag

Description

The presented speaker chassis are produced according to the newest international quality standard. Long lasting experience assures perfect manufacturing of both the mechanical and the physical properties.

The illustrated models are especially appropriate for playback with PA systems, but also best suited with professional facilities, due to their broadband. They satisfy with sound pressure, frequency range and playback quality.

Description

The presented 100V-matching transformers are produced according to the newest international quality standards.

The use of best materials, including modern manufacturing methods, enables the very small dimensions of the matching transformer. The matching transformer features an excellent efficiency ratio.

The frequency ranges are between 50 Hz in the low and up to 18000 Hz in the high frequencies range.

100 V-RING CORE TRANSFORMER

RCS

100 V

PASSIVE

ACTIVE

Description

These high-quality ring core audio transformers are ideal for installation in Pro-Sound loudspeaker boxes and thus enable the use of these boxes in 100 V systems.

These ring core transformers are relatively compact and lightweight in view of the power level. They produce less mechanical hum and have very low no-load losses.

Of course, these 100V-transformers are characterized by their simple central fixture for other applications as flexible.

Please consider the following features:

- High quality matching transformer with excellent operating frequency from 34Hz to 27kHz.
- 300 mm long lead outputs allow flexible connection for different applications.
- The practical central fastening and a foam rubber pad is already attached to the transformer.
- Manufactured according to standards EN 61558 VDE 0570 and IEC 085.

BSS-9040 D	2483	1110	809	2050	900	700	594 kg

Description

The BSS-9040 D fire protection cabinet are used in all places where voice evacuation systems have to accomplish the demands of **E90** (functional endurance over 90 minutes in a case of fire) or **F90** (resistance against fire for 90 minutes). BSS series housings are approved by the German construction supervision agency and fulfill all recent safety regulations (approval number Z-86.1-28).

The housings were tested in conjunction with our 19" swing frame cabinets of the RSS series by MPA Stuttgart. The comprehensive test report can be requested if needed.

The fire protection housing was specially developed for the swing frame cabinets RSS-5540B. ue to their spacious dimensions they can of course be used with a variety of other 19" racks as well.

Please consider the following features:

- Fire resistant housing with the capacity to **withstand a fire** on its outside **for 90 minutes**
- Complies with the demands of the recent MLAR (German regulation for high buildings)
- Fire resistant plates according to DIN 4102 A1/A2
- 90 minutes fire load dampening (I90)
- Protection class II (IP 54)
- Active high-performance fan on VLS Ø 80mm ventilation system
- Two cable inputs or outputs in the top of the housing
- Double door with covered steel hinges
- Upgrade with a special locking cylinder is possible
- Wall mounting kit included
- Colour RAL 7035 (light grey)

Description

BSS series fire protection cabinets are used in all places where voice evacuation systems have to accomplish the demands of **E30** (functional endurance over 30 minutes in a case of fire) or **F30** (resistance against fire for 30 minutes). BSS series housings are approved by the German construction supervision agency and fulfill all recent safety regulations (approval number Z-86.1-35).

The housings were tested in conjunction with our 19" swing frame cabinets of the RSS series by MPA Stuttgart. The comprehensive test report can be requested if needed.

The design of BSS series is tuned to fit perfectly around the swivel door racks of our RSS series (RSS-5524 B, RSS-5530 B, RSS-5540 B). Due to their spacious dimensions they can of course be used with a variety of other 19" racks as well.

Please consider the following features:

- Fire resistant housing with the capacity to withstand a fire on its outside for 30 minutes
- Complies with the demands of the recent MLAR (German regulation for high buildings)
- Fire resistant plates according to DIN 4102 A1/A2
- 60 minutes fire load dampening (I60)
- Protection class II (IP 54)
- Integrated, powered cooling system(double Ø 80 mm fans)
- Two cable inputs in the top of the housing
- Double door with covered steel hinges
- Upgrade with a special locking cylinder is possible
- Wall mounting kit included
- Colour RAL 7035 (light grey)

The picture shows the additional castor on swinging rack cabinets.

Description

The RSS series 19" swing frame cabinets presented in this section have been especially developed for the use with audio systems.

The cabinets with a 19" swing frame rack serve to accommodate rackmount devices, subracks, front panels etc. with 19" design according to DIN 41494.

The cabinets feature high-quality design and finish as well as excellent stability, thus complying with the latest standards of manufacture. For example, the rackrails have ASA hole pattern.

Please consider the following features:

- The frame construction consists of extremely stable welded sheet steel sections with holes for floor and wall anchoring. Colour: RAL-7032.
- Safe cooling is ensured through appropriate design of the rear panel (free space of 3 RU at the bottom, perforated vent sections at the top).
- The additional castor for the swing frame rack permits easy pivoting of the rack frame, even when the cabinet is full.
- The opening angle of 170° provides easy access to the rear of the rack, even when devices are mounted in the swing frame rack.
- Cable entry is possible from the top, the bottom or the rear. Mounting facilities for components such as terminal strips, etc. are provided on the rear.
- The 19" rackrails with ASA hole pattern permit mounting of devices from different manufacturers.
- The toughened safety plexiglass doors of the RTS series have keyed cylinder locks and are available for all swing frame rack cabinets of the RSS series.
The mounting of the plexiglass doors to the swinging rack cabinets will be carried out by the customer. To provide optimum customer-friendliness, the cabinets have been well prepared in such a way that the requirements for mounting the doors have been reduced to a minimum.
- For devices that do not have a 19" design (HIFI design) a wide range of 19" accessories such as shelves, sliding trays, drawers, blank panels, etc. is available. See „19" accessories“ section in this catalogue.

19"-accessory parts

The three-way fan panel, particularly developed for this cabinet, is installed at the cabinet rear side. The outlet air is guided upwards and backwards. The current supply is made by 230 V mains.

Van panel, (for RSS-Series) **RFF-300**

With heavy rackmount devices the use of a pair of RGL-550 slide rails is recommended.

Description

The 19" racks of the new RAB series were particularly developed for the professional application in PA and sound systems. They are outstandingly manufactured and correspond in the reference of assembly dimensions and protection class to the current standards.

The cabinets serve as a placement of devices, module carriers, modules as well as accessories of the 19" systems compliant to DIN 41494.

Please consider the following features:

- The extremely stable frame construction consists of welded steel sheet. The housing is completely powder-coated and supplied in the RAL colour 7035.
- The side panels are removable, which simplifies the installation of devices and their wiring significantly.
- For all models of the RAB series a plexiglass door is available, which can be locked due to two cylinder locks, in the scope of supply.
- An optimal ventilation of the system is ensured with the optional active fan panel RFF-200. Two high performance 15 W filter fans provide the necessary air interchange during overheating.
- The use of the base plate (RBP-100), lockable by a sliding mechanism, ensures a dust free draft of air. The cable harness can be comfortably led outside through the foam material catch.
- With heavy rackmount devices the use of a pair of RGL-525 slide rails is recommended.
- For devices that do not have a 19" design (HIFI design) a wide range of 19" accessories such as shelves, sliding trays, drawers, blank panels, etc. is available. See „19" accessories“ section in this catalogue

19"-accessory parts

The two-way fan panel, particularly developed for this cabinet, is installed at the cabinet rear side. The current supply is made by 230 V mains.

Van panel **RFF-200**

Thermostat controlled with a control range of 0-60°C. The closing contact activates the fan panel RFF-200 when achieving the critical temperature.

Thermostat for top hat rail mounting **RTC-200**

The set includes 4 levelling feet for the 19" cabinets of the RAB series which serve to compensate uneven floors.

Levelling feet **RJF-300**

The base plate RBP-100 is lockable and prevents the penetration of dust and dirt particles. Cables can be led out tidily.

Base plate **RBP-100**

This extremely stable set of castor bases includes 2 fixed castors and 2 swivel castors with brakes (400 kg max. load).

Castor base set **RDR-350**

With heavy rackmount devices the use of a pair of RGL-525 sliding rails is recommended.

Sliding rails **RGL-525 B**

Note: When comparing prices, please take into account, our cabinets of the RAB series are delivered completely assembled and packaged.

Description WSH-Series

This series of 19" heavy load wall housing is specifically designed to ensure both optimal wiring and installation of PA and media components. The cabinets provide a variety of features such as an easy-open front door and individually adjustable mounting rails.

The 3-piece construction with swivel, lockable middle section for a comfortable installing and wiring of the devices.

The housing made of 1.5 mm thick sheet steel powder coated light gray (RAL 7035). With a new, passive ventilation system resulting heat is conducted safely outside with the door closed.

The access on the top and bottom and on the sides of each wall housing, the installation of wiring make very simple, flexible and time saving.

The entire housing can be mounted left or right opening as needed.

Please consider the following features:

- Available in 9, 12 and 16 RU.
- Side panels detachable and lockable.
- 19"-rail front adjustable in depth.
- Sekurit glass door with toughened safety glass (4 mm) and cylinder lock. Door opening angle 180 °.
- Ventilation slots for active and passive ventilation.
- Door opens on the left or right.
- Maximum installation depth: 553 mm
- Cable entry on top and bottom.
- Includes 8 pcs. 19" mounting screws.
- Blank panel with integral brush strip for comfortable carrying of cables.

Description

Our 19" rack flight cases are designed in accordance with the international 19" standard a meeting of highest requirements regarding the quality, stability, handling and design.

They are able to withstand the rigours of everyday use on stages and events as well as shipping through carriers or by airfreight.

Please consider the following features:

- The corpus is made out of "double-door" 7mm multilayer birch-multiplex-wood.
- Edge protection made out of robust aluminium angles that are fitted all around (25/25 mm).
- All 8 corners are additionally equipped with ball corners made from galvanized sheet steel.
- At the bottom of the "flight-case" there are 4 stable rubber feet.
- All flight-cases are supplied with flap handles in recessed grips and butterfly locks.
- 19" rack stripes serves professional usage on the front side as well as on the back side.

- Continuous mounting of the drawers with enclosed number of fastening screws, screw nuts (M5) as well as discs and rosettes.
- One removable cover on the front and in the back of the flight-case.

19"-Blank Panel , 3 RU (weight: 0,85 kg)	RLP-003

Description

These 19" vent panels made of 1.3 mm steel serve to fill empty spaces in 19" rack cabinets. They have 3 x 25 mm vent slots to provide optimum ventilation of the 19" rack cabinet.

Please consider the following features:

- The 19" vent panels are finished in black powdered coat.
- The panels are available in 3 different heights.

19"-Vent Panel , 1 RU (weight: 0,28 kg)	RLF-101
19"-Vent Panel , 2 RU (weight: 0,47 kg)	RLF-102
19"-Vent Panel , 3 RU (weight: 0,66 kg)	RLF-103

Description

The 19" rack panels made of 1.3 mm steel serve to accommodate XLR sockets (universal „D“ type) and jack sockets.

Please consider the following features:

- The XLR rack panel can accommodate 8 XLR sockets.

19"-XLR-Rack Panel , 1 RU, 8 XLR (weight: 0,30 kg)	RXP-081
---	----------------

Description

These 19" protective grids are made of 1.5 mm and serve to protect your devices against impact.

Please consider the following features:

- The 19" protective grids are finished in black powdered coat.
- They are fixed diagonally by means of the 19" rackmount screws.

19"-Protective Grid , 1 RU (weight: 0,43 kg)	RSG-001
19"-Protective Grid , 3 RU (weight: 0,46 kg)	RSG-002

Description

This 19" sliding shelf is suitable for depositing or mounting devices and accessories. The base plate slides on rails allows full extension. Additionally, holes are provided in the base plate for fastening components

Please consider the following features:

- The 19" sliding shelf is finished in black powdered coat. It is approx. 370 mm extendable and has a mounting depth of approx. 370 mm.
- The sliding shelves are made of 1.2 mm steel and are extremely stable.
- Top-adjusting height is 70 mm, the width 440 mm.

19"-Sliding Shelf, 3 RU (weight: 4,60 kg) **RAU-002**

Description

19" drawers which serve to accommodate components and accessories. The drawer slides are on rails and enable full extension. All drawers are equipped with a flush pull and a lock with 2 keys.

Please consider the following features:

- The mounting depth of the drawers is 360 mm.
- The drawers are made of 1.2 mm steel and are extremely stable.

19"-Drawer, 2 RU (weight: 6,20 kg) **RSL-002**
19"-Drawer, 3 RU (weight: 7,30 kg) **RSL-003**

Description

These 19"-clamping shelves are used to set different devices. The clamping rails are adjustable in height and depth, which makes it possible to adapt them to the respective device.

Please consider the following features:

- The mounting depth of these 19" clamping shelves is 250 mm.
- They are finished in black powdered coat.
- The clamping rails are padded with foam rubber.

19"-Clamping Shelf, 2 RU (weight: 2,20 kg) **REF-002**
19"-Clamping Shelf, 3 RU (weight: 2,50 kg) **REF-003**

Description

The 19" universal shelves are extra deep and can be used for accommodating accessories, non-rackmount components and the like. Holes are provided in the shelf itself which can be used for fastening components.

Please consider the following features:

- The mounting depth of these universal shelves is 370 mm. They are made of 1.6 mm steel.
- They are finished in black powdered coat.

19"-Universal Shelf, 2 RU (weight: 2,77 kg) **RAF-002**
19"-Universal Shelf, 3 RU (weight: 3,36 kg) **RAF-003**

Description

19" storage box which serves to accommodate components and accessories. It has a hinged cover that swings down. All storage boxes with hinged cover have flush pulls.

Please consider the following features:

- The 19" storage boxes are finished in black powdered coat.
- They are made of 1.2 mm steel and have a mounting depth of 250 mm.

19"-Storage Box, 2 RU (weight: 3,90 kg) RKB-002
19"-Storage Box, 3 RU (weight: 4,95 kg) RKB-003

The set includes 25 M6 oval head screws and the matching plastic cup washers.

Additional Screw Set M6, M6 x 16 RKS-006

The set includes 25 M6 cage nuts for mounting the rack-mount devices on the front railrails.

Cage Nut Set M6 RKM-006

**Microphones, call stations
and wireless UHF-systems**

Part 11

Control unit conference system

Description

The control unit GSC-100 is designed for a chairman as well as 60 delegate stations. Due to the possible extension to a total of four control units, up to 240 delegate call stations can be connected. The conference system can be easily and conveniently configured in various modes via the front panel.

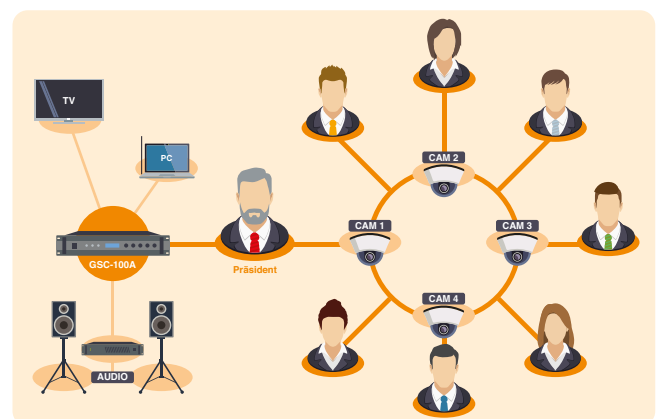

For the transmission of the discussion on a screen or beamer, a video output is available. The conference system comes with extensive configuration software that allows you to adapt the system optimally to local conditions.

Technical data	GSC-100 A
Power Consumption	400 W
Distortion factor	< 0,05%
Frequency range	100 – 18.000 Hz
Sensitivity	-56 dB, ±2 dB
Inputs	AUX-IN (cinch), MIC IN (1/4 „jack), RJ-45 Data-Port, LINE / REC-OUT (cinch), XLR audio output, VIDEO IN / OUT (BNC), DOM (camera connection), RS-232 (PC connection), EFX (equalizer looping)
Power Supply	AC 230 V (50/60 Hz)
Dimensions (WxHxD)	480 x 88 x 360 mm; 2 RU
Weight	11,5 kg

An RS-232 interface is available for controlling the conference system via PC. In addition, up to four video cameras (tracking dome cameras) can be connected.

- Discussion system with up to 60 stations (expandable to up to 240 stations)
- Digital control of the microphone units and optional video cameras by the control center.
- Different modes: open, sequential and limited conference.
- Telephone support, meeting and voting function. Video camera tracking system (optional).

★

Model designations

Control unit conference system, digital GSC-100 A
19", (2 RU), for up to 60 stations

MASTER

Chairman Station

Description

The elegant conference unit of the conference system includes a push-button for activating the microphone and a **priority button (red)** for deactivating all activated Delegate units. The red light ring of the gooseneck microphone indicates the speech readiness of the microphone unit for all panellists.

The integrated loudspeaker can be controlled via a side-mounted volume control. When the microphone unit is activated, it is automatically muted.

- **Priority key, to deactivate all activated delegate stations by the chairman**
- Built-in speaker transmits the conference well audible to the panellist.
- Detachable, flexible gooseneck condenser microphone with illuminated ring and windscreen.
- Stereo jack (3.5 mm) headphone and microphone connection.
- 3 m system connection cable with robust, screw-type DIN plug and expansion socket.

★

Technical data	GSP-102A
Power Consumption	2 W
Distortion factor	< 0,05%
Frequency range	100 – 18.000 Hz
Polar Pattern	kidney
Nominal impedance	600 ohms
Power Supply	24 V DC
Sensitivity	-44 dB, ±2 dB
Button functions	1x speaking, 1x priority (priority in front of delegates)
Connectors (Jack 3,5 mm)	Headphone Output; MIC input
Dimensions (WxHxD)	136 x 65 x 170 mm, gooseneck length 470 mm
Weight	900 g

Delegate Station, (1 button) **GSD-101A**
for connection to the GSC-100A, for all other participants (slave)

Dynamic Microphone with push-to-talk-button (jack)

Description

Dynamic gooseneck desktop microphone with a newly developed slim desktop housing which also provides additional space for retrofitting special facilities. Through its discreet and functional design, the microphone station fits well into any environment.

Please consider the following features:

- A noise compensated dynamic kidney microphone capsule is integrated in the gooseneck.
- All models are of balanced assembly, also the model with the 3-pin jack plug.
- The microphone station features high gain-before-feedback and a pop/wind screen. It has a 5 m connection cable fitted with the appropriate connector.

Circuit diagram shows model MS-201 K

Technical data	MS-201 K
Frequency response	100 – 15.000 Hz
Polar pattern	kidney
Nominal impedance	600 ohms
Sensitivity	-78 dB, ±3 dB
Button functions	Push-to-talk button
Dimensions (WxHxD)	131 x 42 x 181 mm, length of gooseneck: 390 mm
Weight	approx. 700 g

Desktop Microphone, (jack, balanced) **MS-201 K**

Dynamic Microphone with push-to-talk-button (XLR)

Description

Dynamic gooseneck desktop microphone with a newly developed slim desktop housing which also provides additional space for retrofitting special facilities. Through its discreet and functional design, the microphone station fits well into any environment.

Please consider the following features:

- A noise compensated dynamic kidney microphone capsule is integrated in the gooseneck.
- All models are of balanced assembly, also the model with the 3-pin jack plug.
- The microphone station features high gain-before-feedback and a pop/wind screen. It has a 5 m connection cable fitted with the appropriate connector.

Circuit diagram shows model MS-201 X

Technical data	MS-201 X
Frequency response	100 – 15.000 Hz
Polar pattern	kidney
Nominal impedance	600 ohms
Sensitivity	-78 dB, ±3 dB
Button functions	Push-to-talk button
Dimensions (WxHxD)	131 x 42 x 181 mm, length of gooseneck: 390 mm
Weight	approx. 700 g

Desktop Microphone, (XLR, balanced) **MS-201 X**

Electret Boundary Microphone

(with Phantom Power 11–52 V DC)

Professional, attractive boundary electret microphone with kidney characteristic. PTT function by the front side ON / OFF switch is possible.

Power supply results from Phantom Power supply (11–52 V DC).

Technical data	GFM-300
Frequency	30 – 20.000 Hz
Polar pattern	Kidney
Nominal Impedance	100 ohms
Sensitivity	-65dB ±3dB at 1.000 Hz on 1Pa
Max Input-Level	130dB SPL, 1 kHz at 1% T.H.D.
Power supply	Phantom power (11–52 V DC), 2mA typical
Dimensions and Weight	(W) 102 x (H) 104 x (D) 22 mm; approx. 297g (without cable)
Accessories included	Cable-Ø 3 mm – approx. 5 m (XLR), white
Colour	white

Electret Boundary Microphone **GFM-300**

Electret Gooseneck Microphone

(with Phantom Power 9–52 V DC)

Professional gooseneck electret condenser microphone with kidney characteristic. With phantom power supplied by the electret capsule creates outstanding sound quality and a relatively great talk distance.

The ideal length of 424 mm permits the use for many applications. The flexible gooseneck allows precise alignment and is equipped with an XLR connector.

Technical data	EXM-420
Frequency	50 – 18.000 Hz
Polar pattern	Kidney
Nominal Impedance	200 ohms
Sensitivity	-65dB ±3dB at 1.000 Hz on 1Pa
Max Input-Level	145dB SPL, 1 kHz at 1% T.H.D.
Power supply	Phantom power (9 – 52 V DC), 2mA typical
Dimensions and Weight	Ø 19 mm x 424 mm (L); approx. 123g
Accessories included	wind screen, XLR plug
Colour	black

Electret Gooseneck Microphone **EXM-420**

Gooseneck Microphone

(Unbalanced, electret, cables not terminated)

Electret kidney gooseneck microphone. It features high gain-before-feedback and an integrated wind and pop screen.

A mounting thread with matching nut is provided at the bottom end of the gooseneck. This enables mounting of the microphone on amplifiers, control panels, etc. The connection cable is balanced and not terminated (1 wire + shield).

Technical data	EGM-300
Frequency response	100 – 15.000 Hz
Polar pattern	kidney
Nominal impedance	1,2 kohms
Sensitivity	-78 dB, ±3 dB
Power supply	Phantom power (9 – 24 V), external: unbalanced, cable not terminated
Dimensions and weight	Ø 16 mm x 290 mm (L), approx. 80 g
Accessories included	M8 nut, tooth lock washer, plain washer, wind screen
Colour	black

Electret Gooseneck Microphone **EGM-300**

Gooseneck Microphone

(Balanced, dynamic, cables not terminated)

Dynamic kidney gooseneck microphone. It features high gain-before-feedback and an integrated wind and pop screen.

A mounting thread with matching nut is provided at the bottom end of the gooseneck. This enables mounting of the microphone on amplifiers, control panels, etc. The connection cable is balanced and not terminated (3 wires).

Technical data	DGM-400
Frequency response	100 – 15.000 Hz
Polar pattern	kidney
Nominal impedance	600 ohms
Sensitivity	-78 dB, ±3 dB
Dimensions and weight	Ø 32 mm x 390 mm (L), approx. 110 g
Accessories included	M8 nut, tooth lock washer, plain washer
Colour	black

Dynamic Gooseneck Microphone **DGM-400**

Microphone Clip (universal)

This microphone clip fits all common microphone types with a diameter of 23-30 mm, also microphones with cone shaped handles.

The holder comes with a $\frac{3}{8}$ " and $\frac{5}{8}$ " threaded connection.

Microphone clip, for Ø 23-30 mm . **MH-310**

Microphone Clip (universal)

This microphone clip fits all common microphone types with a diameter of 30-36 mm, also microphones with cone shaped handles.

The holder comes with a $\frac{3}{8}$ " and $\frac{5}{8}$ " threaded connection.

Microphone clip, for Ø 30-36 mm . **MH-800**

Desktop microphone stand with boom arm

Sturdy desktop stand with boom arm that extends up to 40 cm. dles.

The holder comes with a $\frac{3}{8}$ " and $\frac{5}{8}$ " threaded connection.

Desktop stand **TS-060**

Microphone boom (matt black metal tube)

The microphone boom is made of sturdy, matt black metal tube with black plastic parts.

The length of the swivel boom is 85 cm and has a $\frac{3}{8}$ " threaded connection. The weight of the swivel arm is only 0.9 kg.

This swivel boom is suitable for combination with the floor stand BS-190 or with other matching microphone stands.

Microphone boom (matt black metal tube) **SA-090**

Microphone floor stand with boom arm

Stable, damped floor stand (up to 180 cm extendable) with $\frac{3}{8}$ " thread.

The swivel boom has a length of 85 cm and a $\frac{3}{8}$ " threaded connection.

The nickel-plated tubes have a handy folding mechanism.

Floor stand **BS-185**
with boom arm (nickel-plated metal tubes)

Microphone floor stand With quick adjustment mechanism

Stable, lightweight and impact-sound-absorbing aluminum tripod (black), with a new handle mechanism, for very simple, noiseless height adjustment. The stand can be extended up to 170 cm, with $\frac{3}{8}$ " thread.

Floor stand **BS-190**
Floor stand **BS-195**
with boom arm

Microphone/Speaker Socket surface or flush mounting

Connection box with white plastic cover for surface or flush mounting in 55 mm switch boxes. Can be combined with the surface program GIRA System 55.

Color: RAL 9010, matt

Surface mounting:
(81x81x45 mm)

DM-055 AX

DL-055 AS

Speaker Socket **DL-055 AS**
with Speakon socket, incl. plastic surface frame

Microphone Socket **DM-055 AX**
with XLR socket, incl. plastic surface frame

Flush mounting:
(81x81x15 mm)

DM-055 UX

DL-055 US

Speaker Socket **DL-055 US**
with Speakon socket

Microphone Socket **DM-055 UX**
with XLR socket

Dynamic Microphone

Great quality dynamic Handmicrophone with kidney characteristics. It does not have back coupling problems and wind- and pop-protection are integrated.

A low-noise On- and Off-switch is integrated on the handle.

Technical data	DM-202X
Frequency response	120 – 18.000 Hz
Polar pattern	Kidney
Nominal Impedance	600 ohms
Sensitivity	-53 dB, ±3 dB
Dimensions and Weight	Ø 49 mm x 180 mm (L); ca. 300 g
Button	ON / OFF with locking screw
Access./Scope of supply	1 connection cable 4 m

Dynamic Microphone, with XLR plug, balanced. **DM-202X**

Dynamic Microphone

Great quality dynamic Handmicrophone with kidney characteristics. It does not have back coupling problems and wind- and pop-protection are integrated.

A low-noise On- and Off-switch is integrated on the handle.

Technical data	DM-202K
Frequency response	120 – 18.000 Hz
Polar pattern	Kidney
Nominal Impedance	600 ohms
Sensitivity	-53 dB, ±3 dB
Dimensions and Weight	Ø 49 mm x 180 mm (L); ca. 300 g
Button	ON / OFF with locking screw
Access./Scope of supply	1 connection cable 4 m

Dynamic Microphone, with jack plug, unbalanced **DM-202K**

Electret Cudgel Microphone (with phantom power supply 9-52V DC)

Description

The ECM-400 is a tube-directivity microphone in the shape of a cudgel (shotgun) with excellent directivity characteristic.

This microphone has a brilliant consonant-comprehensibility offering ideal premises for universal usage. Even sound sources which are further away can be amplified with no problem. A wind deflector and a microphone holder are included in scope of delivery.

Technical data	ECM-400
Frequency	30 – 20.000 Hz
Polar pattern	Cudgel (Shotgun)
Nominal Impedance	150 ohms
Max. Input Level	130 dB SPL, 1 kHz at 1 % THD
Dynamic	110 dB, 1 kHz at Max. SPL; S/N Ratio 74 dB, 1 kHz
Power supply	phantom power 9-52V DC, 2 mA typical
Dimensions and Weight	Ø 21 mm x 32,5 mm, approx. 200 g
Switch	Bass-Roll-off-switch or flat
Access./Scope of delivery	1 wind deflector, 1 microphone holder

Electret Cudgel Microphone..... **ECM-400**
(with phantom power supply)

XLR-Inline jack, silver

FEMALE

- 3-pin XLR-Coupler
- Self adjusting clamps as strain relief
- Cable-bend protection through vulcanised rubber ending
- Robust, nickel-plated metal-diecast case
- Colour: silver, black

XLR-Inline jack, silver **XLR-203 F**

XLR-Jack, silver

MALE

- 3-pin XLR-Jack
- Self adjusting clamps as strain relief
- Cable-bend protection through vulcanised rubber ending
- Robust, nickel-plated metal-diecast case
- Colour: silver, black

XLR-Jack, silver **XLR-203 M**

XLR-Installation Socket

FEMALE

- 3-pin XLR-installation-jack
- Latching device
- Robust metal-diecast case
- Colour: black
- Typ: D

XLR-Installation Jack, black **XLR-503 F**

XLR-Installation Jack

MALE

- 3-pin XLR-installation-jack
- Latching device
- Robust metal-diecast case
- Colour: black
- Typ: D

XLR-Installation Jack, black **XLR-503 M**

Jack Plug 6,3 mm (stereo), silver

MALE

- 3-pin 6.3 mm stereo jack-plug
- Self adjusting clamps as strain relief
- Cable-bend protection through vulcanised rubber ending
- Robust, nickel-plated metal-diecast case
- Colour: silver, black

Jack Plug (stereo), silver **JC-103 MS**

Speaker-Coupler

MALE

- 4-pin Speaker-coupler
- Strain Relief; for cable diameter from 5 mm up to 15 mm
- Ampacity max. 30 A
- Wire-cross-section max. 4 mm²
- Colour: black, blue

Speaker-Coupler, black **SPC-204 M**

Speaker-Installation Socket (4-pin)

FEMALE

- 4-pin Speaker-installation-jack
- Robust plastic cabinet
- Colour: black
- Typ: D

Speaker-Installation Socket, (4-pin) **SPC-104 F**

XLR Cable

MALE

- 2-pin Speaker-speaker-cable
- 10 m long
- Speaker / Speaker-jack with locking device
- Strain Relief with cable-bend protection
- Wire-cross-section 2x 2,5 mm²
- Colour: black, blue

Speaker Cable, 10 m ACC-107

Speaker Cable, desired length

MALE

- Sold by meter, up to 40 m
- 2-pin Speaker-loudspeaker-cable
- Length depending on allegation (e.g. ACC-108/1 for 1m)
- Speaker / Speaker-jack with locking device
- Strain Relief with cable-bend protection
- Wire-cross-section 2x 2,5 mm²
- Colour: black, blue

Ihre Wunsch-Kabellänge
(bis max. 40 m)

Speaker Cable, [desired length] ACC-108/xx

XLR Cable

MALE

FEMALE

- Bal. XLR-Cable (connector / inline jack)
- Strain Relief with cable-bend protection
- Cable diameter: 6 mm
- Cable color: black

XLR-Cable, 5 m ACC-050

XLR-Cable, 10 m ACC-100

Cable Jack Plug 3,5 mm (stereo) on 2 x Cinch (L/R)

MALE

- Cable 3.5 mm stereo jack plug on cinch L/R
- Fused with cable-bend protection

Most common application: sound-card-output of a computer on compact-amplifier-inputs.

Cable Jack Plug 3,5 mm on 2 x Cinch, 5 m ACC-054

Cable 2x Cinch (M) (L/R) on 2x Cinch (M) (L/R)

MALE

- Cable cinch plug L/R on cinch plug L/R
- Fused with cable-bend protection

Cable 2x Cinch (M) on 2x Cinch (M), 3 m ACC-061

AUDIO-SYSTEMS

UHF WIRELESS-MICROPHONE SYSTEM

Mobile- or fixed installation for:

- Exhibitions and Fairs
- Seminars and Schools
- Stage Church and Sporting Events

FREQ
4x16

Picture: Full extension of the UR-016 (+ 4 modules URM-016)

- True diversity technology
- Available in 2 frequencies
- 620-640 MHz + 863-865 MHz

The module carrier UR-016B / C can be equipped as required with up to 4 receiver modules URM-016B / C. The 4-channel UHF system is offered in 2 frequency ranges. This results in the use of multiple systems, the ability to operate up to 8 microphones at the same time. The True Diversity technology also achieves the best results in problematic broadcasting environments.

- Very small space requirement with only one height unit
- Four balanced XLR outputs and one additional mix-out
- Internal active antenna splitter
- Removable antennas for mounting in 19" cabinets

★

Information about the frequencies:

The frequencies used are generally assigned for professional users. It is no longer necessary to register for use.

Basis version: UR-016 without modules (URM-016)

4-tray Module carrier, (863-865 MHz) UR-016B
 for up to 4 pcs. URM-016B, incl. power supply, 19" angle and antennas

4-tray Module carrier, (620-640 MHz) UR-016C
 for up to 4 pcs. URM-016C, incl. power supply, 19" angle and antennas

Technical data	UR-016B	UR-016C
Frequency Range	863 – 865 MHz (16 frequencies)	620 – 640 MHz (16 frequencies)
Functional principle	True Diversity	
Operating principles	> 100 dB	
Signal-to-noise ratio	50 Hz – 15 KHz	
Frequency response	< 0,5 % (at 1KHz)	
Distortion factor	„NoiseLock“ Squelch	
Squelch	MIC = XLR sym.; -10dB	
Audio-Output	LINE = jack plug (6,3 mm) unbal.; -10dB	
Antenna	TNC-Connector, removable	
Power supply	12 V DC via power supply	
Scope of supply	Module carrier (4-tray), power supply unit, antenna, 19"-Angle	
Dimensions / Weight	W 420 mm x T 180 mm x D 44,3 mm (H); approx. 3 kg	

UHF-Receiver Module

UHF receiver module in true diversity technology for installation in the UR-016B / C. The display is used to display the selected channel. Per UR-016 base unit, a maximum of four receiver modules can be installed.

UHF-Receiver Module, (863-865 MHz) URM-016B
 Extension module with 16 frequencies for UR-016B

UHF-Receiver Module, (620-640 MHz) URM-016C
 Extension module with 16 frequencies for UR-016C

UHF-Wireless Hand Microphone

CE 0336
CE 0336D

Description

This UHF-Hand Microphone is equipped with a premium condenser microphone capsule. It is a very handy microphone. The 16 frequencies can easily be adjusted via a comfortable Dip-switch. The power supply results from 2 Mignon-Batteries.

Technical data	UH-016B	UH-016C
Carrier frequency	863 – 865 MHz (16 frequencies)	620 – 640 MHz (16 frequencies)
Modulation	FM	
Transmission	PLL synth.	
RF Output Power	10 mW	
Frequency response	50 Hz – 18 kHz	
Microphone type	Condensator	
Power supply	2 papprox. Mignon (1,5V; AA) or accu (1,2 V, AA)	
Transmission range	approx. 50 – 80 m	
Dimensions / Weight	Ø 30 mm x L 290 mm; 230 g	

UHF-Hand Microphone, (863-865 MHz) UH-016B

UHF-Hand Microphone, (620-640 MHz) UH-016C

Neckworn Microphone

3-pin MINI XLR

Very comfortable condenser-neckworn-microphone conducted in the characteristic of a kidney. Due to the low dead-weight and the flexible material this microphone fits all head shapes perfectly. Available in the colours “skin-colour” and “black”.

Neckworn Microphone, skin-color. HS-200 S

Neckworn Microphone, black HS-200 B

UHF-Bodypack-Transmitter

CE 0336
CE 0336D

3-pin MINI XLR

for LA-200 B
or HS-200 S/B

Description

Body pack-Transmitter with 16 eligible frequencies. The input sensitivity is changeable in order to be able to induct Mic- and Line signals. The power supply results from 2 Mignon-Batteries.

Technical data	UB-016B	UB-016C
Carrier frequency	863 – 865 MHz (16 frequencies)	620 – 640 MHz (16 frequencies)
Modulation	FM	
Transmission	PLL synth.	
RF Output Power	10 mW	
Frequency response	50 Hz – 18 kHz	
Microphone type	mini-XLR 3-pol.	
Power supply	2 papprox. Mignon (1,5V; AA) or accu (1,2 V, AA)	
Transmission range	approx. 50 – 80 m	
Dimensions / Weight	W 70 mm x H 100 mm x D 18 mm; 100 g	

UHF-Transmitter, (863-865 MHz) UB-016B

UHF-Transmitter, (620-640 MHz) UB-016C

Lavalier Microphone

3-pin MINI XLR

Condenser microphone completed in ball-characteristic. Delivery includes an 80 cm long connecting cable and a clip. The microphone is very discreet and you can fix it on your clothes wherever you want. It is available in the colour black.

Lavalier Microphone, black LA-200 B

Accessories

19"-Rackmount Set for 1 pcs. UR-016

19" brackets for antenna mounting on one receiver unit (1 RU).

Mounting-Set . **RU-502T** 1 RU, for 1 pcs. UR-016

Microphone-Holder for microphone UH-016

AUDIO-SYSTEMS

UHF WIRELESS-MICROPHONE SYSTEM

Mobile or fixed installation for:

- Exhibitions and Fairs
- Seminars and Schools
- Stage, Church and Sporting Events

- New, long-term available frequency range
- Synchronization at the touch of a button
- True diversity technology for safe operation

The newest generation “F” of our successful UWR series provide the user with all the details required for safe operation and convenient handling. Made in the latest SMD technology and equipped with a large display that clearly displays all relevant information.

The Auto-Scan function reliably finds interference-free channels and enables the highest transmission quality even in simultaneous operation. The use of the new 630-660 MHz frequency range will ensure operation beyond year 2025.

The matching transmitters UWH-701 F and UWB-700 F are adapted to the receiver in a matter of seconds via the integrated synchronization function.

- True Diversity system for very wide range and stable reception.
- Deductible BNC antennas for use of signal amplifiers, e.g. AB-200 B.
- When upgrading to multi-channel systems, 8 UHF systems can be used simultaneously

Information about the frequencies:

The frequencies used are generally assigned for professional users. It is no longer necessary to register for use.

Technical data	UWR-701 F
Frequency Range	630 – 660 MHz (700 Frequencies)
Operating principles	True Diversity
Signal-to-noise ratio	> 94 dB
Frequency response	50 Hz – 15 KHz
Distortion factor	< 1 % (at 1 KHz)
Squelch	„NoiseLock“ Squelch
Audio-Output	MIC = XLR balanced; -20 dB LINE = jack (6,3 mm) unbalanced, 0 dB
Antenna	BNC-Connector
Power supply	12 V DC via power supply
Scope of supply	Receiver, power supply unit, Antenna, cable (jack)
Dimensions	W 200 mm x D 175 mm x H 44.3 mm
Weight	approx. 1 kg

UHF Antenna-Splitter, Booster and external Antenna

Multi-channel-systems can be assembled with accessory components. The splitter AS-200 B (19", 1 RU) manages up to 4 transmitters UWR-701 F. The booster AB-200 B provides sufficient amplification (+9dB) as an external cable driver.

External UHF-Antenna, (pair)	AN-200 B
UHF-Antenna-Booster, (pair)	AB-200 B
UHF-Antenna-Holder, (pair)	AH-200 B
UHF-Antenna Splitter, 1 RU	AS-201 B
19"-Rack Assembly-Set, for front-assembly the antenna	RU-203 B

UHF-Receiver, 700 frequencies, (630-660 MHz) **UWR-701 F**
complete with mains adapter and antennas

1 CHANNEL-SYSTEM / 700 FREQUENCIES

RCS

UHF-Wireless Hand Microphone

UHF handheld microphone, specifically designed with high-quality condenser capsule for voice transmission. The LCD display indicates the battery status and the current channel. The use of the latest technologies to enable a very low power consumption.

The frequency synchronization with the UHF receiver UWR-701 F is easily performed using the sync button.

Technical data	UWH-701 F
Carrier frequency	630 – 660 MHz (700 frequencies)
Modulation	FM
Transmission	PLL synth.
RF Output Power	10 mW
Frequency response	50 Hz – 15 kHz
Microphone-type	Kondensator
Power supply	2x Mignon (1,5V; AA)
Transmission range	80 – 100 m
Dimensions / Weight	Ø 44,3 mm x L 250 mm; 300 g

UHF-Hand Microphone, (700 frequencies) UWH-701 F

Neckworn Microphone

Very comfortable condenser-neckworn-microphone conducted in the characteristic of a kidney. Due to the low dead-weight and the flexible material this microphone fits all head shapes perfectly. Available in the colours “skin-colour” and “black”.

Neckworn Microphone, skin-color. HS-200 S
Neckworn Microphone, black HS-200 B

UHF-Bodypack-Transmitter

Bodypack transmitter to use the headset microphone HS-200B/S or the lavalier clip LA-200B. The input sensitivity of the bodypack transmitter is adjustable. This allows the use of microphones and transmission line signals.

The frequency synchronization with the UHF receiver UWB-700 F is easily performed using the sync button.

Technical data	UWB-700 F
Carrier frequency	630 – 660 MHz (700 frequencies)
Modulation	FM
Transmission	PLL synth.
RF Output Power	10 mW
Frequency response	50 Hz – 15 kHz
Max. deviation	± 48 kHz
Power supply	2x Mignon (1,5V; AA)
Transmission range	80 – 100 m
Dimensions / Weight	W 65 mm x H 100 mm x D 27 mm; 150 g

UHF-Bodypack, (700 frequencies) UWB-700 F

Lavalier Microphone

Condenser lavalier microphone completed in ball-characteristic. Delivery incl. 80 cm cable and clip. The microphone is due to its size very discreet and can clip it to your desired location on the clothing. Available in the color black.

Lavalier Microphone, black LA-200 B

Accessories

19"-Rack Mounting-Set for one UWR-701 F

19" brackets for one Receiver unit (1 RU).

Mounting-Set ... RU-401
1RU, for one UWR-701 F

19" mounting bracket for mounting the antenna (BNC-Connector) on the front of one Receiver unit.

Mounting-Set . RU-401 B
1RU, for one UWR-701 F

50 ohms antenna cable, equipped with BNC-Connectors. To install the UHF antenna in a distance (in your order please declare the desired cable length, max. 10 m).

Antenna cable, [desired length] ACT-050/xx BNC

Microphone-Holder for UWH-701 F

The holder comes with a $\frac{3}{8}$ " and $\frac{5}{8}$ " thread.

Mic.-Holder MH-800
for wireless Hand microphones

UHF-Antenna-Holder

Ant.-Holder AH-200 B
(pair)

UHF-Antenna-Booster

+9dB

Ant.-Booster... AB-200 B
(pair)

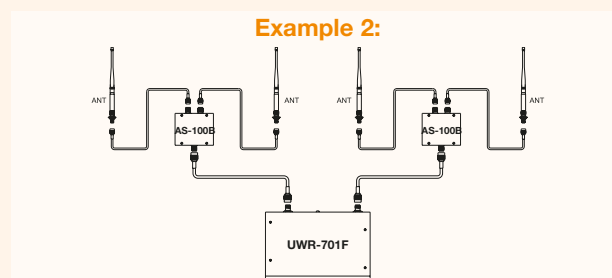

Accessories

Splitter- and Combiner-Set AS-100

Depending on the application can be using the AS-100 set to reduced or doubled the number of antennas.

By using 2 St. UHF receivers in just 1 RU, it is useful to reduce the number of antennas accordingly (eg when using the 19" Rack Mounting-Set RU-203 B). If the antennas are installed on a panel front and the cable length is about 10 m, it is recommended to use the additional signal amplifier AB-200 B.

Broadcasting in technically difficult areas such as angled buildings, but also on large areas such as athletic fields or arenas, it may be useful to increase the number of antennas, so as to ensure a uniform, comprehensive signal stability. For cable lengths over 10 meters may cause interference, so an additional signal amplifier AB-200 B is recommended.

Splitter- and Combiner-Set AS-100
contain 2 pieces

Active Directional Antenna for UWR-701 F

UHF directional antenna with integrated signal booster (+10 dB). The receiving area can be optimized through aligning of the antenna. RF interference outside the beam width can be effectively excluded. Suited to the optional AH-300 antenna bracket for wall, ceiling or tripod mounting.

Active Directional Antenna AN-300 B
Antenna-Holder AH-300
for AN-300 B, with 3 / 8" thread for wall, ceiling or tripod mount

TOUR GUIDE-SYSTEM

UHF-*wireless*

RCS[®]
AUDIO-SYSTEMS

Ideally suited for:

- City Tours
- Operational facilities or Museums
- Presentations of any kind

FREQ
16

Registration free operation!

Simultaneous operation of up to 3 systems
Presentations and Industrial Management
Multilingual Conferences

Description

Tour guides in castles and museums, factory tours or product presentations – these are the applications for the new UHF transmission tour-guide system.

The use of UHF technology and high-quality microphones guarantees a clear speech transmission at the highest level.

An additional signal input at the transmitter enables you to feed parallel to the transmission additional music or speech prepared texts.

In connection with the offered accessories an individual function set can be assembled and, if needed, extended.

- 16 frequencies – Registration free operation
- Low power consumption
- Volume control on the transmitter and on the receiver
- Line input for supplying additional signal as sample music or prepared texts
- Line output for further signals processing such as recording and documentations of a presentation.
- Display for the channel, the battery status and signal strength

Example of use: MOBILE TOUR-GUIDE SYSTEM

The mobile **TRANSMITTERS** (for Tour-Guide System) are either available:

VICBOSS SERIES

RCS[®]
mobile sound

- Kindergartens
- Classroom
- Small presentations
- Training rooms

bt wireless
connection

- MP3 multiplayer with recording function
- BT function
- Remote Control

Our PWA series smallest member - really big!

The new PWA-103 was specifically developed for the schools and in particular for the sound reinforcements in the classroom.

The device is standardly equipped with multiplayer, whose media data can be played back via USB, SD card or BT. The recording function is also integrated.

The visually appealing MDF housing has a very robust design and, in conjunction with the 5.25 inch full range speaker, ensures a natural and clear sound.

★

Note: This amp is designed for daily and ongoing school and classroom use. To ensure the uncompromising continuous operation, we have dispensed with a battery in this version. The device is maintenance-free and always ready for use.

Technical data	PWA-103
Program power / RMS	40 W / 20 W
Power supply	via included DC power supply (15V 3.3 A)
Speaker	5.25" Full Range Speaker
Signal inputs	Line cinch, MIC jack 6,3 mm
Signal outputs	Line out cinch
Housing	MDF
Colour	mint-green high gloss
Dimensions (WxHxD) / Weight	210 x 200 x 220 mm, 2,5 kg

Please consider the following features:

- Small, light and handy.
- Very robust MDF housing.
- Mains operation, therefore suitable for continuous use.
- Signal input for the connection of PC or smartphone.

Model designation

SCHOOL-CUBE 100, 40W

PWA-103

SCHOOL-CUBE Accessories:

Dynamic Microphone

Great quality dynamic Handmicrophone with kidney characteristics. It does not have back coupling problems and wind- and pop-protection are integrated. A low-noise On- and Off-switch is integrated on the handle. Included in the delivery is a 5 m cable and a microphone holder.

Dynamic Microphone, jack-plug, sym... **DM-202 K**

Carriage and Storage Cover

Weatherproof, high-quality vinyl fabric cover for carriage, while use and storage of the SCHOOL-CUBE 100. With removable pocket for accessories.

- **VHF-receiver system (registration free)**

Our new development for kindergartens, school classes and audience groups:

The PWA-104 has a multidirectional speaker system that delivers the sound evenly in three different directions. Hearing loss and intelligibility due to the narrow angles of the beam is now a matter of the past.

The device is standardly equipped with multiplayer, whose media data can be played back via USB, SD card or BT. The recording function is also integrated.

The visually appealing MDF housing is designed very robust and, in conjunction with the three 5.25-inch broadband speakers, ensures a natural and clear sound.

The included VHF receiver operates in the signal-free and signal-stable frequency range.

Note: This amp is designed for daily and ongoing school and classroom use. To ensure the uncompromising continuous operation, we have dispensed with a battery in this version. The device is maintenance-free and always ready for use.

- **CD/MP3-multifunction player**
- **BT-function**
- **VHF-receiver system (registration and free of charge)**
- **Powerful sound**

The technically mobile speaker and amplifier system SCHOOL-CUBE 700 presents itself in modern piano lacquer design, impresses with rich and crystal-clear sound, high battery life and overloading protection. This device is ideal for larger classrooms, lecture halls or sports halls.

The standard integrated multifunction player with BT module supports all common formats and functions. Further, the player has a “recording” function on USB or SD card and “pitch control” in order to affect the playback speed.

Technical data	PWA-730 B U1/U2
Program power / RMS	85 W / 50 W
Power supply	15V 3.3 A
Battery	12V / 7.2 Ah
Operating time battery	6 - 8 hours
Speaker	6,5" Full Range
Inputs	Line in cinch; Line in XLR/jack
Outputs	Line out cinch; Speaker Out jack
VHF-Receiver	174-216 MHz, registration-free
Tone regulation	double
Case/Colour	MDF; glossy black
Dimensions (WxHxD); Weight	240 x 280 x 245 mm; 8,0 kg

Model designations:

SCHOOL-CUBE 700, 85W **PWA-730 B U1**
with integrated Multifunction-player and 1-channel VHF-receiver system

SCHOOL-CUBE 700, 85W **PWA-730 B U2**
with integrated Multifunction-player and 2-channel VHF-receiver system

Depending on the desired version, the school cube has 1 or 2 VHF-receivers for using VH-200 (hand microphone) or VB-200 (bodypack). It can be connected to a headset or a clip on microphone.

A VHF receiver system is used with frequencies are which in Germany in the registration-free and interference-insensitive area.

Please consider the following features:

- CD/MP3/BT multifunction player with adjustable playback speed.
- Two device versions for single or dual channel microphone operation.
- Robust and sound-optimized MDF housing.
- Intelligent battery status indicator.

★

VHF-Receiver

The frequencies of the VHF module are in the range of 174-216 MHz and are therefore EU-wide registration-free.

DIGITAL SOUND-CENTER 100

RCS[®]
mobile sound

- Seminars and conferences
- Advertising and sales promotion
- Exhibitions and fairs
- Hotels and sporting events
- Schools and presentations

optional with:

- Trolley function
- Powerful class D amplifier
- True diversity
- VOICE-OVER function

The little brother of the Digital Sound-Center DSC-150 has it's all basic functions and expansions options. The unit convince with rich, crystal-clear sound in its category.

The 100W RMS amplifier is implemented in class D technology, thus offering an exceptionally good efficiency. The resulting low power consumption ensures very good endurance when operated on battery power, especially for the amount of power that's offered here.

The pre-assembled wheels and the pull out handle make it easier to transport the unit.

The basic unit DSC-101 can be equipped as needed with up to two UHF receiver modules (U1/U2) or a pass device. It can be selected between a multi-functional player and a digital USB/SD recorder. Instead of a UHF receiver module the unit can be also equipped with the optional BT module DSM-2x00BT.

★

The following basic models are available:

DIGITAL SOUND-CENTER* **DSC-101**
Basic version, without UHF-receiver module

DIGITAL SOUND-CENTER* **DSC-101 U1**
with integrated 1-channel UHF-receiver

DIGITAL SOUND-CENTER* **DSC-101 U2**
with integrated 2-channel UHF-receiver

Replacement Battery Set, 5.4 Ah (for DSC-101/150) **BA-035**

*The Sound source modules are optional available.

Modules for DIGITAL SOUND-CENTER:

When ordered with a sound source module the DIGITAL SOUND-CENTER is fully assembled and ready for operation.

CD/Mp3/USB/SD-Card Player **DSM-003 CD**
with **pitch control** and remote control. Player for playing commercial formats, integrated pitch control to affect the playback speed.

UHF-Receiver Module True-Diversity technology **DSC-016 B**
for upgrading, 16 selectable frequencies (863-865 MHz)

BT-Module **DSM-100 BT**
for upgrading, for audio transmission from Smartphone, Tablet or PC

- Noble design
- VHF-Wireless Technology
- Music & Speech
- 2-Way Speaker System

The new successor of our successful SOUND-DESK series: the SOUND-DESK 2 – great in sound and design, versatile and powerful.

With this elegant lectern you not only gain in terms of appearance, but technically the SD-220 also sets new standards.

The integrated 2-way loudspeaker system is convincing not only in speech. Thanks to the new concept, the reproduction of music is now also possible in outstanding quality. The device is therefore suitable for audio lectures of all kinds at schools, in presentation rooms, at fairs and exhibitions, as well as for advertising and sales events.

The integrated gooseneck microphone is 47 cm long and flexibly adjustable. It also allows changing speakers of different sizes a comfortable standing position. The high quality electret capsule of the microphone also ensures a comfortable speaking distance.

We supply the SD-220 with a 2-Channel radio system, where you can operate the wireless hand microphone and the bodypack with headset microphones if necessary at the same time.

Model designations

SOUND-DESK 2, max. 120 W, black **SD-220**
with integrated 2-channel VHF wireless microphone receiver

Please consider the following features:

- A high-quality gooseneck microphone and the table lighting are already included.
- Music signal feed via smartphone, laptop or PC.
- Noise-free through the use of digital power amplifier.
- Scratch-resistant and anti-slip shelf.
- 2-channel radio set incl. VH-016 and VB-016 already included in delivery.

SOUND-BELT 2

PORTABLE VOICE AMPLIFIER

RCS®
mobile sound

- Ultra-compact - only 210g
- Electronic Voice optimized
- 20 watts of power

Technical data	SB-020
Output rate/RMS	20/10 W
Power supply	Li-ion battery 7.4 V, 1000 mAh
Battery lifetime	8 – 16 hours (volume dependent)
Reach	up to 30 persons
Dimensions and Weight	W 88 x H 105 x D 35 mm; 210 g
Colour	black

Description

The new compact and inconspicuous but powerful voice amplifier SB-020 is optimized for voice transmission and therefore very suitable for teachers and lecturers.

The device has an internal charging circuit and, as a result by the use of a Li-ion battery, the charging process is very comfortable. A possible overcharge is reliably prevented by the integrated overcharge protection, so that the device is always ready for use. The battery life is 8-16 hours, depending on the volume setting.

If necessary, music signals from mobile phones, laptops, or MP3 players could be used via the „Line-in“ input signal. The required audio cable is included.

★

Also included in delivery box:

- + Comfortable headset microphone
- + Hand microphone
- + Belt-clip and Lanyard
- + Audio cable for „Line-in“ input (130 cm)
- + Power cable (mini-USB)

WPP-050 U1

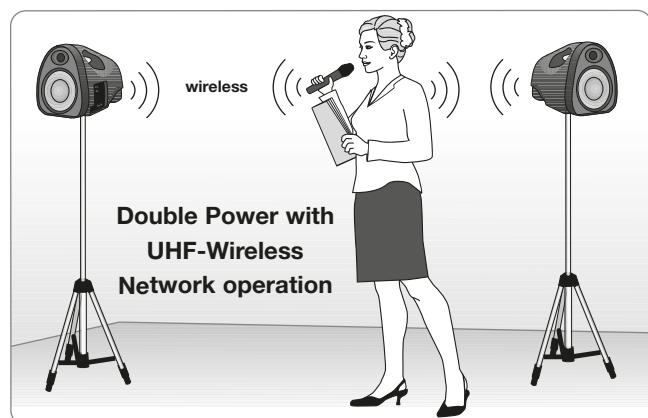

- Very mobile due to small empty weight
- Wireless UHF technology (16 frequencies)
- Long-lasting lead-gel storage-battery
- Parallel operation of multiple devices possible
- In combination with the LST-050, usable as an procession system

Description

It is possible to expose smaller groups with up to 100 people adequately to supersonic sounding, with this mobile voice transmission system. The small empty weight eases the handling of this device and therefore allows operation during longer lasting events.

The integrated UHF-System promises absolute flexibility and additionally allows the choice between 16 frequencies.

It can be switched to a trouble-free frequency immediately. The UHF-Handmicrophone UH-016B as well as the UHF-Bodypack UB-016 is available as a receiver. The Bodypack can be combined with a Headset- or a Clip-on microphone.

Technical data	WPP-050 U1/U2
Program power / RMS	50 W / 30 W
Power AC	230 V (mains supply ~19V); 12 V battery, 2.9Ah
Operating time Battery	approx. 3 hours
Inputs	1 x MIC (wireless), 1x MIC (jack 6,3 mm), 1 x AUX (jack 3,5 mm)
Outputs	LINE Out 0dB
Frequency	60 Hz ~ 15.000 KHz
UHF-Receiver System	16 frequencies (863 – 865 MHz); max. 2 Receiver
Tone regulation	single EQ
System/distortion factor	< 0,1%
Speaker	5 1/4", 4 ohms
Case	ABS
Dimensions / Weight	W 160 x H 210 x D 290 mm / 3,3 kg

For the incoming supply of further signals the AUX-input can be used. Offhand music can easily be imported e.g. with a MP3-Stick.

In case the power of a single device should not be sufficient, or the number of people to be exposed to acoustic irradiation cannot be estimated, it is useful to place a second device adequately. Naturally both devices can be addressed via a Hand- or Bodypack transmitter, of course using the same frequency.

PCS-600 PORTABLE COMPACT-SYSTEM

COMPACT PA-SYSTEM FOR MOBILE OPERATION

RCS

600W
2 SPEAKER SYSTEM

UHF-SYSTEM:
Registration and
Free of charge!

- Compact PA-System
- Mobile usage for up to 600 listeners
- Wireless UHF technology (expandable to 4-channel)

This mobile PA-System PCS-600 has **2x 300W** (RMS) performance and is suited for professional sounding for up to 600 people. Optimal results can be achieved through carefully selected, complementary components. This compact and user friendly system can be ready for operation within a few minutes. The mobile set of wheels makes handling very easy with little effort.

Please consider the following:

The PCS-600 System will be delivered fully assembled and is best suited for mobile usage as well as stationary operation.

This system includes the following components:

- 1x PMX-614 Power Mixer 2x 300W (RMS)**
Including 14 input-channels (6x Mono-CH) and diversity of outputs
- 2x QRF-212 Professional 2-Way Speakers**
Full Range, including 10m Connection cables each
- 2x Floor Stands**
Adjustable height from 115 cm up to 200 cm
- 1x CD/MP3/SD-Card/USB player**
with pitchable CD player and remote control
- 1x UHF Receiver-System, 1-Channel**
16 frequencies (registration free), with wireless Hand microphone optionally expandable up to 4 channels (see UR-016B/C on page 238)
- 1x Professional Angle-Flightcase**
19", 10 RU, incl. rack rail lifting device on the top and mobile set of wheels
- Various Accessories**
Including Rack drawer, Connection Cable, Power splitter, etc.

ation. Please extract further technical data regarding the individual components from our main catalogue.

MEGAPHONE

Description

Very handy transistor-megaphone with a bundled, impact and scratch resistant horn (ABS). The megaphone is feedback reduced, speech button and volume control are easy to handle. The model HM-012S has an additional alert siren curve (repeat).

Please consider the following features:

- Pistol grip with carrier strap
- Siren signal switchable

Technical data	HM-012/S
Output rate	max. 12 W
Power supply	8 Mignoncells (UM-3)
Battery lifetime	normal use up to 6 hours
Reach	outdoors up to 500 m
Dimensions/Weight	Ø 190 mm, L 315 mm; 1.0 kg
Colour and Material	fire brigade red; ABS

Hand Megaphone **HM-012**
Hand Megaphone, with siren **HM-012S**

Storage box

This practical storage box for wall mounting is outstandingly suitable for the safe placement of the megaphones M-012/S, HM-025/S and SM-025/S. The sturdy box is manufactured from high-quality multiplex wood and has additionally a transparent door consisting of plexiglass. The door can be locked by the attached hinge with a lock or a seal.

Please consider the following features:

- Sturdy housing made of 7 mm strong multiplex wood
- Mounting possible at every wall
- Improves the safety, as the megaphones which serve particularly as a signaler in public utilities, are easily accessible in case of an emergency

★

Storage box, (W 300 x H 400 x D 220 mm) approx. 2,5 kg **ABB-400**

MEGAPHONE

Hand megaphone
max. 25 W

Description

The unique water-protected hand megaphones (WHM-series) are designed for security agencies and fire brigades. Especially made for the robust employment in water sports and ideal for the use on boats.

The clear speech comprehensibility, the water resistance and the the high-quality housing make this megaphones indispensable. The transparent horn increases the field of view. Both models are very handy, extreme lightly and easy to handle.

- The model WHM-025S has an additional alert siren curve (repeat)
- Protection type **IPX4 compliant to IEC 60529**
- Feedback reduced by optimized directivity

Technical data	WHM-025/S
Output rate	max. 25 W
Power supply	6 Babycells Typ C (UM-2)
Battery lifetime	normal use up to 6 hours
Reach	outdoors up to 1000 m
Protection type IEC 60529	degree 4 (IPX4)
Dimenstions/Weight	Ø 208 mm, length 320 mm; 1,1 kg
Colour and Material	WHM-025: light blue, WHM-025S: red; ASA-plastic

★

Hand Megaphone, light blue **WHM-025**

Hand Megaphone, red with siren signal **WHM-025S**

Storage box

This practical storage box for wall mounting is outstandingly suitable for the safe placement of the megaphones WHM-025 and WHM-025S.

The sturdy box is manufactured from high-quality multiplex wood and has additionally a transparent door consisting of plexiglass. The door can be locked by the attached hinge with a lock or a seal.

Please consider the following features:

- Sturdy housing made of 7 mm strong multiplex wood, for dust and dirt protection
- Mounting possible at every wall or to set up simply
- Improves the safety, as the megaphones which serve particularly as a signaler in public utilities, are easily accessible in case of an emergency

★

Storage box, (W 300 x H 400 x D 220 mm) approx. 2,5 kg **ABB-400**

MEGAPHONE

Hand Megaphone max. 25 W

siren signal
optional: 

Hand Megaphone **HM-025**
Hand Megaphone, with siren signal **HM-025 S**

Description

Powerful transistor-megaphone with a bundled, impact and scratch resistant horn (ABS).

The characteristics of the built-in microphone makes feed-back nearly impossible. Speech button and volume control are easy to handle.

The megaphone is ideal for the use at events, in swimming halls and on building sites.

Please consider the following features::

- Easy handling
- Pistol grip with carrier strap

Technical data	HM-025/S
Output rate	max. 25 W
Power supply	6 Babycells (UM-2)
Battery lifetime	normal use up to 8 hours
Reach	outdoors up to 1.000 m
Dimensions/Weight	Ø 211 mm, L 375 mm; 1,6 kg
Colour and Material	pearlwhite-lightbrown with red signal stripe; ABS

Shoulder Megaphone max. 25 W

siren signal
optional: 

Shoulder Megaphone **SM-025**
Shoulder Megaphone, with siren signal **SM-025 S**

Description

Powerful transistor-megaphone with a bundled, impact and scratch resistant horn (ABS).

The characteristics of the built-in microphone makes feed-back nearly impossible. Speech button and volume control are easy to handle.

The megaphone is ideal for the use at events, in swimming halls and on building sites.

Please consider the following features:

- Hand Microphone with fitted helix cable
- Speech shift-lock and volume control on the microphone

Technical data	SM-025/S
Output rate	max. 25 W
Power supply	6 Babycells (UM-2)
Battery lifetime	normal use up to 8 hours
Reach	outdoors up to 1.000 m
Dimensions/Weight	Ø 211 mm, L 375 mm; 2,4 kg
Colour / Material	pearlwhite-lightbrown with red signal stripe; ABS

MEGAPHONE

POWER-Shoulder Megaphone
max. 40 W

siren signal
optional:

Also as Hand Megaphone

The removable microphone can also be attached to the rear of the megaphone, where it can be operated. This enables the use as a hand megaphone.

Description
Very stable high-power megaphone with max. 40 W. Especially suitable for security use.
The microphone has a volume control and a shift-lock speech button. Due to the characteristics of the microphone the feedback noise is extremely well suppressed.
The megaphone has a 12 V connector for power supply or car battery, stand assembly (s. below) is possible.

Please consider the following features:

- Rechargeable use with trickle charge in the megaphone.
- 12 V car adapter in scope of supply

Technical data	SM-040S
Output-rate	max. 40 W
Power supply	8 Babycells or NiMH rechargeable batteries
Battery lifetime	permanent operation 5 hours
Reach	Outdoors up to 1500 m
Dimensions/Weight	Ø 313 mm, L 435 mm; approx. 2.5 kg (without batteries)
Colour and Materials	ABS, white
Tripod connection	M8 internal screw
Input	12 V power supply & charger socket
Siren signal	curve repeat

POWER-Shoulder Megaphone, with siren signal, max. 40 W, for battery- and rechargeable use **SM-040 S**
Delivery: without battery u. charger

Carriage and Storage Case
The case with handle made of sturdy aluminum composite material. Equipment with foam offers enough space for the shoulder megaphone SM-040 S and other accessories.

With edge protection made from robust all-round aluminum frame profile.

Carriage and Storage Case **MK-040**
for SM-040 S with accessories

Nickel-Metal-Hydride Accu-Kit
This product can be equipped with NiMH-Accus and stay in the megaphone while charging.

Accu-Set **NH-040**

Accu-Charger for NH-040
Special charger for NH-040. Software controlled charging.

Accu-Charger **LG-040**

THE ADVANTAGES OF VOICE EVACUATION

A Life saver in any case of an emergency!

An electroacoustic evacuation system is crucial to deliver clear alarm messages and avoid panicking. This ensures a much quicker and safer evacuation of a building than with sirens or bells.

Of course this security system has to be functional at all times. Requirements for functionality and monitoring of evacuation systems are therefore defined in the European norm **IEC 50849**.

MAIN FEATURES OF THE RCS SOLUTION

- **EN 54-4 / EN 54-16 / EN 54-24 / IEC 50849 (all certified)**
- **According to VDE-0833-4**
- Expandable in steps of 8 paging zones to a maximum of 224 zones
- Configuration via PC based software
- Backup of all configuration and setup data
- Up to 24 desktop call stations can be connected
- Speaker lines can be assigned freely to any zone
- Training courses by RCS for your staff

OPERATIONAL AREA – ANY POPULATED ENVIRONMENT

- Office and industrial premises
- Hotels, shopping malls
- Educational institutions like schools, universities etc.
- Sports arenas and gyms
- Stations, hospitals
- Theatres, museums, cinemas
- Theme parks and recreation centres
- Indoor and outdoor swimming pools

EFFECTIVE ALARMING FOR A QUICK EVACUATION

? Screaming sirens should warn us from danger.
But – what danger?
What are we to do, what is the danger actually?

Countless case studies and laboratory experiments have proven that people only react immediately and correctly to an alarm if enough information is provided about the reason and the seriousness of the alarm. Especially for persons who are in an unfamiliar environment clear and unmistakable instructions about what to do can and will be life-saving. If this vital information is missing, for example

»The unexcitedly spoken message of a voice evacuation (VAS) system communicates the need for action clearly.«

because they only hear a siren tone instead of a spoken warning message, people will most likely react in an unfavourable manner or even ignore the alarm completely.

Not open fire is the greatest hazard in a building, but smoke and toxic gases. Therefore most casualties occur during the early phase of a fire, during the

smouldering fire phase. That's why a quick and orderly evacuation is the best way to save lives.

The unexcitedly spoken message of a voice evacuation (VA) system communicates the need for action clearly. The addressees react without hesitation and leave the building, before smoke has spread and blocked the escape. Panic will be avoided, and it's even possible to safely guide all people to their nearest emergency exit.

Additionally, rescuers is given the opportunity to communicate a changing situation directly to all persons still inside the building.

Voice evacuation of selected floors in a Hotel.

Indicated in this picture is the different reaction pattern to siren signals or a spoken message.

EN 54 FIRE ALARM SYSTEMS

While IEC 50849 as an application norm covers the evacuation system as a whole, EN 54 addresses the individual products this system comprises of. The demands for VA products are regulated in the following parts of EN 54:

EN 54-4 Power supply equipment

Crucial and new demand is mainly an ageing control for the accumulators by monitoring the internal resistance of the complete uninterruptible power supply. Additionally, the charging characteristic of the used accumulators has to be considered in the layout of the charger.

EN 54-16 Voice alarm control systems

Demands on the functionality of a VA system are very similar to IEC 50849. EN 54 enhances the older norm with a wide variety of tests to validate a high level of refractiveness against environmental impacts and durability under heavy load. Additionally, the demanded quality level for electrical and acoustical parameters has been raised substantially.

EN 54-24 Loudspeakers for Voice Alarm

Core parts of EN 54-24 are reviews of the production tolerances, long-term stability and corrosion resistance. The demands for refractiveness against environmental impacts have been raised substantially, too.

» RCS systems offer various possibilities to trigger a 'silent alarm'. «

» RCS evacuation solutions have been equipped with extra features, for example an extra channel to communicate directly with the central hub from any classroom. «

VOICE AND AMOK ALARM

GOOD TO KNOW ABOUT VOICE ALARMS, STANDARDS, 100V TECHNOLOGY AND RCS AUDIO SYSTEMS

RCS

THE RCS SOLUTION

Our experts for VA systems work hand in hand with engineering offices. They ensure that project engineers can benefit from new development and extended product features already in early stages of a system design to gain advantages in a highly price-sensitive market.

RCS's proven digital technology offers outstanding functionality and scalability, combined with the reliability and durability you can expect from a security installation. System racks can be provided fully assembled and preconfigured by our rack building department to minimize the effort for our customers and installers.

ADDED VALUE

A VA system is not only crucial in any case of emergency, it usually serves a multitude of every-day tasks, too. On top of the conventional paging features RCS evacuation systems have been equipped with the possibility to trigger a coded 'silent alarm' to address only the building staff.

Many tragic amok incidents in the last years have clearly shown that not only the police and private safety personal but also VA systems face a variety of new threads to deal with. RCS deals with these new demands by offering a direct channel to communicate with the main system hub from every classroom.

SAFETY CONCEPT FOR EMERGENCY SITUATIONS

DIRECT COMMUNICATION BETWEEN EMPLOYEES AND EXPOSED PERSONS

Intercom systems make it possible to communicate with the permanently occupied post and receive instructions in the event of an emergency.

Events such as rampages, as well as attacks on people in schools and public buildings, make it clear that the use of emergency and danger response systems (NGRS) can minimize risks.

In connection with a voice alarm (VAS), an emergency and danger response system provides substantial added value.

In addition to the security-relevant, fast and point-specific alerting in an emergency, a single system fulfils many important functions of everyday life. For example, the clock controls, the school gong, announcements or the sound of auditorium and sports halls.

DIN VDE 0827

The standard **DIN VDE 0827**, which has been in force since 1 July 2016, addresses precisely this issue.

In particular, to protect all persons in the building, Part 2 of the standard mentions requirements for emergency and danger-control intercoms (NGS) in public buildings, e.g. schools, universities, government agencies and similar institutions. These are used to transmit emergency and danger reports to a pre-designated service provider.

These are used to transmit emergency and danger reports to a relevant emergency service.

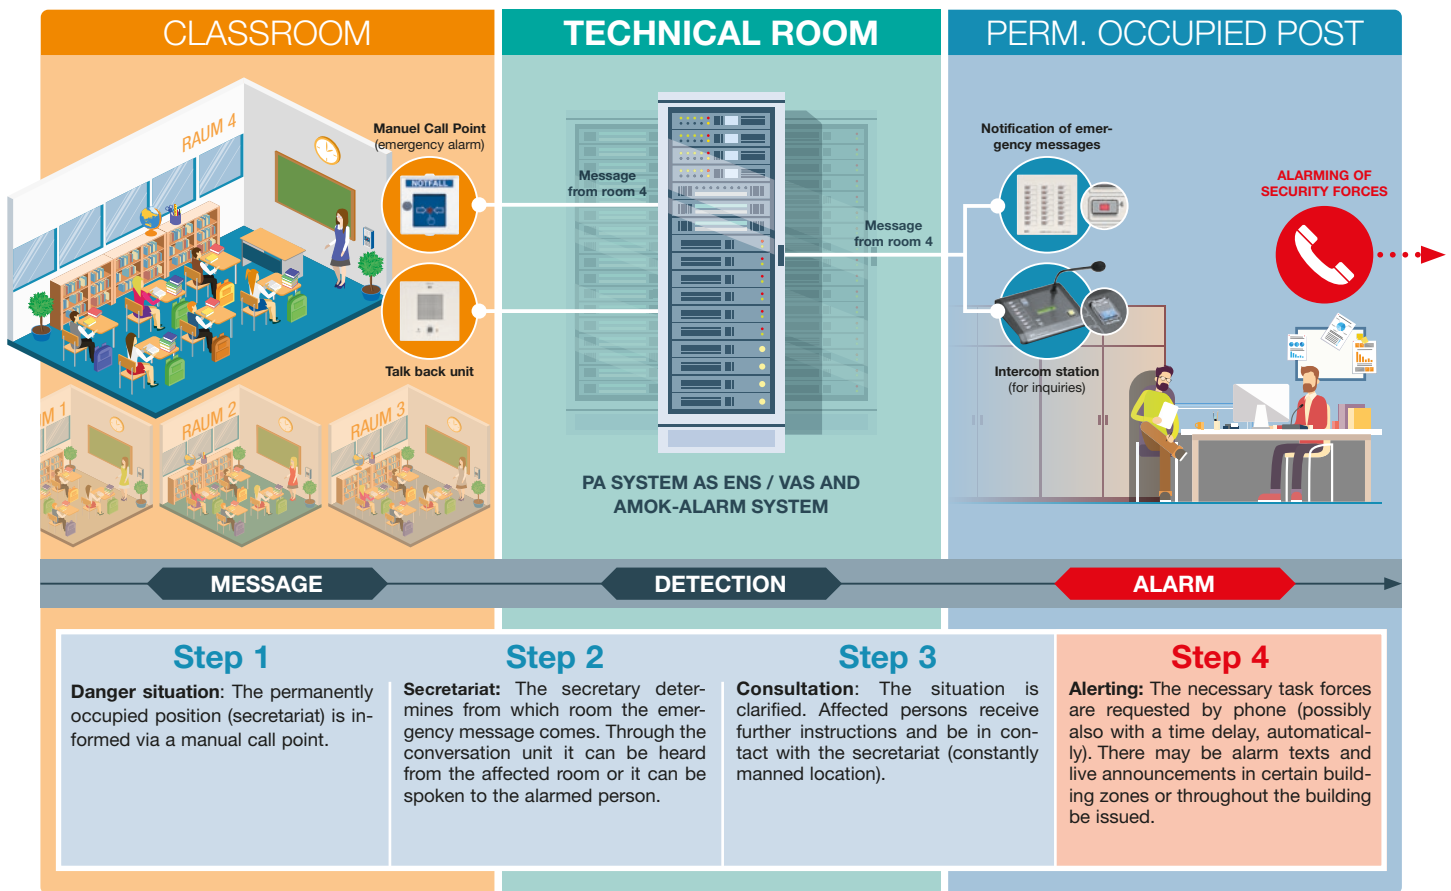

The Advantage of Emergency and Danger Intercoms (NGS):

In contrast to visual or acoustic alarms, an intercom system can be used to remotely evaluate the situation by voice communication and thus initiate appropriate intervention, protection and rescue operations. It can, for example, communicate directly from the classroom to the secretariat or defined emergency personnel.

The intervention forces can then use a NGS to selectively provide directions to different building zones or rooms and exclude parts of the building from announcements so as not to inadvertently warn potential offenders of police intervention.

»It can be e.g. communicated directly from the classroom to the secretariat or defined emergency personnel without calling the entire building through a group call ... «

Especially in complex dangerous situations, such as a possible rampage it represents, the VAS is far superior to a siren-based alarm system.

THE RCS ALL-IN-ONE SOLUTION ENABLES ...

... IN CASE OF EMERGENCY:

- + Alarm and emergency call
- + Speech dialogue with the control center or the emergency services - also in groups
- + Queries and discrete "listening in" in case of alarm
- + Triggering individual or automatic voice announcements

... EVERYDAY: (in connection with a VAS)

- + Announcement and call system
- + Clock systems and pause signal management
- + Sound system of auditorium, sports and gyms
- + Inductive loop system

STANDARDS SECURE QUALITY

Because of its life-saving purpose, a voice evacuation (VA) system should meet high requirements. Those are fixed in various norms. Not only the hardware is regulated, but the planning, setup and operation of a VA system, too.

»The norms ensure a consistent minimum standard that's valid in all EU countries. These regulations give planners, erecting and operating companies mandatory guidelines to work with.«

The norms ensure a consistent minimum standard that's valid in all EU countries. These regulations give planners, erecting and operating companies mandatory guidelines to work with. If agreed upon in private contracts, these norms become binding. Even if they are not mentioned in a contract, they do serve as a legal standard in an arbitration between business partners. By their nature norms are very helpful to completely avoid any litigation between contracting parties.

The important norms for the planning and installation of VA systems are:

IEC 50849

Sound systems for emergency purposes

The roots of IEC 50849 date as far back as 1999. It's based on the German norm VDE 0828 that has been launched after a fatal fire in the Düsseldorf airport. The unnoticed defect of a part of the voice evacuation system was responsible for the death of sixteen persons.

Consequently the demands in VDE 0828 / IEC 50849 take great care of ensuring a flawless function of the safety-critical system. Therefore a voice evacuation system has to monitor itself and all critical accessories and inform the operator instantly if a fault occurs.

EN 54

Fire detection and fire alarm systems

The close relationship between fire detection and voice evacuation system has been addressed by including the VA systems into EN 54.

Since 2008 all VA components are part of this product norm and have to be tested and certified by independent laboratories. An important part of this certification cycle is a yearly inspection of the manufacturing plant to ensure a constant product quality.

CERTIFIED SECURITY ACCORDING TO EN 54

FOR RCS VOICE EVACUATION SYSTEMS AND THEIR COMPONENTS

Voice Alarming-Speaker

The RCS voice alarm systems VARES-1000®, VARES-1500®, VARES-2000® or VARES-3000® are the ideal solution for evacuation and announcements, communication and background music in public buildings, such as department stores, government agencies, recreational facilities, industrial and educational buildings.

COMPLETE VOICE EVACUATION SYSTEM

EN 54-16 Voice Evacuation System (VAS)

A VA-system is complete if it is connected to the fire detection system.

The requirements for planning, construction and operation of a voice evacuation system describes the application of DIN VDE 0833-4. The demand on the equipment is prescribed in the product norm EN 54-16.

Since April, 1st. 2011 voice evacuation systems must be tested and certified to EN 54-16.

The testing of the products and the examination of the manufacturing plant guarantees a high product quality.

VOICE EVACUATION SPEAKER

EN 54-24 Voice Alarm Speaker for a Voice Evacuation System (VAS)

The EN 54-24 describes the requirements for loudspeakers of a voice evacuation system. These loudspeakers must be tested and certified by a notified product certification authority.

This certification includes testing of the products (long-term stability, acoustical values) and examination of the manufacturing plant.

We produce these speakers in our own production line in Germany and we meet all of the certification criteria.

EMERGENCY POWER SUPPLY

EN 54-4 Emergency Power Supply for a Voice Evacuation System (VAS)

The third essential product norm for voice evacuation system is EN-54-4

This refers to the emergency power supply of the VA and additional controlling of the accumulators stability.

Our VAS network system provides extremely flexible solutions for networked voice alarms and evacuation in complex building structures.

Description

The VAS network system is suitable for all objects with correspondingly high requirements.

It is used in extensive shopping malls, exhibition halls, airports, large school complexes, universities and interconnected offices and authorities.

CHARACTERISTICS OF THE VAS NETWORK SYSTEM:

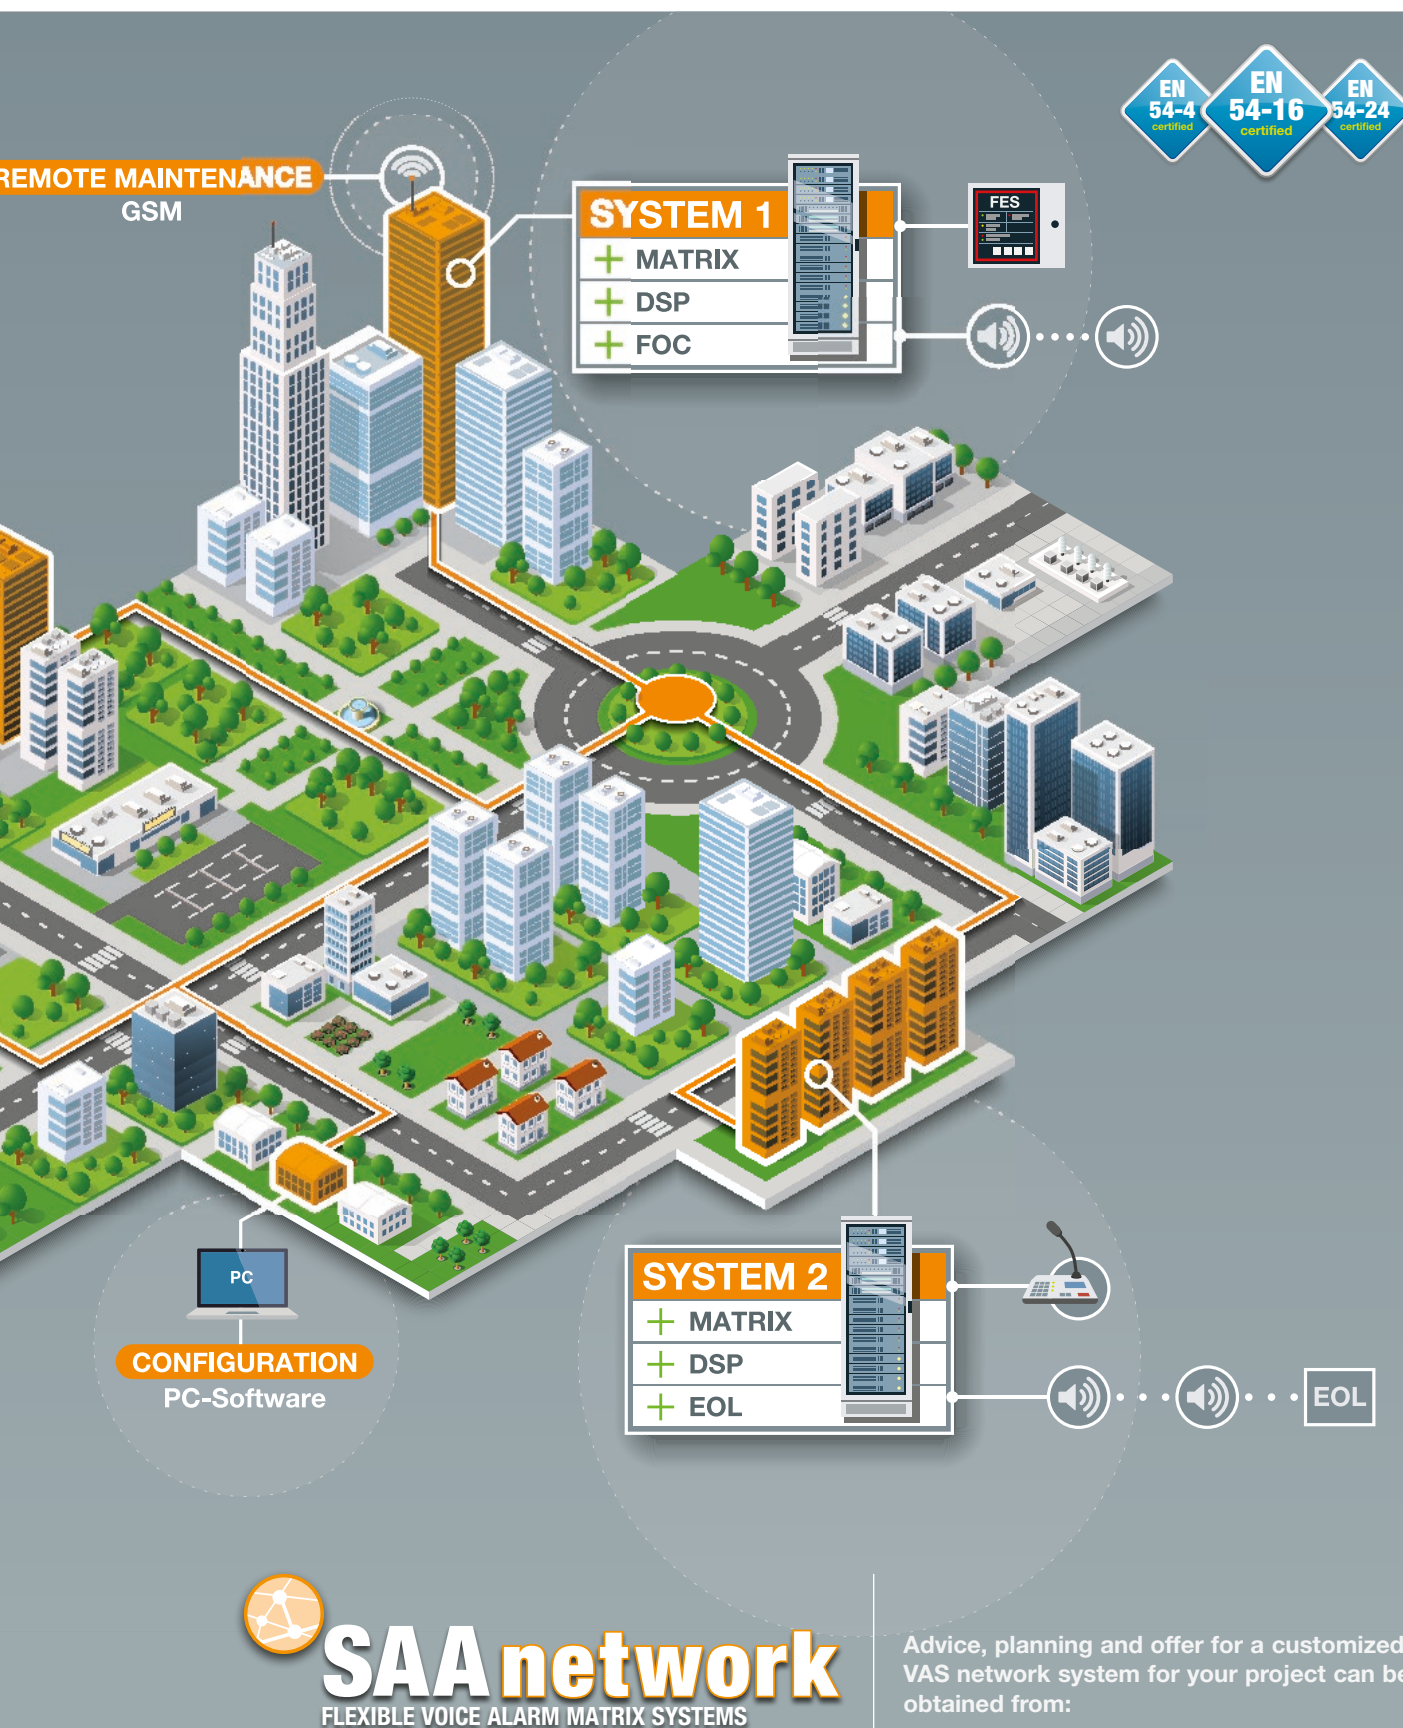

- Fully digital audio transmission
- Fiber optic connection (FOC) for the communication of the VAS Network systems with each other (see example graphic)
- System expansion up to 254 network user
- Complete integration of fire alarm and building management system
- Flexible, project-adapted and scalable system configuration
- Digital and multi-channel power amplifiers in different power classes
- 45 global audio channels
- Advanced DSP features within each VAS network system
- Modular design of all control devices
- 4 simultaneous messages or eviction texts in different zones
- Redundant communication between control units and system station
- Buffering of announcements and time-shifted playback of busy lines
- Intercom function between all connected system call stations
- Speaker lines can be monitored by impedance, EOL and loop technology
- Remote maintenance of the VAS network system via Ethernet or GSM network
- and much more

SAA-NETWORK: FLEXIBLE MATRIX SYSTEMS

GOOD TO KNOW ABOUT VOICE ALARMS, STANDARDS, 100V TECHNOLOGY AND RCS AUDIO SYSTEMS

RCS

Advice, planning and offer for a customized VAS network system for your project can be obtained from:

+49 80 61-35 01-0

ENVIRONMENT-FRIENDLY

Connected to the fire detection system, a VA unit guards a building every day and every night. Keeping that in mind, our engineers did not rest and optimised RCS system solutions to reach the highest energy efficiency levels. By using this advanced technology, you not only make your contribution to the preservation of a healthy environment, over the lifetime of the system you'll save considerable expenses, too.

»By using this advanced technology, you not only make your contribution to the preservation of a healthy environment, over the lifetime of the system you'll save considerable expenses, too«

The modular layout of RCS VA systems ensures that each rack is matched to meet the demands of an individual building management exactly. No unnecessary units are applied. Another crucial point is the efficiency of our class D amplifiers. They do not only use very little energy themselves, they also offer great cost-reduction potential because of their reduced need for emergency backup power. In many cases, even a climate control of the engineering room might be unnecessary.

DESIGN AND ADVANTAGES OF A FULLY DIGITAL VAS

WHAT ARE THE CORE COMPONENTS OF A FULLY DIGITAL VA SYSTEM?

- From message handling and alarm management to the power amplifiers all relevant components are implemented in digital technology.
- Digital (class D) power amplifiers provide an efficiency of 80% or more.
- The energy consumption of RCS digital power amplifiers is 80% lower compared to conventional amplifiers.
- In digital amplifiers an automatic standby mode further reduces the energy consumption when the system is not in use.
- The massively reduced power draw helps save money spent on energy consumption.
- The battery capacity of the emergency backup supply can be reduced considerably, saving cost and space.
- Digital power amplifiers run cool without fans, so there are no moving parts inside them, which results in an increased reliability.
- The typical life expectancy of a RCS digital amplifier is 20 years.
- Very low heat loss of the digital amplifiers offers the possibility to design VA systems that do not need to reside in AC cooled rooms.

GENERAL INTRODUCTION INTO THE 100V PA-TECHNOLOGY

The following tips, explanations and illustrations are to approximate and facilitate the planning, configuration and subsequent service of 100V PA systems to you.

As an introduction, we may state in many cases it is the 100V PA technology which makes a commercial acoustic irradiation principally possible, whereas it would be not at all, or only very hard and insufficiently possible, to implement effective systems with low-impedance technology; this being popular first of all as entertainment electronics.

TYPICAL FIELDS OF APPLICATION FOR 100V PA-TECHNOLOGY:

- Schools and Colleges
- Sports and multipurpose halls
- Open air and indoor baths
- Shopping centers and big stores
- Retail parks and DIY markets
- Logistic centers
- Industrial production buildings
- Public buildings (such as authorities, employment offices and so on)
- Office and administration buildings
- Hotels and restaurants
- Car and fire station
- Buildings which need a voice alarm system or a PA-system

BASIC FEATURES FOR 100V PA-TECHNOLOGY

Basically a 100V PA-system consists of three parts, which are:

1. **Microphone** or microphone station
2. **PA-system** (consisting of pre-mixer amplifiers, power amplifiers, speaker circuits, power supply)
3. **Speaker**

The advantage of the 100V-technique lies in the wiring of the system.

Due to step up the output voltage to 100V is a thin telephone cable able to bridge large distances without appreciable loss.

With the ungrounded network it is possible to adjust the transformer to the desired volume.

In addition the speakers are not overloaded as in the low-impedance technique. Important is the in-phase connection of all speakers at the lead.

THE ADVANTAGES OF 100V PA-TECHNOLOGY:

As already mentioned, loudspeakers with so-called 100V sound output transformers are normally being used with 100V PA technology. The output of the amplifier is increased within its sound output transformer to a nominal voltage of 100V.

This 100V AF signal is then distributed through the line network to the single loudspeakers. Next, the sound output transformer within the loudspeaker lowers this AF signal to an appropriate voltage, so that the connected speaker is provided exactly with its designated nominal rating and impedance.

Big advantages of the 100V PA technology are among other things:

a) Smooth switching on of the loudspeakers:

100V loudspeakers are simply connected in parallel, regardless of their power input and impedance. However, the total power of all connected loudspeakers must not exceed the nominal rating of the corresponding amplifier. Otherwise the amplifier will be out of order after a while.

b) Bigger circuit lengths possible:

Because of the higher voltage transmitted with 100V PA technology (compared to the low impedance technology used in consumer electronics), the losses within the line network are comparatively small.

The 100V PA technology makes it possible to run very long lines, even with a comparatively small wire diameter, e.g. 2 x 0.75 mm.

c) Small wire diameter sufficient:

With 100V technology, less power is lost in the line network than usually with the conventional architecture of consumer electronics or even "professional sound". Therefore, a smaller wire diameter is sufficient even for demanding 100V PA installations.

Normally cable types IYSt 2 x 0.75 or similar are used. As the case arises, details should be discussed with an expert.

However, it can be said basically that speaker line lengths of 500m and more are trouble-free for 100V technology.

★

TECHNICAL TERMS OF 100V PA-TECHNOLOGY:

1. Amplifier connection and sound output transformers

PA amplifiers normally operate with the so-called 100V technology. This technology presents a number of advantages, especially for longer circuits.

Through the 100V technology an increase of the amplifier's output power on the speaker outputs is achieved. This leads to a lower current flow at equal power and therefore smaller power

losses. Besides, it is not necessarily required to use heavy cables with large conductor diameters for long circuits, which is yet another advantage.

All loudspeakers can be connected in parallel, as long as the amplifier is not overloaded. Regarding the impedance on the output side, the amount of loudspeakers used is irrelevant.

Because the 100V-transformers installed in the loudspeakers are usually equipped with 3 or more power taps, every speaker can be operated with the desired or adequate power. However, the sum of the connected wattage (of the loudspeakers' transmitters) must not or only insignificantly exceed the output power of the amplifier.

2. Single call

With appropriate activation and respectively the amplifier's relevant configuration, a single call can be made with a desktop microphone if necessary.

Generally, this single call can be activated either by a desktop microphone or directly by the PA center.

3. Group call

Group call stands for an announcement for a previously determined number or arrangement of loudspeakers or speaker zones. For this purpose, suitable group call buttons have to be available on the PA center and the microphone station.

4. All-call

All-call normally means that the relevant announcement is transmitted to all connected loudspeakers and speaker zones.

This kind of call is required for chime and especially alarm transmissions.

5. Priority override

The possibility of priority override is essential in the security sector.

In addition to the for this purpose necessary features of the PA center, the connected loudspeakers and respectively their volume controls need to have a built-in emergency call relay. That way, the privileged priority announcement can be, as the name implies, freely transmitted. This has to be considered especially for loudspeakers with a built-in volume control.

6. Priority control

In this case one or, if necessary, several announcement or other signals are switched to one or different priorities in the PA center.

These important signals, e.g. alarm calls or the like, are then transmitted with priority and in the meantime fade out or at least weaken secondary signals (e.g. background music, etc.). After completion of the priority signal, the faded or weakened signal is activated again.

7. Chime

The sound of a short chime signal (1- or 2-tone chime) arouses the public's (e.g. in supermarkets, etc.) attention for the upcoming announcement. A final chime following the announcement is possible, as far as provided by the PA center. However, this is not common and required.

8. Program transmission

With the help of a programme selector on the PA center,

a sound signal (e.g. tuner, cassette recorder, CD player, speaker microphone, etc.) can be transmitted to individual loudspeakers or speaker zones. It is also possible to control these programmes by a microphone station, provided the station is equipped appropriately.

For PA centers with combined speaker zones and different transmission programmes, the switching has to be carried out by adequate switching elements (matrix) analogically or digitally.

9. Pilot tone monitoring

The highest strain on the PA center's power amplifiers is during alarm transmissions.

In order to achieve additional security for the PA center's alert, it is often of advantage to monitor the functioning of the power amplifiers with a pilot tone system (generator and decoder with automatic switching).

In case of a fault, the system switches fully automatically to an additional power amplifier (backup amplifier). This backup amplifier then takes over the place of the dropped out amplifier until a service technician has repaired the damage.

★

SPEAKERS OF 100V PA-TECHNOLOGY:

It is not possible within the limits of these "tips and clues for 100V PA technology" to present all relevant information and explanations.

However, we may illustrate and make understandable many important points and problems occurring with the installation of 100V PA systems.

1. Arrangement of speakers

When planning a PA system, it is the main aim to achieve a consistent acoustic irradiation and understandability within the room or area to be provided.

The loudspeakers should be installed in equal intervals in order to avoid areas with unpleasantly high loudness. Most of the commonly used cone speakers show an angle of beam spread of 90° at the -6 dB points in the medium frequency range. Taking this fact into consideration, the loudspeakers can be arranged in such a way that the listener will always stay in the range of at least one speaker.

As far as outdoor systems are concerned, sometimes neighbouring areas are also irradiated acoustically, which is often felt as an annoyance. By using reflex horn speakers and their accurate positioning and orientation, such disturbances can be avoided or at least minimized.

Horn speakers usually radiate within an angle of 30° in the medium frequency range, whereby it is possible to obtain the wanted directivity.

2. Nominal load capacity

The nominal load capacity of a loudspeaker is the power a speaker can carry without noticeable distortions or damage to the system.

The power output of a loudspeaker (in W) is only conditionally suited for judging its achievable volume, the more so as in many cases - caused by the "power and watts mania" in consumer electronics - partly unreliable work is done.

Thus, the indication of the sound pressure in dB at 1W/1m is much more honest and meaningful, especially if also the loudspeaker's frequency range is incorporated in the judgment of its quality. However, here the adjustment of the single parameters is very important, too, as e.g. a very high sound pressure alone does not reveal very much.

3. Sound pressure

Sound pressure is typically specified in -dB at 1 kHz and for a power supply of 1 W at 1m distance from the sound source.

Exact information on a speaker system's quality can only be given by means of a measuring diagram (course of the sound pressure over the complete frequency range).

By the way, the sound pressure of 100V loudspeakers normally is considerably higher than of Hi-Fi loudspeakers:

- ▶ Hi-Fi loudspeaker approx. 85-90 -dB at 1W/1m
- ▶ 100V loudspeaker approx. 90-100 -dB at 1W/1m.

4. Crosstalk effect

If several speaker lines are carried by one single cable, the danger arises that the signal of one line is transferred capacitively to another.

It may occur by this means, that a loudspeaker, not at all addressed, suddenly and quietly transfers an external calling signal. As far as systems with several programs are concerned, even different programs may be transmitted to the same speaker.

As this effect depends on the cable type used, as well as on the line's length and on the supplied power, a solution of the problem should be discussed with an expert.

Please note: For each signal, one pair of wires, belonging together and stranded with each other, should be used.

5. Impedance tester

The digital impedance tester allows you to measure and control the impedances of speaker lines.

The measurement is carried out by a 1 kHz test generator and is displayed on a 4-digit LCD display. For measurements there are three different measuring ranges available: 0-20 ohms, 200 ohms and 2000 ohms.

Such an impedance tester is indispensable for every company dealing with 100V PA technology.

★

SOUND PRESSURE LEVEL OF SPEAKERS

SOUND PRESSURE LEVEL INCREASING:

Sound pressure level increasing applied to curved 1W.

Watt:	1	2	4	6	8	10	16	25	32	50	64	75
dB:	0	3	6	8	9	10	12	14	15	17	18	19

SOUND PRESSURE LEVEL APPROVAL:

Sound pressure level approval applied to curved 1W.

Meter:	1	2	3	4	6	8	10	16	25	32	64
dB:	0	6	10	12	16	18	20	24	28	30	36

In this example the ceiling height is 4m (H).
The speaker distance (equal to "A") is then, at an opening angle of the required frequency range of 90°, 5m ("A").

DECENTRALIZED ACOUSTIC WITH CEILING SPEAKERS

(for voice alarming and background public address systems)

Distribution of speaker systems with low power at regular intervals over the complete area. The distance between each speaker can be selected in the following schedule:

Sound pressure level approval and speaker distance decrease as a function of ceiling height:

H/m	2,5	3	3,5	4	4,5	5	5,5	6
dB	0	3,5	6	8	9,5	11	12	13
A1/m	1,2	1,8	2,4	2,9	3,5	4,1	4,7	5,2
A2/m	2	3	4	5	6	7	8	9
A3/m	3,4	5,5	7	9	10,5	12	14	16

H Ceiling height or distance of a loudspeaker mounted or suspended from the floor.

A1 Speaker distance for high intelligibility for voice alarm systems (also for critical facilities).

A2 Speaker distance for well intelligibility for voice alarm systems or paging systems (also for uncritical facilities).

A3 Maximum possible speaker distance only for background irritation.

For ceiling heights greater than 6m this public address system is not applicable because in the working area (sound zone about 1,6m above the ground) there is too much more diffuse sound.

INSTALLATION GUIDELINES FOR PA-CABLE NETWORK IN SCHOOLS, SPORTS HALL AND INDUSTRY

1. MICROPHONE LINE:

1.1 Conduit wiring:

The microphone cables are in a separate complete steel tank piping freight collect. The steel conduits are embarrassed if possible at 1m distance from power lines (230V) but at least 30 cm in distance. The steel conduits are generally on one side to close up.

1.2 Cabling Material (minimum requirement):

a) Single pair cable:

- Paired-twisted cables (even shock of 8mm) or cross screen.
- Paired shielding in a spiral or braided design with a coverage of at least 80%, such as NF1001 or MY101.

b) Multipair cable:

- Fitting as in point a .
- Shields of the pairs are against each other isolated. Common shielding over wickerwork (cover at least 80%).
- Color Code of the couples according to DIN 47100.

1.3 Junction and Terminal Box:

The steel conduits are to lead inside of the boxes and connect. For the required distance from disturbing effects applies the same as in point 1.1 conduit wiring Distribution of metal must be grounded properly.

The connections must be made professionally by soldering Important: short dispose of the screens and in-phase connection of the lines.

1.4 Plug Connection:

As a microphone connector are XLR connectors made of Switchcraft, Cannon or Neutrix fielding (DIN 15905). The modulation part (microphone-user) is due pins and sockets to lead.

Pins and Sockets configuration: 1= Shield
 2= a-wire
 3= b-wire

Additional can be used jacks according to DIN 41622 for example 40-pin multipin jacks.

2. SPEAKER LINES (BALANCED UNGROUNDED)

2.1 Conduit wiring:

As ductwork network for speaker cables can be used plastic pipes or cable ducts. The minimum distance of the 230V power line shall be not less than 30cm.

Should not the minimum distance must be ensured steel conduit must be laid.

2.2 Cabling material:

As speaker line is only a steady twisted cable allowed to use. The cross section is determined in accordance with the power to be transferred by calculation.

2.3 Junction and Terminal Box:

For speaker lines can be used plastic boxes. In busy areas must be used them in impact proof distributors. The internal connections are to be produced professionally by soldering or clamping.

2.4 Plug connection for low impedance technology:

As speaker plug connection for low impedance systems are exclusively Speakon connectors are used. These connectors are locked and they have the following pin allocation:

Standard pin allocation:	1+ = a-wire (modulation)
	2- = b-wire (modulation)
	2+ = free
	2- = free

The two free pins can be used in active sound systems for special applications or other modulations.

2.5 Connectors for 100V connection:

For use with 100 V systems, 4-pin XLR connectors are to be used in accordance with the standards. The live part (amplifier loudspeaker) is to be routed to sockets and the consumer is to be routed to pins.

Standard pin allocation:	1 = a-wire (modulation)
	4 = b-wire (modulation)
	2 = free
	3 = free

3. CONTROL LINE:

3.1 Pipelaying :

The control lines are to be collected in separate plastic pipes or cable channels. Concerning to parasitic errors there are no restriction whatsoever.

3.2 Cabling material:

The following cables can be used:

Telecommun. cable: J-Y(st)Y 2x2x0,8 to 50x2x0,8.

The insert can be a speaker wire, a control line or a signal for the slave clock.

Double symmetrical cable	ACM-422 (2 x 2 x 0,22 mm ²) - double twisted pair, with braided shield

PROTECTION TYPE ACCORDING TO DIN 40050 AND IEC 144

The **DIN 40050** deals with the protection of electrical equipment by enclosures and covers and includes:

1. Protection of persons against contact with live or moving parts inside the housing and protection of the equipment against the ingress of solid foreign bodies (contact and foreign body protection).
2. Protection of equipment against ingress of water (water protection).
3. Abbreviations for the internationally agreed types of protection and the degrees of protection..

IP= Shortcut for „international protection“:

The protection may be indicated by a sign, which is composed of the two always constant letter IP and two digits for the degree of protection.

Samples for the declaration:

Identification letter: **IP**
 First code number: **4**
 Second code number: **4**

TOUCH GUARD & FOREIGN BODY PROTECTION:

1st code number	Scope	Destination statement
0	No Protection	No special protection of persons against accidental contact with live or moving parts. No protection of equipment against ingress of solid foreign bodies.
1	Protection against large foreign body	Protection against accidental contact with live and moving parts inside. (hand, but no protection against deliberate access to these parts). Protection against ingress of solid foreign bodies with a diameter larger than 50mm.
2	Protection against medium sized foreign body	Protection against finger contact with live or internal moving parts. Protection to the ingress of solid foreign bodies with a diameter larger than 12mm.
3	Protection against small foreign body	Protection against contact with live internal moving parts with tools, wires or similar object with a thickness greater than 2,5mm. Protection against ingress of solid foreign bodies with a larger diameter greater than 2,5mm.
4	Protection against solid foreign objects	Protection against contact with live or internal moving parts with tools, wires or similar object with a thickness greater than 1mm. Protection against ingress of solid foreign bodies with a diameter greater than 1mm.
5	Protection against dust deposits	Complete protection against contact with live or internal moving parts. Protection against dust deposits. The penetration of dust is not completely prevented but dust must not penetrate in such quantities that the operation will be affected.
6	Protection against dust	Complete protections against contact with live or dust entering internal moving parts. Protection against ingress of dust.

WATER PROTECTION:

2nd code number	Scope	Destination statement
0	No protection	No special protection
1	Protection against vertically falling drops of water	Protection against water drops falling vertically must not have any harmful effect.
2	Protection against diagonally falling drops of water	Water drops are falling at any angle of 15° from vertical shall have no harmful effect.
3	Protection against spraying water	The water in any desired angle up to 60° from vertical drops shall have no harmful effect.
4	Protection against splashing water	Water splashed from any direction against the equipment shall have no harmful effect.
5	Protection against water jets	Water jets from a nozzle that is directed from all directions against the equipment shall have no harmful effect
6	Protection against flood	Water allowed temporary flooding as penetrate through heavy seas not in harmful quantities into the equipment. *
7	Protection against immersion	Water may not penetrate in harmful quantities when the equipment is submerged below the specified pressure and time conditions in water. *
8	Protection against submersion	Water may not penetrate in harmful quantities when the equipment is submerged under a fixed pressure for an indefinite time under water. *

* In certain equipment may not enter the water. This is necessary in the result sheet for the equipment.

»»OUR VISION

It is our vision as a leading company to enrich the market in Germany and Europe not only with innovative products but also with intelligent ideas. Not just today but in the future! <<

»»OUR MISSION

is to constantly improve the technical standards of our products with regard to quality, cost-effectiveness and eco friendliness. Our service, support and customer satisfaction are supposed to strengthen the RCS®-brand even more! <<

The collage features several RCS product catalogs and brochures, each representing a different era of the company's history:

- 2009:** RCS Audio-Systeme. The cover shows a rack of electronic equipment.
- 1977:** RCS Audio-Systeme. The cover shows a rack of electronic equipment with a microphone.
- 1980:** RCS Communications-Systeme. The cover shows a woman sitting at a desk with a typewriter and a calculator.

More than 40 years of experience ...

WHO WE ARE

GOOD TO KNOW ABOUT VOICE ALARMS, STANDARDS, 100V TECHNOLOGY AND RCS AUDIO SYSTEMS

OUR EXPERTISE DESERVES YOUR CONFIDENCE

Expertise depends on experience and that cannot be achieved overnight. No, it does take time! Time needed for the development of new technologies, time needed to gain experience, time needed to learn and to learn about our customers personal desires.

Regarding the 100V PA technology – RCS® is one of the leading top brands in this special market segment in Germany.

Why? Because manufacturing quality, functionality and **cost/performance ratio** of our entire product range are superior. Our slogan “**Advantage through superior quality**” shall not simply be a keyword but a major requirement for our RCS® products. Any requirement needed for **Quality Assurance** such as the latest standards are continuously being improved and upgraded for your satisfaction.

Our company credo can be reduced to one point:

»The fulfillment of the customer's request is
the center of our activity - the quality of course«

RCS headquarters in Bad Aibling, Germany

RCS Audio-Systems is one of the few certified manufacturers to supply factory-wired complete systems for voice alarm systems (VAS) and electro-acoustic emergency warning systems (ENS). Our certified loudspeakers complete the product range „Made in Germany“.

CUSTOMER SERVICE & SALES

Flexibility. The fulfilment of customer requirements is the linchpin of our company. That's why the goal of our sales staff is to provide an effective and project-oriented solution for their specific needs.

CALCULATION & OFFERS

Price-performance ratio. From the basics to the planning; once all the targets have been set, the focus of our calculators is to find the balance between the budget and the desired implementation of the sound system.

OUR DEVISIONS AT A GLANCE

GOOD TO KNOW ABOUT VOICE ALARMS, STANDARDS, 100V TECHNOLOGY AND RCS AUDIO SYSTEMS

RCS

PLANNING & DESIGN

Personally. Our project consultants support you in the coherent preparation of planning or project planning through to installation and documentation.

Ulysses room-acoustics simulation for optimal and complete Positioning of speakers.

COMMISSIONING & MAINTENANCE

Accompanying. Of course, our technicians accompany the expert acceptance of the VAS as part of the factory commissioning.

CENTRAL PRODUCTION

Serial production of ELA control panels and voice alarm systems. For permanent installation, the 19" cabinets are factory-wired and ready for use.

PRODUCTION & SERVICE

Production „Made in Germany“. This term is for us system. We produce audio components such as Alarm management systems, speakers, amplifiers, mixing panels, etc.

WAREHOUSE & LOGISTICS

Short delivery times are an absolute necessity for many companies. Our stock ensures fast response times and immediate availability of the desired products.

ZVEI:

Training in small groups in order to learn more and become more familiar with the RCS®-Products.

PASSING ON OUR EXPERTISE

Company-seminars

Consideration of your specific requirements is one of the main aspects regarding our seminars.

Each company is unique, therefore you need to be provided with unique solutions! Content, volume and method are exactly adapted to your knowledge and experience.

Laid-back atmosphere:

Even sensitive subjects may be discussed internally within the group. This is why we place emphasis on trainings with small groups!

Main training focus is to provide the participants with the most effective and productive strategy on how to deal with our products.

From the basics of PA technology to essential basics on Norms of voice alarm systems! We are also very happy to provide you with one-day seminars.

The positive side-effect:

When talking with our customers it often becomes clear what an individual market needs for the future.

We will seize a suggestion with great commitment to create reasonable solution for you and your customers.

Our company building is currently constructed in Markfeld, Bad Aibling, in order to optimize our efficiency and to master any request.

A very friendly, light and transparent building is going to combine administration, production and warehouse.

We are very much looking forward to welcoming you in our company building.

AAS-200 A	Amok-Alarm System, (GSM/GPS)		100
AB-200 B	UHF-Antenna-Booster, (1 pair)		242, 244, 246, 248
ABB-400	Storage Box, (for HM-012/S; HM-025/S; SM-025/S; WHM-025/S)		294, 295
ABT-W6	EN 54-24 Alarming-Ceiling Speaker, 6 W, 100 V, white, all-metal		137
ABT-W6 AB	EN 54-24 Alarming-Ceiling Speaker, 2x 6 W, 100 V, white, all-metal		137
ABT-W6 Frame	Flush-Mounting Frame, for ABT-W6/AB	NEW	137
AC-300	Connecting cable, 30 m, (for additional SOUND-CENTER)		274, 278
ACC-050	XLR-Cable, 5 m		235
ACC-054	Cable Jack 3,5 mm on 2x Cinch, 5 m		235
ACC-061	Cable 2x Cinch L/R on 2x Cinch L/R, 3 m		235
ACC-100	XLR-Cable, 10 m		235
ACC-107	Speaker-Cable, 10 m		235
ACC-108/xx	Speaker-Cable, [desired length]		235
ACS-002	Charger-Kit, (for 2 pcs. UBH-016)		252
ACS-008	Charger-Kit, (for 8 pcs. UBR-016 or UBT-016)		252
ACS-020	Charger-Bag, (for 20 pcs. UBR-016 or UBT-016)		252
ACS-040	Charger-Case, (for 40 pcs. UBR-016 or UBT-016)		252
ACT-050/xx BNC	Antenna Cable, [desired length]		244, 248
ACT-050/xx TNC	Antenna Cable, [desired length]		240
AH-200 B	UHF-Antenna-Holder, (1 pair)		242, 244, 246, 248
AH-200 TNC	UHF-Antenna-Holder, (1 pair)		240
AH-300	Antenna-Holder, (for AN-300B)		244, 248
AM-100 BT	BT-Player, (for ME-1A)		129
AM-100 DAB	DAB-Tuner BT/USB/SD-Card Player, (for ME-1A)	NEW	129
AM-100 DV	DVD/CD/USB/SD-Player, (for ME-1A)		129
AM-100 RDS	RDS-Tuner, (for ME-1A)	NEW	129
AM-201 CD	CD-MP3/USB/SD-Card Player Module, (for ME-1A)		129
AN-200 B	External UHF-Antenna		242, 246
AN-300 B	Active Directional Antenna		244, 248
APG-300	Surface-mount housing, (for UPM-300H and UPM-300V)		97
APG-400	Surface-mount housing, (for PWM-101B and UPM-431B)		23, 95
AS-100	Splitter- and Combiner-Set, (1 pair)		244
AS-201 B	UHF-Antenna splitter, 1 RU		242, 246
ATT-100	100V Line Output Attenuator, 5-fold, (for VLA-/VLZ-Series)		133

B

BA-029	Replacement Battery, 2.9 Ah (for WPP-050 U1/U2)		286
BA-035	Replacement Battery Set, 5.4 Ah (for DSC-101/150)		272, 276
BA-052	Lead Acid Battery-Set, for internal operation (26 Ah)	NEW	5, 64
BA-080	Lead Acid Battery-Set, for external operation (45 Ah)		5, 12, 64, 65
BA-140	Lead Acid Battery-Set, for external operation (65 Ah)		12, 63
BA-160	Lead Acid Battery-Set, for external operation (78 Ah)	NEW	12, 63
BA-240 DP	1-Channel-Amplifier, (360/240 W, 2 RU), monitored with FD-21		55
BA-480 DP	1-Channel-Amplifier, (720/480 W, 2 RU), monitored with FD-21		55
BA-2240 DP	2-Channel-Amplifier, (2x 360/240 W, 2 RU)		57
BA-2480 DP	2-Channel-Amplifier, (2x 720/480 W, 3 RU), monitored with FD-21 and FM-30		59
BA-4120 DP	4-Channel-Amplifier, (4x 180/120 W, 3 RU), monitored with FD-21		61
BA-4240 DP	4-Channel-Amplifier, (4x 360/240 W, 3 RU), monitored with FD-21		61
BC-006	Design-Speaker 6 W, 100V		162

BC-006 R	Design-Speaker 6 W, 100V, with Controller		162
BC-010	Design-Speaker 10 W, 100V		162
BC-010 R	Design-Speaker 10 W, 100V, with Controller		162
BC-104	Cabinet Speaker 4 W, 100V		165
BC-104 R	Cabinet Speaker 4 W, 100V, with Controller		165
BC-106	Cabinet Speaker 6 W, 100V		165
BC-106 EN	EN 54-24 Alarming-Cabinet Speaker, 6 W, 100 V		144
BC-106 R	Cabinet Speaker 6 W, 100V, with Controller		165
BC-110	Cabinet Speaker 10 W, 100V		165
BC-110 C	Cabinet Speaker 10 W, 100V, 2-way system		164
BC-110 CR	Cabinet Speaker 10 W, 100V, 2-way system, with Controller		164
BC-110 R	Cabinet Speaker 10 W, 100V, with Controller		165
BC-120 C	Cabinet Speaker 20 W, 100V, 2-way system		164
BC-120 CR	Cabinet Speaker 20 W, 100V, 2-way system, with Controller		164
BC-130 C	Cabinet Speaker 30 W, 100V, 2-way system		164
BC-130 CR	Cabinet Speaker 30 W, 100V, 2-way system, with Controller		164
BC-304	Cabinet Speaker 4 W, 100V		166
BC-304 R	Cabinet Speaker 4 W, 100V, with Controller		166
BC-306	Cabinet Speaker 6 W, 100V		166
BC-306 R	Cabinet Speaker 6 W, 100V, with Controller		166
BC-310	Cabinet Speaker 10 W, 100V		166
BC-310 R	Cabinet Speaker 10 W, 100V, with Controller		166
BC-512 AB	A/B-Cabinet Speaker 2x 6 W, 100V		160

ISV-300 A	Induction Loop Amplifier, 1 RU, for areas up to 450 m²		87
ISV-500 A	Automatic Induction Loop Amplifier, 1 RU, for areas up to 1.000 m²		89

J

JC-102 MM	Jack-Plug, (Mono), silver, male		234

K

KL-200 S	Ball Speaker, 20 W, 100V, black		181
KL-200 W	Ball Speaker, 20 W, 100V, white		181
KL-520	Ball Speaker, 20 W, 100V		180
KL-716 EN	EN 54-24 Alarming Ball Speaker, 16 W, 100V	NEW	151

L

LA-130	Column Speaker, 30 W, 100V		182
LA-140	Column Speaker, 40 W, 100V		182
LA-160	Column Speaker, 60 W, 100V		182
LA-200 B	Lavalier Microphone, (for UB-016B/C, UWB-700F)	239, 243, 247, ... 277, 287	
LA-300	Lavalier Microphone, (for UBT-016)		251
LC-510 T	Speaker-Chassis, 10 W, 8 ohms		204
LC-610	Speaker-Chassis, 10 W, 8 ohms		204
LC-640 CX	Speaker-Chassis, 40 W, 8 ohms, 2-way system		204
LG-002	Charging Station, (for VB-200 and VH-200)	NEW	261, 265, 269
LG-040	Battery-Charger, (for SM-040/S)		297
LPW-150 R	Controller-Program-Combination, up to 50 W, with Relay		190
LR-150 R	Volume Control, up to 50 W, with Relay		190
LR-1100 R	Volume Control, up to 100 W, with Relay		190
LR-6030 A	19" Volume Control Panel, 2 RU, 6x 30 W		132
LR-6060 A	19" Volume Control Panel, 2 RU, 6x 60 W		132
LR-6120 A	19" Volume Control Panel, 2 RU, 6x 120 W		132
LRM-015	Volume Control, 15 W, 4-8 ohms		190
LRM-030	Volume Control, 30 W, 4-8 ohms		190
LS-320 W	Column Speaker, 20/30 W, 100 V, 8 ohms, 2-way system		183
LS-330 W	Column Speaker, 30/45 W, 100 V, 8 ohms, 2-way system		183
LS-340 W	Column Speaker, 40/60 W, 100 V, 8 ohms, 2-way system		183
LS-360 W	Column Speaker, 60/90 W, 100 V, 8 ohms, 2-way system		183

M

MA-1410 B	10-Channel-Mixing Pre-Amplifier, 1 RU		71
MB-700 W	Wall Bracket, (for PB-700-Series), swivel and tilting, white		193
ME-1 A	Modular Pre-Amplifier, 1 RU		129
ME-2 A	Modular Pre-Amplifier, 2 RU		128
MH-001	Mast Holder - Type I, for hole spacing 42-62 mm		185
MH-002	Mast Holder - Type II, for hole spacing 100-142 mm		185
MH-310	Microphone Holder, for Ø 23-30 mm		232
MH-800	Microphone Holder, for Ø 30-36 mm	232, 240, 244, 248	
MK-040	Carriage and Storage Case, (for SM-040/S with Accessories)		297
MS-050 P	All Call Microphone Station, (for PSC-012A for CPA-5000 Series)		121

MS-201 K	Desktop Microphone, (Jack, balanced)		230
MS-201 X	Desktop Microphone, (XLR, balanced)		230
MT-040 L	100 V Matching Transformer, 4 W		204
MT-061 L	100 V Matching Transformer, 6 W		204
MT-101 L	100 V Matching Transformer, 10 W		204
MT-200 L	100 V Matching Transformer, 20 W		204
MT-310 L	100 V Matching Transformer, 30 W		204
MT-600 S	100 V Matching Transformer, 60 W		204
MU-307 A	Active Monitor Unit, 2 RU		68
MV-030	Desktop Amplifier, 45/30 W		125
MV-060	Desktop Amplifier, 90/60 W		125
MXA-4120 A	4-Channel Mixing Amplifier, 4x 180/120 W, 2 RU, (5 IN / 4 OUT)		47
MXE-400 W	Wall Microphone Station		46
MXM-104	Digital Microphone Station, for Remote control of 4-Speaker lines and „ALL-CALL“		44, 46
MXM-104 WO	Digital Microphone Station, as MXM-104 but without Interface RR-40		44, 46
MPX-604 A	4-Channel Mixing Pre-Amplifier, 2 RU, (6 IN / 4 OUT)		45

N

NC-111	Ambient Noise Controller, 1 RU		76
NCC-005	Crossover-Kabel CAT5e, 0.5 m, (for VARES-1500/2000)	NEW	8, 16
NCC-010	Crossover-Kabel CAT5e, 1.0 m, (for VARES-1500/2000)	NEW	8, 16
NCC-020	Crossover-Kabel CAT5e, 2.0 m, (for VARES-1500/2000)	NEW	8, 16
NCC-030	Crossover-Kabel CAT5e, 3.0 m, (for VARES-1500/2000)	NEW	8, 16
NCC-050	Crossover-Kabel CAT5e, 5.0 m, (for VARES-1500/2000)	NEW	8, 16
NCC-2000 A	›VARES-2000‹ Network Control-Center, (Audio-Matrix), 1 RU	NEW	11
NCE-2000 A	›VARES-2000‹ Network Control-Center Expander, (NCC-2000A Extension), 1RU	NEW	11
NDA-200 A	›VARES-1500‹ 2-Channel Backup Amplifier module, 2x 100 W, (NVC series)	NEW	5
NDA-200 H	›VARES-1500‹ 2-Channel Backup Amplifier module, 2x 100 W, (NVC series)	NEW	5
NDA-1000 A	›VARES-2000‹ Network Digital Power Amplifier, 2x 500 W	NEW	12
NEH-100 A	›VARES-1500‹ Extension Housing for DIN rail modules	NEW	6
NFM-100 A	›VARES-1500‹ Fireman Microphone, for All Call	NEW	7, 13
NFM-200 A	›VARES-1500‹ Fireman Microphone (FES), with Control Panel (DIN 14664)	NEW	7, 13
NFM-300 A	›VARES-1500‹ Fireman Microphone, with Control Panel	NEW	7, 13
NH-040	Battery Set, (for SM-040/S)		297
NIM-116 A	›VARES-1500‹ Input-/Outputmodule, for monitored inputs and mandatory outputs	NEW	6, 15
NLE-406 A	›VARES-1500‹ Line Extension, for further 6 single- or 3 A/B Lines	NEW	6, 15
NLF-001	›VARES-2000‹ 19" Vent Panel, 1 RU, red	NEW	16
NLM-200 A	›VARES-1500‹ End-of-Line Module	NEW	6, 15
NLP-001	19" Empty Housing, 1 RU, red	NEW	16
NLP-002	19" Empty Housing, 2 RU, red	NEW	16
NLP-003	19" Empty Housing, 3 RU, red	NEW	16
NOM-204 A	›VARES-1500‹ FO Converter, for Network	NEW	6, 15
NPA-150 A	›VARES-1500‹ Network Programming Adapter USB	NEW	6, 15
NPC-005	Patchkabel CAT5e, 0.5 m, yellow	NEW	8, 16
NPC-010	Patchkabel CAT5e, 1.0 m, yellow	NEW	8, 16
NPC-030	Patchkabel CAT5e, 3.0 m, yellow	NEW	8, 16
NRC-008 A	›VARES-1500‹ Relay-Outputmodule, 8-fold for GPO, for DIN rail mounting	NEW	15
NTM-106 A	›VARES-1500‹ Desktop Microphone, with 6+1 Buttons	NEW	7, 13
NTM-124 A	›VARES-1500‹ Desktop Microphone, with Touchscreen	NEW	7, 13
NUR-302	Slave Clock, Ø 300 mm, one-sided, analogue		105
NUR-302 DD	Slave Clock, Ø 300 mm, double-sided, analogue, incl. ceiling bracket	NEW	105
NUR-302 DW	Slave Clock, Ø 300 mm, double-sided, analogue, incl. wall bracket	NEW	105

NUR-402	Slave Clock, Ø 400 mm, one-sided, analogue		105
NUR-402 DD	Slave Clock, Ø 400 mm, double-sided, analogue, incl. ceiling bracket	NEW	105
NUR-402 DW	Slave Clock, Ø 400 mm, double-sided, analogue, incl. wall bracket	NEW	105
NVC-200 A	›VARES-1500‹ Network Voice-Evacuation Center, 200 W, (1 Amplifier)	NEW	5
NVC-400 A	›VARES-1500‹ Network Voice-Evacuation Center, 400 W, (2 Amplifiers)	NEW	5
NVC-600 A	›VARES-1500‹ Network Voice-Evacuation Center, 600 W, (3 Amplifiers)	NEW	5

P

PAM-130 A	›VARES-3000‹ LED-Address Module, for Microphone Stations		24
PAS-300 B	›VARES-3000‹ Bus Socket, 25-pin for surface mounting		25
PAX-404 A	›VARES-3000‹ Audiomatrix-Module, digital		21
PB-720 S	Pro-Sound Speaker, 20 W, 100 V, 2-way system, black		192
PB-720 W	Pro-Sound Speaker, 20 W, 100 V, 2-way system, white		192
PB-730 S	Pro-Sound Speaker, 30 W, 100 V, 2-way system, black		192
PB-730 W	Pro-Sound Speaker, 30 W, 100 V, 2-way system, white		192
PB-760 S	Pro-Sound Speaker, 60 W, 100 V, 2-way system, black		193
PB-760 W	Pro-Sound Speaker, 60 W, 100 V, 2-way system, white		193
PB-806	100 V Pro-Sound Speaker, 60 W, 100 V, 2-way system		195
PB-810	100 V Pro-Sound Speaker, 100 W, 100 V, 2-way system		195
PB-1210 S	100 V Pro-Sound Speaker, 100 W, 100 V, 2-way system, black		195
PB-1210 W	100 V Pro-Sound Speaker, 100 W, 100 V, 2-way system, white		195
PB-1220 S	100 V Pro-Sound Speaker, 200 W, 100 V, 2-way system, black		195
PB-1220 W	100 V Pro-Sound Speaker, 200 W, 100 V, 2-way system, white		195
PBA-040 W	Active-Speaker-System, 2x 25 W		188
PBA-300 B	›VARES-3000‹ Bus Socket, 25-pin		25
PBC-400 B	›VARES-3000‹ Bus Module, (for PPS-024A), digital		23
PBC-610 A	›VARES-3000‹ Remote Module, digital		21
PBE-185 A	›VARES-3000‹ Bus-Extension Master-Module, digital		21
PBE-285 A	›VARES-3000‹ Bus-Extension Slave-Module, digital		21
PBE-385 A	›VARES-3000‹ Bus-Extension Slave-Module, for remote assemblies, digital		21
PCA-300	›VARES-3000‹ Main Clock Programming Adapter, (for PTC-240 D)		22, 75
PCS-500	Portable Compact-System, 600/+300 W		290
PCS-600	Portable Compact-System, 600 W		291
PCS-1200	Portable Compact-System, 1200 W		292
PDM-208 B	›VARES-3000‹ Microphone Station, with LCD-Display, with 8 switches, digital		24
PEM-008 B	›VARES-3000‹ Microphone Extension Unit, with 8 buttons, digital		24
PEM-104 B	›VARES-3000‹ Microphone Extension Unit, with 4 alarm buttons, digital	NEW	24
PEU-056 B	›VARES-3000‹ Extension Unit, 2 RU, digital		20
PFH-485 A	›VARES-3000‹ RS485-Hub, 5-Channel, digital		21
PFK-101	›VARES-3000‹ Connecting Cable, (for Microphone Extension Unit PEM-008B)		24
PFK-200	›VARES-3000‹ Extension Cable, (for PEU-056B and PPS-024A)		20, 23
PFM-308 C	›VARES-3000‹ Fire Brigade Microphone Station, digital		24
PFM-330 D	›VARES-3000‹ Fire Brigade Wall-Microphone Station, digital		24
PGA-300	Plexiglas Cover, ball-throwing proof, (for UPM-300H and UPM-300V)		97
PGA-400	Plexiglas Cover, ball-throwing proof (for UPM-431B and PWM-101B)		95
PHM-485 B	›VARES-3000‹ Busoption RS-485, digital		23, 62
PHM-802 C	›VARES-3000‹ Amplifier Monitoring, 1 RU, digital		23, 62
PHS-1000	›VARES-3000‹ Hard- and Software Configuration		25
PHS-81T30 BS	EN 54-24 Alarming-Horn Speaker, 30 W, 100 V		157
PIC-101 A	›VARES‹ Interface BMZ/VAS, according to VDE 0833-4, Appendix G	NEW	6, 15
PIC-208 B	›VARES-3000‹ Input Module, 8 input contacts, digital		20
PIC-216 C	›VARES-3000‹ Extension Module, (for PIC-416 C), 16 monitored inputs, digital		21

PIC-416 C	›VARES-3000‹ Input Module, bus connections, 16 monitored inputs, digital			21
PIC-516 C	›VARES-3000‹ Input Module, bus connections, 16 inputs, digital			21
PKF-024 A	›VARES-3000‹ Keypadfield, 24 buttons			23
PLC-400 A	›VARES-3000‹ Display- and Button Module, digital			22
PLE-628 A	›VARES-3000‹ Display Module, digital			22
PLT-100 A	›VARES-3000‹ End-of-Line Module			22
PMC-003	›VARES-3000‹ Connecting Cable, 3 m, (for Microphone Stations)			25
PMM-132 D	›VARES-3000‹ Message-Module, digital	NEW		21
PMO-350 C	›VARES-3000‹ Monitoring and Measuring Module, digital			22
PMO-400 B	›VARES-3000‹ Microphone Monitoring Module, digital			22
PMU-802 A	›VARES-3000‹ Monitor Module, for 10 Power amplifiers for installation in PHM-802C			23, 62
PMX-614	Power-Mixer, 14 Channels, 2x 300 W			80
PMX-911 R	Power-Mixer, 11 Channels, 3x 300 W, 5 RU			79
PMX-1216	Power-Mixer, 16 Channels, 2x 600 W			81
PNC-224 A	›VARES-3000‹ Network Control, for networking VARES-3000 systems, digital			21
PNF-101 C	›VARES-3000‹ NF-Switch, 1-Channel			21
PPS-024 A	›VARES-3000‹ Program Switch Panel, 1 RU, digital			23
PRC-008 C	›VARES-3000‹ Relay Card 8 Lines, digital			20
PRC-248 B	›VARES-3000‹ Relay Card Ground Leakage, digital			20
PRC-308 C	›VARES-3000‹ Relay Card Special Functions, 8-fold, digital			20
PRC-408 C	›VARES-3000‹ Matrix-Relay Card 2x8, digital			20
PRC-508 A	›VARES-3000‹ Matrix-Relay Card 4x8, digital			20
PRO-800	Pro-Sound Speaker 100 W, 2-way system			195
PRO-1200 S	Pro-Sound Speaker 200 W, 2-way system, black			195
PRO-1200 W	Pro-Sound Speaker 200 W, 2-way system, white			195
PRR-077 B	›VARES-3000‹ DCF-Busmodul, Radio Receiver, digital			22, 75
PRS-500 B	›VARES-3000‹ TCP/IP-Telecommunication Module, digital			25
PRS-500 NTP	›VARES-3000‹ NTP-Software option for LAN-Adapter			25
PSC-012 A	12-Zone Paging-System, 2 RU			43
PSM-108 B	›VARES-3000‹ Microphone Fault Indicator Module, (for PDM-208B), digital			24
PSS-224 C	›VARES-3000‹ Control-Center, 2 RU			20
PST-100	Floor Stand			195
PSU-024/24	›VARES-3000‹ Power Supply, 24 VA, 24 V, 1A (for PTC-240D)			25
PSU-048/24	›VARES-3000‹ Power Supply, 48 VA, 24 V, 2A			22, 25, 75, 189
PSU-120/24	›VARES-3000‹ Power Supply, 120 VA, 24 V, 5A			25
PSU-240/24	›VARES-3000‹ Power Supply, 240 VA, 24 V, 10A			25
PTC-008 B	›VARES-3000‹ Relay Card, (for Main Clock PTC-240D), 8-fold, digital			22, 75
PTC-102 A	›VARES-3000‹ Relay-Module, Booster, (for PTC-240 slave clocks), DIN rail mount	NEW		22
PTC-240 D	›VARES-3000‹ Main Clock, 1 RU, incl. Slave Clock control, digital			22, 75
PTM-101 B	›VARES-3000‹ All Call Desktop Microphone, digital			24
PWA-103	SCHOOL CUBE 100, 40 W, with integr. Multi-Player	NEW		256
PWA-104	SCHOOL CUBE 100 3D, 50 W, with integr. Multi-Player and 1-Channel VHF-System	NEW		260
PWA-510 B	SCHOOL CUBE 500, 50 W, with integr. Multi-Player and 1-Channel VHF-System	NEW		264
PWA-730 B U1	SCHOOL CUBE 700, 85 W, with integr. CD/MP3- Multi-Player and 1-Channel VHF-System	NEW		268
PWA-730 B U2	SCHOOL CUBE 700, 85 W, with integr. CD/MP3- Multi-Player and 2-Channel VHF-System	NEW		268
PWB-100 S	Wall Mounting Bracket, (for PB-1210S/1220S, PRO-1200S), black			195
PWB-100 W	Wall Mounting Bracket, (for PB-1210W/1220W, PRO-1200W), white			195
PWM-101 B	›VARES-3000‹ Conversation-Unit, digital			23
PWS-300 B	›VARES-3000‹ Bus Socket, 25-pin for flush mounting			25
PZM-310 B	›VARES-3000‹ Ten-Keys Pad, (for PDM-208B), digital			24

Q

QDA-428 A	Digital-Amplifier, 2 RU, 4x 700 W (4 ohms) / 4x 400 W (8 ohms), with DSP-	83
QRF-210	Pro-Sound Speaker, 220 W, 2-way system	197
QRF-212	Pro-Sound Speaker, 250 W, 2-way system	197
QRI-108 S	Pro-Sound-Speaker, 200 W, Subwoofer	199, 201
QRI-108 ST	Pro-Sound-Speaker, 100 W, 100 V, Subwoofer	199, 201
QRI-210	Pro-Sound-Speaker, 350 W, 2-way system	199
QRI-210 T	Pro-Sound-Speaker, 100 W, 100 V, 2-way system	199
QRI-212	Pro-Sound-Speaker, 350 W, 2-way system	199
QRI-212 T	Pro-Sound-Speaker, 200 W, 100 V, 2-way system	199
QRI-215	Pro-Sound-Speaker, 500 W, 2-way system	199
QRI-215 T	Pro-Sound-Speaker, 200 W, 100 V, 2-way system	199
QRI-401	Pro-Sound-Speaker, 50 W, incl. L-shape Wall bracket	201
QRI-401 T	Pro-Sound-Speaker, 30 W, 100 V, incl. L-shape Wall bracket	201
QRI-402	Pro-Sound-Speaker, 125 W, 2-way system	201
QRI-402 T	Pro-Sound-Speaker, 60 W, 100 V, 2-way system	201
QRI-404	Pro-Sound-Speaker, 200 W, 2,5-way system	201
QRI-404 T	Pro-Sound-Speaker, 60 W, 100 V, 2,5-way system	201
QRK-005	Eyebolts Set, (for QRF-Series), contains 5 pcs. eyebolts	197
QST-185	Speaker-Stand, up to 1,85 m height	195, 197, 274, 278
QWH-035	Wall bracket, (for PB-1210S/W, PB-1220S/W, PRO-1200S/W)	195
QWH-050	Wall bracket, (only for QRF-210, QRF-212 and QRF-212M)	197
QWH-210 H	Multimount-Holder, for QRI-210/T, horizontal	199
QWH-210 V	Multimount-Holder, for QRI-210/T, vertical	199
QWH-212 H	Multimount-Holder, for QRI-212/T, horizontal	199
QWH-212 V	Multimount-Holder, for QRI-212/T, vertical	199
QWH-215 H	Multimount-Holder, for QRI-215/T, horizontal	199
QWH-215 V	Multimount-Holder, for QRI-215/T, vertical	199
QWH-402	Wall Mounting Bracket, for QRI-402/T, U-Bracket	201
QWH-404	Wall Mounting Bracket, for QRI-404/T, U-Bracket	201

RFC-020	19" Rack „Flight-Case“, 20 RU			222
RFF-200	Van Panel, (for RAB-Series)			216
RFF-300	Van Panel, (for RSS-Series)			214
RFF-402 A	19" Van Panel, 4 RU, (for RVP-Series)			218
RGL-400	Slide Rails, (1 pair, for RVP-Series)			218
RGL-525	Slide Rails, (1 pair, for RAB-Series)			216
RGL-550	Slide Rails, (1 pair, for RSS-Series)			214
RJF-300	Levelling feet, (for RAB-Series)			216
RKB-002	19" Storage Box, 2 RU			226
RKB-003	19" Storage Box, 3 RU			226
RKM-006	Cage Nut Set, M6			226
RKS-006	Additional Screw Set, M6			226
RLF-101	19" Vent Panel, 1 RU	NEW		224
RLF-102	19" Vent Panel, 2 RU	NEW		224
RLF-103	19" Vent Panel, 3 RU	NEW		224
RLL-400	LED-Lightning Unit, (for RVP-Series)			218
RLP-001	19" Empty Housing, 1 RU			224
RLP-002	19" Empty Housing, 2 RU			224
RLP-003	19" Empty Housing, 3 RU			224
RMK-10	19" Rack-Mounting-Kit, 3 RU, (for CPA-3000 Series)			123
RMK-12	19" Rack-Mounting-Kit, 8 RU, (for FMX-1202)			77
RMK-14 P	19" Rack-Mounting-Kit, 9 RU, (for PMX-614)			80
RMK-16	19" Rack-Mounting-Kit, 8 RU, (for FMX-1602)			78
RMK-16 P	19" Rack-Mounting-Kit, 9 RU, (for PMX-1216)			81
RR-10	Digital Receiver Module, (for Microphone Station VLM-105/205)			116
RR-40	Digital Receiver Module, (for Microphone Station MXM-104)			44
RR-60	Digital Receiver Module, (for Microphone Station VLM-106/206 and VPM-6000U)			98
RR-120	Digital Receiver Module, (for Microphone Station ELM-106 and VLM-112)			36, 43
RRP-101	Implementation-Panel, 1 RU			220
RSC-008 A	Relay Board, for speaker line monitoring, 8-fold, digital			67
RSC-132 A	Speaker Line Monitoring Unit, 1 RU, digital			67
RSD-301	Sound-Dome Ceiling Speaker 30 W, 100V, 2-way system			177
RSD-601	Sound-Dome Ceiling Speaker 60 W, 100V, 2-way system			177
RSG-001	19" Protective Grid, 1 RU			224
RSG-002	19" Protective Grid, 3 RU			224
RSL-002	19" Drawer, 2 RU			225
RSL-003	19" Drawer, 3 RU			225
RSS-5524 B	19" Swing Frame Cabinet, 24 RU			215
RSS-5530 B	19" Swing Frame Cabinet, 30 RU			215
RSS-5540 B	19" Swing Frame Cabinet, 40 RU			215
RTB-008 B	Plexiglass Door, 8 RU, (for RAB-008B)			217

RTB-014 B	Plexiglass Door, 14 RU, (for RAB-014B)		217
RTB-018 B	Plexiglass Door, 18 RU, (for RAB-018B)		217
RTB-024 B	Plexiglass Door, 24 RU, (for RAB-024B)		217
RTB-032 B	Plexiglass Door, 32 RU, (for RAB-032B)		217
RTB-040 B	Plexiglass Door, 40 RU, (for RAB-040B)		217
RTC-200	Thermostat for Rail Mounting, (for RFF-200/RFF-300)		
RTS-024 B	Plexiglass Door, 24 RU, (for RSS-5524 B)	NEW	215
RTS-030 B	Plexiglass Door, 30 RU, (for RSS-5530 B)	NEW	215
RTS-040 B	Plexiglass Door, 40 RU, (for RSS-5540 B)	NEW	215
RU-203 B	19" Rack Mounting Kit, 1 RU, (for AS-201B with BNC-Connector)	NEW	242, 246, 248
RU-401	19" Rack Mounting Kit, 1 RU, (for UWR-701F)		244
RU-401 B	19" Rack Mounting Kit, 1 RU, (for UWR-701F with BNC-Connector)	NEW	244
RU-501 T	19" Rack Mounting Kit, 1 RU, (for UWT-016)		252
RU-502 T	19" Rack Mounting Kit, 1 RU, (for UR-016B/C)		240
RUS-100	Castor Case, (for RFC/WFC-Series)		222
RUS-101	Castor Case, (for PCS Series)		223
RVC-001 A	Volume Control, 1-fold, (for RVC-201 A)		99
RVC-002 A	Volume Control, 2-fold, (for RVC-201 A)		99
RVC-201 A	Remote Volume Control, control electronics, 2-Channel		99
RVP-015	19" Cabinet, (15 RU), with Plexiglass Door		219
RVP-018	19" Cabinet, (18 RU), with Plexiglass Door		219
RVP-022	19" Cabinet, (22 RU), with Plexiglass Door		219
RVP-027	19" Cabinet, (27 RU), with Plexiglass Door		219
RVP-032	19" Cabinet, (32 RU), with Plexiglass Door		219
RVP-037	19" Cabinet, (37 RU), with Plexiglass Door		219
RVP-042	19" Cabinet, (42 RU), with Plexiglass Door		219
RXP-081	19" XLR Rack Panel, 1 RU, for 8 XLR-sockets		224
RY-024	Emergency Call Relay, built into the speaker		135

S

SA-090	Microphone boom, (matte black)		232
SB-020	SOUND-BELT, max. 10 W	NEW	283
SC-104	Ceiling Speaker, 4 W, 100V, square		175
SC-106	Ceiling Speaker, 6 W, 100V, square		175
SC-106 EN-1	EN 54-24 Alarming-Ceiling Speaker, 6 W, 100 V, with dust cover		142
SC-110	Ceiling Speaker, 10 W, 100V, square		175
SC-110 C	Ceiling Speaker, 10 W, 100V, 2-way system, square		175
SC-120 C	Ceiling Speaker, 20 W, 100V, 2-way system, square		175
SC-130 C	Ceiling Speaker, 30 W, 100V, 2-way system, square		175
SC-400 WT	Ceiling Speaker, 60 W, 100 V, 2-way system, square		174
SC-512 AB	A/B-Ceiling Speaker, 2x 6 W, 100V, square		159
SC-512 EN-1	EN 54-24 Alarming-Ceiling Speaker, 6 W, 100V, with dust cover		143
SC-520 AB	A/B-Ceiling Speaker, 2x 10 W, 100V, square		159
SCS-106	Ceiling Speaker, 6 W, 100V		178
SCS-110	Ceiling Speaker, 10 W, 100V		178
SCS-110 C	Ceiling Speaker, 10 W, 100V, 2-way system		178
SCS-120 C	Ceiling Speaker, 20 W, 100V, 2-way system		178
SD-220	SOUND-DESK 2, max. 60 W, (with integrated 2-channel VHF receiver), black	NEW	280
SL-100	Special paint, possible in all RAL colors		135
SM-025	Shoulder Megaphone, max. 25 W		296
SM-025 S	Shoulder Megaphone, max. 25 W, with siren signal		296
SM-040 S	POWER-Shoulder Megaphone, max. 40 W, with siren signal		297

SPC-104 F	Speaker Installation Socket, (4-Pol.), female		234
SPC-200 A	Service and Diagnostic PC, for remote configuration of RCS systems	NEW	93
SPC-204 M	Speaker-Plug, (4-Pol.), male		234
SPJ-52 WHBS	EN 54-24 Alarming-Double-Direction Soundprojector, 20 W, 100 V		154
SPJ-53 WHBS	EN 54-24 Alarming-Soundprojector, 20 W, 100 V		155
SPL-100 A	LTE option, (for SPC-200 A, Service and Diagnostic-PC)	NEW	93
SPW-100 A	WLAN option, (for SPC-200 A, Service and Diagnostic-PC)	NEW	93
SRC-606 EN	EN 54-24 Alarming-Ceiling Speaker, 6 W, 100 V, with Plastic cover		138
SRC-612 EN	EN 54-24 Alarming-Ceiling Speaker, 2x 6 W, 100 V, with Plastic cover		139
ST-030	Floor Stand, (for POWER-PHONE)		287
SW-004	Sound Panel Speaker, 4 W, 100V, with „twin-cone“-Chassis		176
SW-006	Sound Panel Speaker, 6 W, 100V, with „twin-cone“-Chassis		176
SW-010	Sound Panel Speaker, 10 W, 100V, with „twin-cone“-Chassis		176
SW-104	Sound Panel Speaker, 4 W, 100V		176
SW-106	Sound Panel Speaker, 6 W, 100V		176
SW-110	Sound Panel Speaker, 10 W, 100V		176
SW-210 C	Sound Panel Speaker, 10 W, 100V, 2-way system		176
SW-220 C	Sound Panel Speaker, 20 W, 100V, 2-way system		176
SW-230 C	Sound Panel Speaker, 30 W, 100V, 2-way system		176

T

TIF-404 C	Telefon Interface, analogue, with 4 change over contacts and all call		101
TP-10 USB	FM/AM Tuner Module, for all Small Centrals with Module compartment or ME-2A		109, 111, 113, ... 126, 128
TP-200 IR	DAB Internet-Radio Module, for all Small Centrals with Module compartment or ME-2A	NEW	109, 111, 113, ... 125, 128
TRA-001 A	›VARES-LOOP‹ Ringbus Termination, (End-of-line module)	NEW	32
TRC-800 A	›VARES-LOOP‹ Ringbus Controller, for DIN rail mounting, 1HP (IP-30)	NEW	29
TRK-001 A	›VARES-LOOP‹ DC Blocking Capacitor	NEW	32
TRP-485 A	›VARES-LOOP‹ Programming Adapter, (RS485 to USB)	NEW	32
TRT-200 A	›VARES-LOOP‹ Ringbus Isolator, IP 21C	NEW	30
TRT-300 A	›VARES-LOOP‹ Ringbus Module, with 2 relay contacts, IP 21C	NEW	33
TRT-400 A	›VARES-LOOP‹ Ringbus Module, with volume control 60W, IP 21C	NEW	31
TS-060	Desktop Microphone Stand, with boom arm		232

U

UB-016 B	UHF-Bodypack, 16 Frequencies, (863-865 MHz)		239, 273, 277, 287
UB-016 C	UHF-Bodypack, 16 Frequencies, (620-640 MHz)		239
UB-100 A	USB/SD-Card/BT Player-Module, (for UPM-431B), incl. Remote		95
UBA-002	Battery-Set AAA, 2x NiMH 1,2 V, (for UBR/UBT-016)		252
UBB-002	Battery-Set AA, 2x NiMH 1,2 V, (for UBH-016, VB-200 or VH-200)		252, 261, 265, 269
UBH-016	UHF-Hand Microphone, 16 Frequencies, (863-865 MHz)		251
UBR-016	UHF-Receiver, 16 Frequencies, (863-865 MHz), with Bag		251
UBT-016	UHF-Bodypack, 16 Frequencies, (863-865 MHz), with Bag		251
UH-016 B	UHF-Hand Microphone, 16 Frequencies, (863-865 MHz)		239, 273, 277, 287
UH-016 C	UHF-Hand Microphone, 16 Frequencies, (620-640 MHz)		239
UPG-300	Flush-Mount Housing, (for UPM-300H and UPM-300V)		97
UPG-400	Flush-Mount Housing, (for PWM-101B and UPM-431B)		23, 95
UPG-600	Flush-Mount Housing, (for VPM-6000U)		98
UPM-002 B	Button Module, 2-fold, (for UPM-300H)		97
UPM-300 H	3-Channel Mixer for mounted switch boxes, (horizontale)		97, 189
UPM-300 V	3-Channel Mixer for mounted switch boxes, (verticale)		97, 189

UPM-431 B	7-Channel-Mixing Control Panel		95
UR-016 B	4-tray Modul carrier, 16 Frequencies (863-865 MHz), for up to 4 pcs. URM-016B		238
UR-016 C	4-tray Modul carrier, 16 Frequencies (620-640 MHz), for up to 4 pcs. URM-016C		238
URM-016 B	UHF-Receiver Module, 16 Frequencies (863-865 MHz), for UR-016B		238
URM-016 C	UHF-Receiver Module, 16 Frequencies (620-640 MHz), for UR-016C		238
UWB-700 F	UHF-Bodypack, 700 Frequencies (630-660 MHz)	NEW	243, 247
UWH-701 F	UHF-Hand Microphone, 700 Frequencies (630-660 MHz)	NEW	243, 247
UWR-701 F	UHF-Receiver, 700 Frequencies (630-660 MHz)	NEW	242
UWR-702 F	UHF-Receiver, 2x 700 Frequencies (630-660 MHz)	NEW	246
UWT-016	UHF-Transmitter, 16 frequencies (863-865 MHz)		251

V

VB-016	VHF-Bodypack, (200-216 MHz), for SOUND-DESK 2	NEW	281
VB-200	VHF-Bodypack, (174-216 MHz), for SCHOOL-CUBE 100 3D/500/700	NEW	261, 265, 269
VC-020	Carriage and Storage Bag, (for SCHOOL-CUBE 100)		257, 261
VC-030	Carriage and Storage Bag, (for SCHOOL-CUBE 500)		265
VC-070	Carriage and Storage Bag, (for SCHOOL-CUBE 700)		269
VC-150	Carriage and Storage Cover, (for DSC-101 und DSC-150)		273, 277
VC-220	Vinyl-Cover, (for SOUND-DESK 2)	NEW	281
VCF-020 A	•VARES-1000• Housing for ESM-020 H, (without mounting panel)		39
VH-016	VHF-Hand Microphone, (200-216 MHz), for SOUND-DESK 2	NEW	281
VH-200	VHF-Hand Microphone, (174-216 MHz), for SCHOOL-CUBE 100 3D/500/700	NEW	261, 265, 269
VHF-016	VHF-Receiver, (for PWA-Series)	NEW	268
VL-Service 01	0-dB Adjustment, power extension, (for „VARIO-LINE“)		119
VL-Service 03	Input for External Control, (for „VARIO-LINE“)		119
VL-Service 05	Potential Free Contacts, (for „VARIO-LINE“)		119
VL-Service 06	Ground Leak Monitoring, (for „VARIO-LINE“)		119
VL-Service 07	Microphone Station Extension, (for „VARIO-LINE“)		119
VL-Service 08	MP3/Micro-SD Card Module, for external start of audio files, (for „VARIO-LINE“)		119
VLA-120 C	Small Central Unit „VARIO-LINE“, 180/120 W, 3 RU, 5 Speaker lines		117
VLA-240 C	Small Central Unit „VARIO-LINE“, 360/240 W, 3 RU, 5 Speaker lines		117
VLA-601 A	10-ZONES „VARIO-LINE“, 900/600 W, 3 RU, 10 Speaker lines		111
VLA-602 A	20-ZONES „VARIO-LINE“, 900/600 W, 3 RU, 20 Speaker lines		109
VLE-004	Function Extension Module, (for VLM-105/106/112)		43, 114, 116
VLM-100 A	Digital Microphone Station		44, 46, 114, 116
VLM-105	Digital Microphone Station		116
VLM-105 WO	Digital Microphone Station, (without RR-10)		116
VLM-106	Digital Microphone Station		114
VLM-106 WO	Digital Microphone Station, (without RR-60)		114
VLM-112	Digital Microphone Station		43
VLM-112 WO	Digital Microphone Station, (without RR-120)		43
VLM-200 A	All-Call Microphone Station, (for VLA-601A and VLA-602A)		108, 109, 110, 111
VLM-205	Digital Microphone Station		116
VLM-205 WO	Digital Microphone Station, (without RR-10)		116
VLM-206	Digital Microphone Station		114
VLM-206 WO	Digital Microphone Station, (without RR-60)		114
VLM-210 A	Digital Microphone Station, 10 Lines, (for VLA-601A)		111
VLM-220 A	Digital Microphone Station, 20 Lines, (for VLA-602A)		109
VLZ-6240 A	Small Central Unit „VARIO-LINE“, 360/240 W, 3 RU, 6 Speaker lines		113
VLZ-6480 A	Small Central Unit „VARIO-LINE“, 720/480 W, 3 RU, 6 Speaker lines		113
VLZ-6600 A	Small Central Unit „VARIO-LINE“, 900/600 W, 3 RU, 6 Speaker lines		113
VMF-020 A	•VARES-1000• Mounting Panel, (for ESM-020H)		39

VPM-6000 U	4-Channel Mixing Pre-Amplifier Control Panel, (for VLZ-Series), with USB-Interface		98
VS-050 P	All-Call Microphone Station, (for PSC-012A)		43

W

WFC-010 U	19" Angle „U-Flight-Case“, 10 RU		223
WFC-012 U	19" Angle „U-Flight-Case“, 12 RU		223
WFC-015 U	19" Angle „U-Flight-Case“, 15 RU		223
WFC-020 U	19" Angle „U-Flight-Case“, 20 RU		223
WHM-025	Hand Megaphone, max. 25 W, light blue		295
WHM-025 S	Hand Megaphone, max. 25 W, red, with siren		295
WPP-050 U1	Wireless POWER-PHONE, 50 W, with integrated 1-Channel UHF-Receiver		286
WPP-050 U2	Wireless POWER-PHONE, 50 W, with integrated 2-Channel UHF-Receiver		286
WSH-009	19" Wall Swing Frame Cabinet, 9 RU, with glass door, load capacity up to 100 kg		221
WSH-012	19" Wall Swing Frame Cabinet, 12 RU, with glass door, load capacity up to 100 kg		221
WSH-016	19" Wall Swing Frame Cabinet, 16 RU, with glass door, load capacity up to 100 kg		221

X

XES-212 EN SW	Xorva ›E‹ EN 54-24 Speaker, 200 W, 100 V, 2-way system, ball-throwing proof, black	NEW	153
XES-212 EN WS	Xorva ›E‹ EN 54-24 Speaker, 200 W, 100 V, 2-way system, ball-throwing proof, white	NEW	153
XLR-203 F	XLR-Socket, silver, female		234
XLR-203 M	XLR-Plug, silver, male		234
XLR-503 F	XLR-Installation-Socket, black, female		234
XLR-503 M	XLR-Installation-Plug, black, male		234
XSS-020	Xorva ›S‹ Speaker, 20 W, passive, 8 ohms, incl. Wall bracket		191
XSS-020 T	Xorva ›S‹ Speaker, 20 W, 100 V, incl. Wall bracket		191
XSS-040 T	Xorva ›S‹ Speaker, 40 W, 100 V, incl. Wall bracket		191
XWH-200 A	Wall bracket, black, for XES-212EN	NEW	152
